

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LETTER OF TRANSMITTAL.

To His Excellency, B. F. Carroll, Governor of the State of Iowa:

SIR: I have the honor to submit herewith, as required by law, the report of the Department of Public Instruction for the biennial period beginning July 1, 1910, and ending June 30, 1912.

ALBERT M. DEYOE,
Superintendent of Public Instruction.

November 1, 1912.

Superintendents of Public Inrtruction.

TERRITORY AND STATE OF IOWA.

| Name | County | Time | Postoffice |
|-------------------------|----------------|-----------|---------------|
| William Reynolds | Des Moines... | 1841-1842 | Deceased |
| James Harlan | Henry | 1847— | Deceased |
| Thos. H. Benton..... | Dubuque | 1848-1854 | Deceased |

The office of Superintendent was abolished in 1842. Again in 1858 it was abolished and the duties were performed by the State Board of Education, of which Thos. H. Benton acted as secretary for five years.

THIRTY-SIXTH BIENNIAL REPORT OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION.

IOWA AND ITS NATURAL RESOURCES.

The uniform fertility of Iowa's soil is a natural resource unsurpassed in the world. No territory of similar area can be found anywhere with less waste land. Good authority has reported that the average value per acre of its agricultural products exceeds that of any state in the Union, being about \$11.50. Iowa farms range in value from \$50.00 to \$225.00 per acre. The average value per acre approximates \$100.00. Iowa's increase in wealth and its progress in development in the past twenty-five years has been marvelous. Less than forty years have passed since home-seekers hesitated locating in western Iowa. Then, the country was so sparsely settled, the lands were unsubdued, and railroads were few. What few farm houses there were, were usually small. The sheds for stock were thatched with slough grass or covered with straw, the lumber wagon was practically the only means of transportation, the corn-planter, the self-rake reaper, and the horse-power thresher were in vogue. Roads were merely trails and bridges scarce. The little white schoolhouse has the proud distinction of being the pioneer among the public enterprises. Families well located to school and provided with the farm implements of the time were considered fortunate and indeed were quite content. The transition from the limited conveniences characteristic of those pioneer days to the commodious farm homes, the big red barns, improved farm machinery, the telephone, the rural mail delivery, and the automobile has taken place within the last twenty-five years.

NEW PROBLEMS OF COUNTRY LIFE.

New problems are arising. Extensive farming, without regard to the depletion of the soil, was the common practice during the period of cheap lands. The conservation of the fertility of the soil

by methods of intensive and scientific farming should be adopted without delay. Impoverishment of the soil is deplorable and inexcusable. Education for the farmer of its kind is as essential today as is education for the professions.

Sociability characterized pioneer life. Differences in living between life in small towns in the early settlement of a country and that of the farm were not marked. With the changes that have occurred in farm conditions "still stands the little schoolhouse on a weedy patch of ground beside the muddy road." A dearth of social advantages exist which more than hard work causes dissatisfaction with farm life. The school must become a greater factor in preparing our boys and girls to solve the social, educational and economic problems of the day. Chance must give way to choice in these matters. Farm problems are not confined to the tilling and the fertilization of the land. There are social and educational questions of equally as much importance as those relating solely to the soil, connected with country life.

OUR RURAL SCHOOLS.

In too many instances there is a tendency on the part of our boys and girls to leave the farm and seek homes and employment in the city. This is not as it should be. There is room on our farms in Iowa to duplicate the present population many times. It is essential that country life conditions be made attractive in order that more of our boys and girls will be contented to remain on the farm. Intensive or scientific farming that requires mental activity as well as manual labor will help do it. Modern home conveniences will help do it. Church, school, and recreational centers will help do it. Why should children leave school about the fifth year as is the case with a large percentage of the boys and girls living in rural communities today? Why should those who are really ambitious for an education move to town? Did any one ever hear of families moving into the country because of the superior social and educational advantages? Should any sort of a building located within walking distance of the home, with a young teacher of meager education and practically no settled ideals of life, be considered as constituting good school facilities? We have passed the age of the scythe, the flail, the old shovel cultivator, and the hand-planter, yes, we have even passed the stage of the self-rake reaper and the horse-power thresher, but many of our

country communities are still pioneering as far as schools and social conditions are concerned. No wonder that farm life surroundings are not attractive when there is practically no opportunity for social occasions and no attention given to good, wholesome recreation. Social life is one of the strongest desires of a normal youth. Why should the farm continue to be a temporary home to be tolerated while making money and gaining a competence upon which to support a family, then retire to the town or city because of better social and educational advantages? Just as good schools, including the high school department, can be provided in rural districts as may be found in the towns. If either locality naturally has any advantage, it is the country. Farming communities are as able financially to pay for the education of their children as are the towns.

THE COMMITTEE OF TWELVE AND ITS FINDINGS.

Seventeen years ago, the Committee of Twelve on Rural Schools was appointed by the National Educational Association. The Committee was composed of men known to be among the nation's most eminent educators. Hon. Henry Sabin was Chairman of the Committee. Following are a few extracts from the report of this Committee:

"Those who live in the fields are as deserving of education as those who dwell beside the asphalt."

"In the country there is a great dearth of social life. This, more than hard work, deprives the country of its strength."

"Whatever else the course of study may do, let it breathe hope for the boys and girls. Whether the instrument of living is the plow or the pen, it matters but little; the furrow well turned, and the line well written, are both fundamental and absolutely interchangeable in human society."

"The rural school should aim especially to make country life more attractive and beautiful, and should pay more attention to rural industries. Much is said of the necessity for considering the environment of the child; for bringing into his school life the thoughts and interests of his home life, that the school may not prove to him a thing remote and foreign; of making the school a recognition of his past and a preparation for his future. Little sign of this can be found in the ordinary rural school."

COMMITTEE OF 1911 ON RURAL SCHOOLS.

Again we find the National Association in 1911 appointing a Committee on rural schools. Why? What of the report of the Committee of 1895? The preliminary report of the Committee of 1911 contains the following statements:

"Of the twelve million rural school children, less than twenty-five per cent complete the work of the grades. The teaching force is immature and lacks proper training. Terms are too short, school buildings are poor, unsanitary and ill-equipped. The supervision is inadequate. Although the rural schools serve directly the interests of the greatest per cent of our population, and although they are admittedly the most inefficient part of our educational system, yet there is not an organized and nation-wide effort to make them serve fully the needs of the *new civilization* under which we are now living."

"The country school needs assistance. Rural communities must be aroused to the necessity of better school privileges for their children."

THE ONE-ROOM RURAL SCHOOLS. TWO PICTURES.

Let us take a look, in imagination, at the little (once white) schoolhouse. There it stands out in the corner of some field without a fence to bound its plot of ground, no trees to afford shelter from the winds of winter or to offer shade in summer. The weeds have taken possession of much of the school yard, the cattle have been permitted to trample the grass under their feet and to destroy the trees that may have been planted by the teacher and the boys and the girls on Arbor Day. The out-buildings are sometimes without doors, the worst sort of places for vice, nastiness, and evil thoughts. The school building is shaped like a box-car with a coal shed attached to the rear and opening directly into the school room by a loose fitting door, permitting free access of cold air laden with coal dust. Desks are sometimes placed within two or three feet of the stove which stands in the center of the room; the walls are blackened with accumulations of dirt and coal soot; a poor old map or two hang on the walls. There may be several broken window lights or the windows may be without suitable curtains.

But enough of this. Let us now consider a more pleasing picture. The contrasts may be found in every county. We now see a build-

ing of neat architectural design; constructed according to proper plans for heating, ventilation, and light, the walls are nicely tinted and adorned with two or three pictures of merit. A heating and ventilating plant has been installed in one corner of the room. A neat library case may be found in the room. The child's mind undoubtedly assimilates much of its schoolroom surroundings.

Many localities fail to show sufficient interest in the school to attend the annual meetings, and directors either hold over or are appointed simply because someone must look after hiring teachers and hauling the fuel. Many school directors never investigate conditions concerning the schools and school property.

Schools of nearly uniform equipment and excellence may be maintained in all districts of Iowa. There are no impoverished districts in the state, or would not be provided sufficient territory were embraced in the district, and this can be done without making any district too large.

THE TOWNSHIP UNIT OF ORGANIZATION.

The existence of the rural sub-districts and the rural independent district, especially the latter, in Iowa is a hindrance to the adoption of better school facilities in the state. The unit of organization should be sufficiently large in order that the taxing unit will not only support good schools below the eighth grade, but also a high school department offering from two to four years of work.

THE RURAL HIGH SCHOOL AND THE COMMUNITY CENTER.

The rural high school is just as essential to a complete system of education for the country as is the town high school to a complete system of education for the town. The rural independent district embraces too small a territory to support a high school because of the small number of resident pupils and because of the insufficient taxing area. Many rural schools are considering the possibility of uniting with adjacent villages or town districts and all derive the benefit of better high school advantages. There is also a growing sentiment favorable to the establishment of high schools at the center of the townships to which the pupils provide their own transportation. It will be more convenient in many instances and probably be no more expensive to maintain the high school department in the home district than to pay the tuition of pupils in town

high schools. Either by providing for the central high school in the township where it appears to be desirable to maintain the several schools for the grades, or by the establishment of the high school in rural districts as a natural part of the consolidated school, much will be done to stop the drift of population to the cities. Such schools located in the small towns or located out among the farms would be a splendid thing. The time is at hand when the district that lags behind concerning proper school advantages is not considered a desirable place in which to live. The best place for the youth of high school age to board and lodge is at home under parental influence.

The small, rural independent district does not only afford a territorial area too small to provide a proper educational center, but it is too small for community purposes as a social unit. A rural high school building located at the center of the township, or the consolidated school furnishing school privileges for the residents of not less than sixteen sections, would provide a good place for the educational, social, and recreational activities of the community and our aim should be such a center for every community in Iowa.

A course of study including at least two years of high school work, bearing a close relationship to community interests is essential. The course should include agriculture, home economics, manual training, parliamentary practice, debating, and farm book-keeping. The traditional culture studies should not be omitted. The study of improved farming should include in its broader sense the cultural side as well as the economical side of agriculture. The economic phase of the study is narrowing and simply means get more money with which to buy more land, the cultural side would add to the matter of financial profit the elevation of the standard of living of the farmer. It is perfectly proper—yea imperative—that the farmer of today learn how to raise two bushels of corn where only one may have been raised before in order to make a profit on his investment. However, better home life should be the matter of paramount importance to be sought rather than to add more acres to the farm. Such a view of “better farming” means the edification of the family. Let us not forget that there is “satisfaction in the study of a good book as well as in the study of a good ear of corn” and thus exalt life on the farm. Better educational advantages in rural districts means awakened interest in

country life. The schoolhouse ought to be used for community purposes, such as short courses, social gatherings, lectures, and improvement clubs.

TOWNSHIP SCHOOL BOARD.

By placing the schools of an entire township under the jurisdiction of a township board consisting of three or five members, similar to the manner of conducting school affairs in towns and cities, would promote more careful methods of school management. A small board will conduct business more efficiently than a large board consisting of nine members. This plan would also provide for a continuous board by electing one-third of its membership annually. School officers' conferences would be feasible and a reasonable compensation to school officers would not be a burden upon the district, financially. The most efficient school organization and management is found in Indiana where the township plan exists and the schools of the township are in the hands of one man, the township trustee. Louisiana has taken a progressive stand by adopting the county as the unit of organization. *The adoption of an area to consist of not less than the civil township, except in consolidated districts, is the most important need for legislative action in Iowa today, relating to schools.*

CONSOLIDATION OF SCHOOLS.

The consolidated school has partially failed because of simply attempting to imitate the city schools. The new type of a consolidated school is the school of greatest possibilities. Much of the prejudice against consolidation would be overcome if taxpayers would give the matter a fair-minded investigation. The best information may be obtained by visiting some of the best consolidated schools, such as Milford, Marathon, Buffalo Center, Crawfordsvile, and others. The past winter was a favorable time to test the question of transportation. One morning last winter, a visitor at Marathon saw six bob loads of country boys and girls unload before the schoolhouse. It was a sight that he was glad to have gone miles to see. They were a happy, contented lot of boys and girls, and gave evidence of arriving at the schoolhouse more comfortable than some of those who walked a half-mile or a mile. The attendance in the seventh and eighth grades and in the high school showed about an equal attendance of pupils from the surrounding coun-

try and from the town of 550 population. The attendance indicated that the boys and girls in this community remain in school until finishing the high school. Manual training, agriculture, and home economics are popular studies in this school. The teachers employed are either normal or college trained. The farm members on the school board are enthusiastic concerning the school. The Superintendent, J. E. Cundy, offered the following commendatory words: "It means the best social life to be had, and the schoolhouse as the center of activities and a people in sympathy with the new life. Take a vote of our pupils and you will find a very small per cent who will say they desire to leave the farm, but on the other hand declare emphatically for the farm."

At Buffalo Center, an enlarged and remodeled school building was recently dedicated; modern in every respect, properly lighted, heated and ventilated. There are special rooms for industrial work for the boys, and neat, sensibly equipped apartments for home economics for the girls. In order to secure this up-to-date building at Buffalo Center, it was necessary to bond the district for the improvements. But, what of it? Farming communities should change their notions concerning taxation for public improvements. Why not bond the district for a period of years and thus pay for the buildings gradually? Towns and cities secure the better school buildings by this method.

Conditions at Milford are described as follows: "We have the high school room full and more. We are asked to take another district by the unanimous vote of the outside district. We are now drawing tuition pupils from as far as twenty miles, which leads me to believe that all the consolidated school and the Normal course in high schools must do is to make good. Our board has now spent \$200.00 for laboratory equipment, \$400.00 for library and general equipment for twelve in domestic science, and full equipment for manual training and agriculture. With all this and the fine gymnasium, together with the good feeling prevailing toward the school, it seems to me that the rural communities and small towns in this section will soon take notice."

The report of the Superintendent of Public Instruction of Indiana for 1910 contains the following: "The work of the consolidated schools in Indiana is highly gratifying. Children are doing better work than is possible for them to do in the one-room building.

The increase of more than six thousand three hundred students in the high schools in the last two years is due in great part to the consolidated schools." Modern school buildings in every respect may be found in the small town and also in the country, located several miles from town.

Consolidation has been carried into 31 of the 38 counties of the state of Washington.

Minnesota, North Dakota, Kansas, Ohio, and other states are moving rapidly in this direction.

The United States government, after a thorough investigation, finds not one case of abandonment of the completely consolidated school.

THE CONSOLIDATED SCHOOL AND THE TEACHER PROBLEM.

The consolidated school offers a solution of the teacher problem. A less number of teachers will be required and better wages can be paid. There will be better qualified teachers who will make the work of teaching more nearly a permanent occupation. Under the present system of small schools, about 30 per cent of the rural teachers are without experience every year.

ADVANTAGES OF CONSOLIDATION.

Sanitary buildings, better equipment, better and higher courses of study adapted to needs of the pupils, better teachers, and better classification of pupils will be secured in the consolidated school.

CONSOLIDATION AND THE COMMUNITY CENTER.

The larger area embraced in the consolidated district and the commodious building will provide a suitable community center.

The school grounds should be sufficiently large to furnish space for the planting and arrangement of trees and shrubs, a small portion for experimental work in agriculture, although the greater portion of this work may be carried on at the homes of the pupils under the direction of a special teacher in agriculture, and another portion for sports and amusements. The building should be equipped with library and reading room, an assembly room, for public gatherings, and decent toilet apartments. Shed accommodations for teams should be provided on the school premises.

COMPARATIVE COST OF TUITION.

The following data tabulated from the reports of the County Superintendents for the year ending June 30, 1911, shows some interesting facts concerning the comparative attendance, cost per pupil, etc., as represented by the average for all the rural schools, not consolidated, in the counties given and the consolidated schools.

| Consolidated Schools and School Township Compared | Average number months of school | Number of hicks | Attendance | | Average cost of tuition per month | Average cost for each pupil, teachers and contingent on aver- age daily attendance | * |
|--|------------------------------------|-----------------|----------------------------|---------------------------|--------------------------------------|---|-----------------------------------|
| | | | Per cent of enumeration | Per cent of enrollment | | | |
| Washington Co. Tp. Schools | 7.6 | ----- | 47% | 69% | \$2.90 | \$4.17 | |
| Crawfordsville Schools | 9. | 5 | 81% | 86% | 1.77 | 4.08 | |
| Mitchell Co. Tp. Schools | 7.8 | ----- | 44% | 68% | \$3.37 | \$4.24 | |
| McIntire Schools | 9. | 9 | 60% | 78% | 2.04 | 4.26 | |
| Marshall Co. Tp. Schools | 8.2 | ----- | 52% | 66% | \$3.88 | \$4.61 | |
| Albion Schools | 9. | 4 | 69% | 81% | 2.53 | 4.68 | |
| Dickinson Co. Tp. Schools | 8. | ----- | 58% | 61% | \$3.59 | \$4.15 | Lloyd Tp. |
| Terrel Schools | 8. | 8 | 87% | 79% | 1.80 | 4.18 | |

| Garfield Schools | ----- | ----- | ----- | ----- | ----- | ----- | * . |
| Story Co. Tp. Schools | 7.81 | ----- | 54% | 65% | \$3.23 | \$4.02 | |
| Fernald Schools | 8. | 8 | 67% | 79% | 2.73 | 5.40 | |
| Winnebago Co. Tp. Schools | 6.75 | ----- | 41% | 62% | \$3.48 | \$3.86 | |
| Buffalo Center Schools | 9. | 6 | 66% | 78% | 1.94 | 3.59 | |
| Bunea Vista Co. Tp. Schools | 8. | ----- | 46% | 72% | \$3.73 | \$4.96 | |
| Marathon Schools | 9. | 6 | 61% | 84% | 1.88 | 4.91 | * Contingent expenses large |
| Newell Schools | 9. | 4 | 60% | 80% | 2.34 | 4.52 | |
| Truesdale Schools | 7.2 | 4 | 56% | 66% | 3.29 | 3.09 | |

The average daily attendance is higher, and the average cost of tuition is lower on account of the better attendance in consolidated districts than in districts maintaining small schools.

As a stimulation to better schools, state aid is being used successfully in Minnesota, Washington, North Dakota, and Wisconsin. The state may well encourage the departments of elementary and secondary education by this method. The fundamental principle governing the subsidation of public schools is to help such districts as help themselves. Number of months of school, qualification of teachers employed, courses of study, condition of school building as to heating, lighting, and ventilation, and the the library and apparatus equipment are used as standards by which to determine whether state aid should be rendered.

Because a certain school district is intersected by a railroad, why should the tax upon this corporation go entirely to the district having the railroad facilities and an adjoining district without a railroad not receive any of the benefits from the tax on the railroad corporation? The tax on corporations in Wisconsin is paid into the state treasury and is being used partially for special state aid to schools.

In North Dakota, graded schools of the first class receive state aid to the amount of \$150.00, and graded schools of the second class receive \$100.00 annually. Rural schools of the first class receive \$100.00 and rural schools of the second class, \$50.00. A consolidated school meeting the requirements of a first class graded school is given \$250.00 and a consolidated school meeting the requirements of a second class graded school, \$175.00 state aid.

In Minnesota, schools under Class A, in consolidated districts receive annually state aid of \$1,500.00; those under Class B, \$1000.00; those under class C, \$750.00; and in addition to such aid, a school of any of the above classes shall receive an amount to aid in the construction of a building equal to 25 per cent of the cost of the building, provided the amount allowed for this purpose, shall not exceed \$1,500.00. High schools maintaining a Normal training department shall receive \$750.00 for this purpose, besides additional aid is given for the other requirements and conditions.

The total amount of special state aid to public schools in Minnesota last year was \$1,418,264.00 and was raised by direct taxation.

State rural school inspector, E. M. Phillips, of Minnesota, gives the following explanation for the rapid consolidation of schools in that state.

"About 12 years ago a movement was begun in the state of Minnesota for bringing our schools together into a type of school called the consolidated school. Under the old law, within 11 years there were just nine such consolidations accomplished. There was no lessening of the effort to bring this about. People conceived that if the country was to have as good a school for its children as we were to have in our villages and cities there must be a larger school unit. Nobody questioned that. With all the effort of all the persons interested in this, just nine consolidations were accomplished in 11 years.

"At the last session of the legislature a bill was introduced and passed known as the Holmberg Act. This law provided that in voting upon consolidation (and I wish this point might be noted because I think this is the vital thing in the whole business) the vote should not be limited by old district boundaries but rather entire district involved in the proposed consolidation should vote as a unit for this movement. The idea being this, that we are not to decide what kind of school will be best by letting any one little arbitrary corporation settle that matter; it shall be settled by the larger interests and the larger intelligence of the larger unit. I believe that accounts for the fact, more than anything else, that since the Holmberg Act went into effect the 21st day of last April, there have been accomplished in Minnesota something over 50 consolidations. Nine in 11 years as against 50 in one year.

"There is another provision of this act that has been of considerable importance in bringing about consolidation. It is a system of state aid for its schools. It has worked admirably. Nobody can question it. But in passing, it may be safely said that Minnesota's high school system, the system that has been built up, is a little bit more substantial and has accomplished a little bit more for the good of the children who have been there than the system of any other state. This is due probably to the state aid and what goes with that naturally, state inspection. So we undertook this same thing with reference to our consolidated schools, and the Holmberg Act provides that a consolidated school containing two rooms and two teachers shall be entitled to an annual state aid of \$750.00. If they have three teachers, an annual state aid of \$1000.00. If they have four or more teachers, an annual state aid of \$1500.00. In addition to this the law provides a building aid to the extent of a maximum of \$1500.00."

Washington offers a bonus of \$170.00 annually for each district consolidated, less one. Thus, if five schools unite to form one school, the amount of the state funds to the consolidated district will equal four times \$170.00.

GOOD ROADS.

Good schools and good roads are the two most important needs in rural communities. Both may be secured at but little greater expense than the cost of maintaining the present prevailing system of rural schools and the indifferent methods used in road building.

The consolidation of schools is not wholly dependent upon the making of permanent roads. The transportation of pupils to school is being managed quite satisfactorily in Iowa and in other states where permanent roads have not yet been established. However, as a matter of convenience, in many ways, good roads play such an important part in rural life development, that our state should no longer delay by legislative action to adopt some systematic plan of permanent road construction. Approximately, \$3,479,382, was paid in cash as road tax in Iowa for the year 1911. This amount does not include the amount of tax expended in work. The automobile tax for the year closing June 30, 1912, was \$505,000 which will increase from year to year at the present rate. It is safe to estimate the total amount of available road tax in cash as \$4,000,000, which should build at least 1,000 miles of permanent road. Ten years of permanent road construction would give 10,000 miles of good roads, whereas if the present methods of road building continues, our roads will practically be no better at the end of the ten year period than they are today.

This estimate takes no consideration of the tax annually worked, which would still be available for use in necessary general repair of roads.

Better social and industrial conditions will follow the establishment of good roads and good schools.

The solution of our social and educational problems depends in no small degree upon just and fair methods of taxation devised to relieve the burden from falling upon those in moderate circumstances. The report of the treasurer of state shows \$490,809.46 collected from Iowa's collateral inheritance tax for the last bi-

ennial period. Reports show the amount is increasing annually. The following plan of levying a graduated direct tax on inheritances to provide a fund to encourage better schools is proposed by the Better Iowa Schools Commission.

The first ten thousand dollars to be exempt.

The second ten thousand dollars to be taxed at the rate of one per cent.

The third ten thousand dollars to be taxed at the rate of two per cent.

The fourth ten thousand dollars, to be taxed at the rate of four per cent.

The fifth ten thousand dollars, or more, to be taxed at the rate of five per cent.

Either a tax on inheritances or a small millage tax to provide a fund to aid all elementary and secondary schools on some meritorious and equitable basis is at least suggestive.

THE TUITION LAW.

One of the most reasonable matters of school legislation ever enacted in Iowa is the tuition law that guarantees to every child the advantage of a four-year high school education at the expense of his own district. It is practically possible to provide a separate department for high school purposes in every school district in the state by making the territorial area embraced in the district sufficiently large as a taxing unit and also to include the necessary number of pupils of high school age to support such a department. Where the plan of establishing local high school facilities is not carried out, the pupils should be privileged to attend high schools in other districts at the expense of their home districts. Reports received from the high school attendance in the state shows a large increase in attendance due to the tuition law. The increased attendance indicates that it is not the financially well-to-do who are particularly favored. The matter of payment of tuition often bars the children of families in poor or moderate circumstances from attending school. The well-to-do can afford to pay the tuition. The argument that only the rich are favored by the tuition law is simply the excuse of the well-to-do farmer who has no children to educate or else is opposed to anything above a mere elementary

education. Such a person estimates success in life by dollars, only. There are many boys and girls who are traveling several miles daily to attend high school, and were they compelled to pay their own tuition, would be deprived of such advantages. To state that only the boys and girls from rich families in the country attend high school is not substantiated by the facts. Boys and girls from the farms, rich and poor alike, are entitled to educational advantages equal to those provided in the towns.

The passage of the bill introduced by Representative Hunt of Harrison county in the Thirty-fourth General Assembly whereby districts might legally increase the levy for the support of schools in rural districts would have relieved those districts from any embarrassment in maintaining their own schools. However, the number of districts affected in this manner is not many. The Hunt Bill is commended to the Thirty-fifth General Assembly for passage.

INSPECTION OF SCHOOLS.

Other states are securing good results and greater efficiency in the schools by empowering the Department of Public Instruction to conduct a thorough system of inspection of schools. Specialists in high school work, in rural school work, and in the work of the grades are kept in the field for the purpose of stimulating schools to reach certain standards of excellence. Minnesota employs three inspectors whose salaries average \$2700 each. Two deputies are also allowed. In Wisconsin, besides the deputy, there is one high school inspector, one rural school inspector, two graded school inspectors, whose salaries average \$2087 each. The traveling expenses of all the employees of the office are paid by the state.

Missouri employs a high school inspector and a rural school inspector.

Nebraska employs four deputies and three inspectors.

Illinois employs two inspectors to work among rural schools especially, besides two assistants.

North Dakota is accomplishing good results from inspection of rural schools.

Three inspectors are needed in Iowa to work under the direction of the Department of Public Instruction to assist in the improve-

ment of the small high schools, the grades, and the rural schools. No departments in our educational system are more important and yet receiving less attention. The great mass of the children never attend school above these departments, then why not some special effort to make these schools the most efficient possible. The foundation of our educational system deserves greater consideration than it is receiving in Iowa.

STANDARDIZATION OF SMALL HIGH SCHOOLS.

No step has ever been taken in Iowa to fix a standard for high schools, except as a basis for accrediting to the state educational institutions. By common consent among the independent colleges in the state, the list of high schools thus accredited has been considered as meeting the requirements for college entrance. The relationship that the state educational institutions bear to the independent colleges is fortunate and offers a practical solution of the problem of unifying college entrance requirements in the state. Three classes of high schools result from this method of standardization, viz.:

1. Fully accredited high schools.
2. Partially accredited high schools.
3. Non-accredited high schools.

It is with reference to the non-accredited high schools that State supervision is needed. For several years, it has been generally agreed among school people and all others cognizant of conditions that there should be some definite method of determining what constitutes a high school, and that there should be certain well-defined requirements that must be met by every public school before it can be recognized as maintaining a high school department. There are many communities in the state, zealous of having a high school department connected with their schools, where high school work has been attempted at the expense of the grades below the high school. The work in the grades has suffered because of forcing each teacher to conduct too many recitations, daily, and by crowding the rooms with too many grades, and pupils. It is fundamental that the instruction and training in the grades be of a high standard. The first matter of importance to school boards should be to provide for and insist upon thorough work in the grades, and not until after this has been accomplished should there be any attempt to organize a high school.

The course of study in the small high school should bear a close relationship to the needs of the greatest number of pupils enrolled, which need may naturally be determined by community conditions. The needs and inclinations of pupils vary, even in the same community, and high schools should recognize this condition and so far as possible provide electives in the course of study. It is possible and essential that the larger high schools offer electives in the courses of study. But the problem of providing courses of study offering electives depends upon the ability of the school to carry on the work, thoroughly. After all, it is not a matter of so much importance whether the pupil pursues the study of Latin or agriculture, literature or manual training, in the high school, as it is the quality of work that is being done. The following soliloquy of a salesman given in a current magazine article is well taken: "Education teaches a fellow to work or its no good."

Training in the high schools for practical life should also afford training for college entrance. The function of education is to prepare for practical life and good citizenship, no matter whether obtained in the high school solely or supplemented by the college and university. It is not reasonable to consider preparation for one occupation more practical than another. The ministry, teaching, farming, business capacity, and the practice of medicine or law are alike essential to the adjustment of social conditions in a well balanced community; one is just as practical as any of the others and perhaps no more so.

The foundation for practical life must be laid in the public school. Whatever work then has been well done in the high school should very properly receive credit in meeting college entrance requirements. Further than this, work well done in the corresponding year in one high school should be of such a quality that when completed, the pupil is prepared to take up the next year's work in any high school in a creditable manner, although the subjects pursued have not been identical. It is unfortunate that pupils who have completed a four-year course of study in one high school can receive credit for only two years of work in the better high schools, although the number of subjects attempted and the amount of work canvassed is nearly the same.

A small number of rural districts have set up a claim of furnishing high school facilities in the one-room schools. One teacher is

expected not only to conduct classes in the grades but to organize classes in high school subjects. This has been attempted regardless of the qualification of the teacher employed and regardless of the fact that there may be no equipment in the way of library and apparatus. It is a matter of common knowledge that some communities have attempted to carry on a regular four-year high school course with only one teacher in charge. These conditions are not only an imposition upon the teacher and the taxpayers but a positive wrong to the children. Undoubtedly, an attempt to organize for high school work under such circumstances would not constitute a legal high school.

Since the enactment of the tuition law, the Department of Public Instruction has received a great many letters asking for information concerning what constitutes a high school in the meaning of the law. What are the responsibilities of school districts in the matter of payment of tuition and what are the rights of the children who have completed the eighth grade under the conditions imposed by the law?

The tuition law provides that children residing in districts not offering a four-year high school course may attend a high school in another district and have their tuition paid by their home districts, provided the amount of tuition that may be collected from the debtor district shall not exceed the average cost of tuition in the nearest high school. The rights of the children demand that the work done in every high school be bona fide high school work, whether the work outlined for the high school be for a one-year course, a two-year course, a three-year course, or a four-year course. It is justly provided that a district offering one or more years of bona fide high school work, shall be compelled to pay tuition in the home school. For example, districts conducting ninth grade only would be compelled to pay tuition for tenth, eleventh, and twelfth years. A district maintaining a two-year high school course would be required to pay tuition for eleventh and twelfth years, only.

The law guarantees to every child, the advantages of a four-year high school education at the expense of his home district.

Evidently authority should be vested in some department to determine what constitutes a high school. The need for such a course has existed for several years but the tuition law has made this need more pronounced. It is also true that our legislators desired

this authority to rest with the Department of Public Instruction, for Section 2776 of the School Laws provides for higher courses of study in our public schools subject to the approval of the Superintendent of Public Instruction.

In determining what constitutes a high school, certain fundamental principles should be recognized.

1. It is impossible for the teacher in charge of the ordinary one-room school to conduct classes above the eighth grade.

2. It is impossible for one teacher to do justice to more than two years of high school work when devoting all his time to recitation periods during school hours. A three or four-year high school should employ not less than two teachers.

3. Teachers employed to teach high school subjects should have had training themselves above the high school.

4. A library including reference works and apparatus to be used in connection with the teaching of certain subjects is essential. A great amount of apparatus may not be absolutely required in small high schools.

It will be absolutely impossible for the Department of Public Instruction to conduct any systematic plan of inspection of high schools with the limited office force. An inspector of high schools, and an inspector of rural schools are imperative needs of the office, for this work.

SUGGESTED HIGH SCHOOL PROGRAMS.

The four-year programs for high schools outlined by the State Board of Education and for the Normal Training Course in high schools by the Department of Public Instruction are recommended. The following two and three-year programs are intended to be suggestive to those interested in making courses of study. It may be desirable to substitute other subjects, including manual training, for those named, depending on local needs.

REPORT OF THE

TWO-YEAR PROGRAM.

| NINTH YEAR. | |
|---|-------------------------|
| First Semester | Second Semester |
| (1) Algebra | (1) Algebra |
| (2) English (Word Analysis and Orthography) | (2) *English |
| †(3) Commercial Arithmetic | (3) Bookkeeping |
| †(4) Geography (Physical or Commercial) | (4) Agricultural Botany |

| TENTH YEAR. | |
|------------------------|------------------------------|
| (1) *English | (1) English (Grammar Review) |
| (2) Plane Geometry | (2) Plane Geometry |
| (3) Elementary Physics | (3) Elementary Physics |
| †(4) American History | (4) Civics |

THREE-YEAR PROGRAM.

| NINTH YEAR. | |
|---|-------------------------|
| (1) Algebra | (1) Algebra |
| (2) English (Word Analysis and Orthography) | (2) *English |
| (3) Commercial Arithmetic | (3) Bookkeeping |
| (4) Geography (Physical or Commercial) | (4) Agricultural Botany |

| TENTH YEAR. | |

| †(3) Ancient History | (3) Ancient History |
| †(4) Agriculture | (4) Domestic Science |

| ELEVENTH YEAR. | |
|------------------------|------------------------------|
| (1) Algebra | (1) English (Grammar Review) |
| (2) American History | (2) Civil Government |
| (3) Elementary Physics | (3) Elementary Physics |
| †(4) English | (4) Reviews (Physiology) |

*Rhetoric and Composition, three periods a week. Classics, two periods a week.

Assign topics frequently for oral work in composition. Thorough criticism of oral expression and written composition by teacher in English.

†If either Latin or German is desired, substitute for either (3) or (4) in ninth year and for (4) in tenth and eleventh years.

Excellent work in domestic science is being done in many of the public schools, beginning in the seventh or eighth grades and continuing with one or two semesters work in the high school. When it is desirable and possible to furnish a room with suitable equipment for domestic science, a school board may very wisely select one teacher who has had special training to teach home economics

as well as other subjects. No teacher should be expected to teach a subject in which she is not especially prepared. This suggestion applies to the teaching of agriculture, manual training, and other subjects as well as to home economics.

With a proper standardization of high schools, the non-accredited school would not exist. By defining what constitutes a high school, better conditions concerning the quantity and quality of the work attempted in the small high schools would result. A flat rate not to exceed a certain amount that may be collected from school districts in payment of tuition for resident pupils would very much simplify conditions. This amount should approximate the average cost of tuition in a good high school.

SCHOOL OFFICERS' CONFERENCE.

The inspector of rural schools could be of invaluable service to the schools of this class by meeting with the county superintendent and school officers in each county.

School officers could become better informed as to their duties and questions of current interest concerning the schools discussed. The special conditions and needs of the various districts in the county could also receive consideration. Greater uniformity and efficiency in school management would result.

FACILITIES FOR TRAINING TEACHERS FOR RURAL AND GRADED SCHOOLS.

Practically 80 per cent of the teachers in the rural schools of Iowa are directly from the high schools of the state. This being true, it is vitally necessary to extend the work of the High School Normal Training Course so that it is available to as large a number of high school students as possible. At present if two high schools are designated in a county, each school receives four hundred dollars annually instead of five hundred. High schools that have already been designated are not inclined to look with favor upon a reduction in the amount of aid they have been expecting to receive from the state. For this reason the aid given a high school should be the same whether there is one school in the county or more than one. The beneficial results of the Normal Training Course are not confined within the boundary of the county in which the school happens to be located, and the law should be amended and the appropriation increased so the Department of Public In-

struction would be authorized to designate more than one high school in a county without reducing the aid given to those already designated. The principle should be, that every high school that is willing and able to meet the conditions should be designated and receive the same amount of aid that any other high school receives.

In addition to extending the work of the Normal Training High Schools it is also recommended that four additional Normal Schools be established within the next five years. These Normal Schools should offer only a two-year course for the purpose of preparing teachers for the elementary grades.

NECESSITY FOR PROFESSIONAL TRAINING.

On account of a lack of facilities for training teachers the state has been depending upon examinations to secure the teachers that are needed; but the only way to get an adequate supply of teachers is to train them. So long as we are compelled to use in the schools as teachers practically every one who desires to teach, it matters but little whether they are required to pass an easy examination or one more difficult. Their proficiency as teachers is not materially effected by the kind of examination they pass. What is needed is a requirement that will prevent any one from teaching who has not had a certain definite amount of training prior to taking the examination. One year of Normal Training should very soon be required of all applicants to teach in the common schools.

THE COUNTY NORMAL INSTITUTE.

The present method of conducting a six day County Normal Institute is expensive, does not secure the results most needed, and has a tendency to cause young teachers to think that if they have attended one or more County Normal Institutes that they have made all the professional preparation needed.

In practice there are two types of County Normal Institutes, the inspirational institute and the academic institute, or the institute in which effort is made to teach subject matter. If a teacher needs drill in subject matter she needs more than six days; but for the inspirational institute, six days is too long. Yet under the present law a county superintendent is required to hold at least a six day institute.

It is the recommendation of the Better Iowa Schools Commission that the County Normal Institute be abolished and the six weeks summer school be substituted for the academic institute and the county superintendent be authorized to hold short inspirational institutes at such times and places in his county during the school year as the needs of his county may demand and attendance of teachers be required without loss of time. Educational meetings for a one or two days' session each would be quite satisfactory.

SANITARY SCHOOL BUILDINGS.

The Department of Public Instruction should be enabled to furnish plans and specifications for school buildings to school boards. Many requests are received annually for such plans and specifications. Every school building should meet certain requirements concerning sanitary conditions, including heating and ventilation, lighting, seating, blackboard equipment, and conditions of out-buildings, and toilet apartments in school buildings.

Among the factors that have contributed to the improvement of the rural schools in Wisconsin, the report of the State Superintendent cites the following:

"Special state aid for rural schools of the first class which are those that have equipment as required by the State Superintendent. This equipment includes a system of heating and ventilation, blackboards, supplementary readers, etc. The law enacted in 1909 empowers inspectors of the department to condemn school houses. As a result of the statute over twenty-five school buildings have either been condemned or ordered repaired. In nearly all these instances, these buildings have been in wretched condition. They have not in any sense compared with the houses in the communities in which they were located. In one case a building was condemned that had served as a school house since 1848, although located in a wealthy farming community."

ABOLISH THE OFFICE OF SCHOOL TREASURER.

In many districts the election of school treasurer arouses more interest than the election of director, yet it is a useless office as far as administration of the schools are concerned. A very great deal depends upon the man elected director. It not infrequently occurs that the election of director hinges upon whom he will

support for treasurer or what bank he favors in order that some one or some bank may have the use of the school funds on deposit without interest. No such business methods are permitted concerning other public funds.

Why should \$5,000,000 of school funds be handled to the advantage of private interests and the district not draw a cent of interest? The amount paid school treasurers and the money that might be derived from placing the school funds at interest would furnish sufficient funds in a short time to properly equip a large percentage of the school buildings.

The funds would be safer in the hands of the county treasurers on account of the better methods of bookkeeping and the methods of making semi-annual settlements with those officers. Most of the counties in the state could handle the payment of school warrants directly through the county treasurers without any additional expense to the county.

SCHOOL FUNDS.

Our present laws relating to school funds are too complex. The law governing the levying of school funds in consolidated districts provides for only two classes of funds, that levied by the voters and known as the schoolhouse fund and that levied by school boards and known as the general fund. Why should not the same basis be applied to all districts? A great deal of confusion results from our present laws concerning school funds.

SAFEGUARDING SCHOOL ELECTIONS.

Too much indifference and negligence is manifested in methods of conducting school elections. Instances of fraudulent elections have been reported to the department. There appears to be no law governing voting at school elections. School elections should be as thoroughly safeguarded as are the general elections.

ENFORCEMENT OF THE COMPULSORY ATTENDANCE LAW.

The work of the rural schools is very seriously hampered by the irregularity of attendance. The present compulsory attendance law depends for its enforcement upon local officers within the school district, but it is the recommendation of the Better Iowa Schools Commission that the county superintendent be empowered

to enforce the compulsory attendance law. He should be authorized to file information and have the papers served by the county sheriff and the case prosecuted by the county attorney when necessary.

THE DEPARTMENT OF PUBLIC INSTRUCTION.

It should be possible for the Department to lead in educational matters, with special reference to the improvement of the elementary and secondary schools in the state. The most important school problems at the present time are connected with the rural schools. It has already been pointed out that the Department may increase its ability to render service to the schools of the state by being equipped with means by which to make and carry out plans for their betterment and to get in touch with the people and the schools through inspection.

The office of Superintendent of Public Instruction is limited in Iowa too much to hearing appeal cases, rendering opinions concerning disputes arising over trivial school matters, preparing reports, answering correspondence, and a great deal of merely clerical work.

The length of term of office of the Superintendent should be increased to four or six years and the salary should not be less than \$4,000. The deputy is required to render opinions concerning school laws that if paid in accordance with the usual charges for legal advice would entitle that officer to a salary of \$3,000 at least. Why should the Department of Education be the lowest remunerative office in the state, which is all the more emphasized by the fact that the salaries of all state officials are below the average in other states. The average salary paid the Superintendent of Public Instruction in all the states is \$3,347 per annum. Only two states pay a lower salary than Iowa, six pay the same, and all the rest above Iowa. Iowa is nearly at the foot of the column according to the findings of the Better Iowa Schools Commission. There are three things essential concerning the Department of Public Instruction:

Add to the dignity and efficiency of the office (1) by empowering the Department to carry on more vigorous constructive policies and give adequate office force to properly carry on the work; (2) by fixing salaries that will attract the best educational talent in the state and that will be commensurate with the responsibilities of a State Department of Education, and (3) by making the term

of office of sufficient length to enable the Superintendent of Public Instruction to carry to a consummation, plans that he shall have initiated for better schools.

THE COUNTY SUPERINTENDENCY.

What has been stated with reference to the State Department of Public Instruction will apply in principle with equal force to the office of County Superintendent. There is no more important office in the county than the office of County Superintendent. There is no office in the county so poorly paid nor one, where ably filled, rendering greater service to the county. No position immediately connected with the school offers such an opportunity to do things for the schools. The supervision of the rural schools is very inadequate and will continue to be so under present plans of supervision. Some states employ township supervisors of schools. Power of leadership is essential in one who aspires to this office. It has frequently been suggested that requirements as to qualifications for the office should be raised, that the compensation of the county superintendent should be equal, at least, to that of the best paid officer in the county, that a longer tenure of office than two years should be guaranteed for good service, and that county boards of education choose the county superintendent in the same manner as city boards select city superintendents.

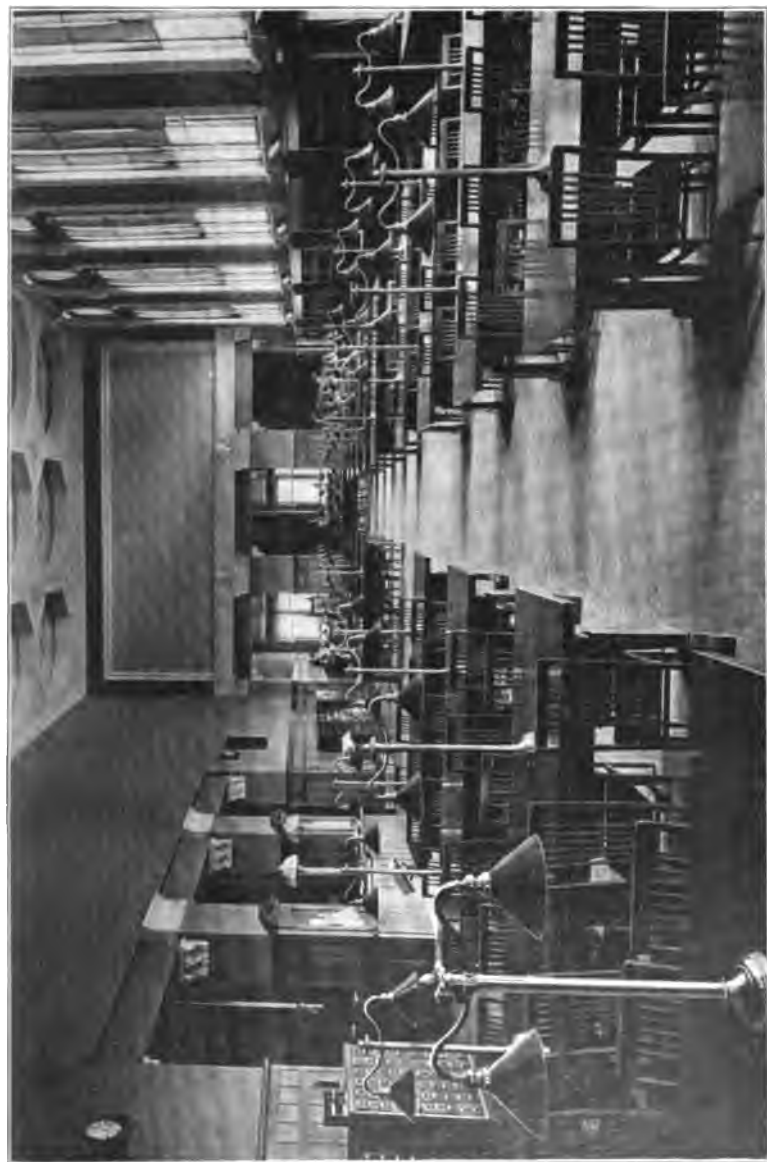

THE CITY SUPERINTENDENCY.

It seems almost ridiculous that city boards can legally contract with their superintendents of schools for only one year. This time should be increased to three years.

Quoting from the report of the Committee of the Better Iowa Schools Commission, on School Administration and Organization: "It is certainly a great handicap for a superintendent who is endeavoring to work out certain plans or reforms to feel that he will be up for re-election in nine months from the time he enters upon his duties. In Ohio, school boards are privileged to hire city superintendents for a term of one to five years."

TEACHERS' CERTIFICATES.

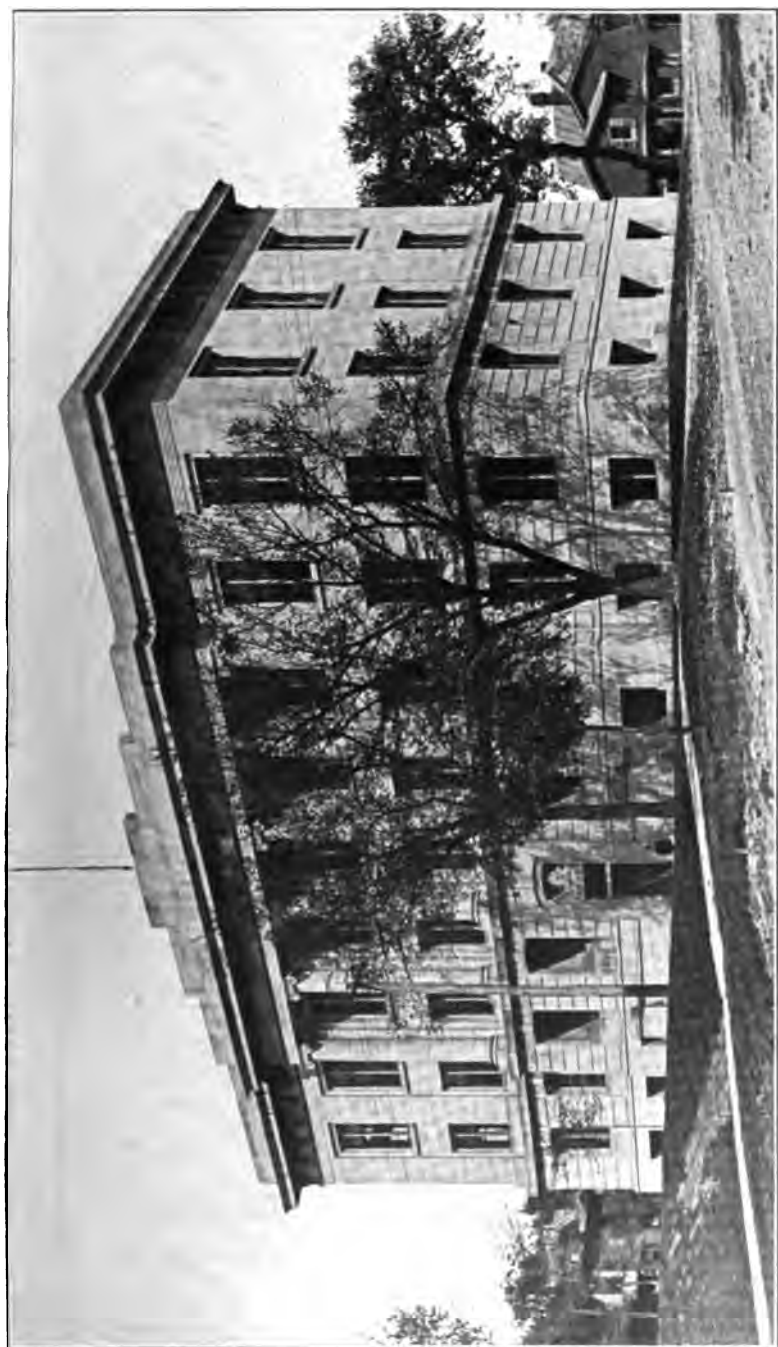

The statutes relative to teachers' certificates should be unified and simplified. The two series of special certificates, viz., special

EAST HIGH SCHOOL, DES MOINES IOWA

THE MILFORD CONSOLIDATED SCHOOL

The Milford consolidated school building is 65x100 feet. About 100 pupils are carried to and from school by six busses. The high school has been designated by the State Department of Education as one of the Normal Training High Schools. Home economics, manual training, and agriculture are included in the course of study. The school is well equipped for the teaching of the different industrial subjects. The high school teachers are either college or university graduates. Well prepared teachers are employed in the grades.

MARATHON CONSOLIDATED SCHOOL

The Marathon Consolidated School was built in 1908 at a cost of \$22,000. The building is 72x76x27, having the full two stories and a basement. The outside walls are of pressed brick with hollow brick inner walls and partitions, thereby making it as nearly fireproof as possible. It has a heavy rock foundation and its construction is of the best. The building contains ten school rooms, including the Domestic Science and Manual Training departments, and also has two recitation rooms, a library and superintendent's office. The basement contains a playroom, the fan heating and ventilating system, and dry closets. A regular four-year high school course is taught, and in addition the Normal Training, Domestic Science, Manual Training and the elements of Agriculture.

TWO-ROOM BUILDING, ROCK FALLS, IOWA, CERRO GORDO COUNTY

state certificates and special uniform county certificates, make needless complications. No special certificate should be issued to one who has not had very thorough preparation for teaching his special subject. To such person a special state certificate should be issued.

In general, the validity of a certificate should be limited to the grade of work for which the certificate shows the holder to have adequate preparation. Under our present statute, second and third grade uniform county certificates, which are issued upon an examination in common branches only, are valid for high school teaching.

A certificate would be a better safeguard against inadequate preparation if our uniform county certificates were made valid for common schools only, and special certificates and state certificates made valid for high school teaching.

A low standard for permanent certificates tends to fix a low standard for the teaching profession. It would be better for the good teachers and for the children of the state if the minimum standard for a teacher's permanent certificate were not less than the first grade uniform county certificate, with five years of teaching experience as required by our present statute.

The life validation of the second grade uniform county certificate which is based upon an examination in the common branches only, thus making the completion of the eighth grade the minimum standard of scholarship for a permanent teacher's certificate, is exceedingly detrimental to the best interests of teachers and schools. It was doubtless the intention of those who favored the statute to insure teachers of long experience against further examinations or requirements in pedagogical reading, but as a matter of fact, it has become a standard for young teachers. To many, the possession of a license valid for life, for teaching in any public school, no matter how meager the scholarship it represents, signifies the end of preparation.

Persons entering the teaching profession are not different in this respect from those entering other professions. If the examination for admission to the bar were based upon six months' study of law, many would enter the profession with just that much preparation. The same would be true of the profession of medicine. The one who trains the mind and molds the character of the child should have just as thorough preparation for his work as the one who attends to the ailments of his body.

Low standards not only handicap good teachers by placing them in competition with persons of inferior preparation, but they materially interfere with the efforts of the Educational Board of Examiners to establish reciprocal relations with other states.

The power given the Educational Board of Examiners by Section 2630-c of the Code, should be extended so that the Board would be empowered to grant certificates upon the basis of diplomas from first class colleges of other states, if the holders of such diplomas are persons of unquestioned success in the teaching profession.

REVISION AND SIMPLIFICATION OF THE SCHOOL LAWS.

Many sections of our school laws should be re-written and made to harmonize. In the attempts to amend the school laws and adapt them to changed conditions and new needs during the past 60 years, certain sections are not only very difficult of interpretation but are actually conflicting and contradictory. The School Laws should be so simple that school officers will have very little difficulty in understanding them.

NORMAL TRAINING IN HIGH SCHOOLS.

BY FRED L. MAHANNAH, INSPECTOR.

Between 75 and 80 per cent of the teachers employed in the rural schools of Iowa come directly from the high schools of the state without any additional preparation. These teachers, as students in the high school, pursued courses of study designed primarily to prepare for college entrance rather than for teaching a country school. No particular attention was given to the common branches that they are called upon to teach in the rural school. Very few high schools give any instruction whatever in psychology or the principles of teaching to those students who later expect to teach in the rural schools.

In the light of these facts and conditions, the High School Normal Training law, passed by the Thirty-fourth General Assembly is perhaps the most important effort the state has made in the way of providing facilities for the training of teachers for the rural schools. If the rural school is looking to the high schools for its supply of teachers—and at present it seems that it must of necessity do so—it is essential indeed that the high schools give more direct attention to those students who, on completing the high school course expect to become teachers in the rural schools.

The High School Normal Training law passed by the Thirty-fourth General Assembly authorizes the Superintendent of Public Instruction to designate certain high schools as Normal Training High Schools. These high

schools are to offer in the eleventh and twelfth grades teachers' courses in arithmetic, grammar, history, and reading, and also give instruction in home economics, agriculture, and pedagogy. Each high school designated by the Superintendent of Public Instruction that offers the above course and maintains a class, of at least ten, during each semester, is to receive annually from the state the amount of Five Hundred Dollars (\$500.00).

The high schools that were designated for the year 1911 and 1912 with the enrollment in each is as follows:

| County | Town | Enrollment | |
|---------------|-------------------------|--------------|--------------|
| | | 1st semester | 2nd semester |
| 1 Adair | Greenfield | 10 | 13 |

It would be unreasonable to expect results the first year that will be possible after the course is once firmly established and adjusted to the courses already maintained; but the schools designated as Normal Training High Schools have in a very large majority of cases succeeded even better than was expected for the first year. In most cases an extra room has been fitted up, in which a complete domestic science equipment has been installed at a cost, in most cases, much in excess of the aid received

from the state. The home economics, from the first has proven very popular with the pupils and patrons, and with but few exceptions, the work has been under a teacher specially trained in household arts and kindred subjects.

It has been very difficult, however, to get teachers of agriculture who have had training adequate to teach the subject as it ought to be taught, but this fact furnishes only additional evidence of the great need there is for training teachers of agriculture. It would be very unwise to postpone the teaching of agriculture until we can secure teachers properly trained in the subject; for the supply will not increase until there is an effective demand. Teachers will not prepare themselves for positions that do not exist.

The work offered in the teacher courses in the common branches and pedagogy, has done much to stimulate an interest in the common branches, as well as to furnish those who take them in the Normal course with more knowledge of the subject matter of those branches.

The opportunity given Normal Training students to do observation work in graded schools and rural schools has been two-fold in its effect. It has not only given the Normal Training students a better insight into questions of school management and methods of instruction, accompanied by greater interest in those important subjects, but it has also stimulated a healthy professional spirit among the regular teachers of the schools whose daily work is under observation by the Normal Training students.

The observation work in the primary grades, when under proper direction is particularly effective for two reasons. First, the teachers in those grades, especially the first, being as a rule well trained, the Normal Training students have thereby an opportunity to observe modern primary methods in the hands of skilled teachers. This opportunity is especially valuable on account of the fact that the rural schools are made up largely of pupils in the lower grades. Second, the teachers in the grades knowing that their work is to be observed, have an additional incentive to make it meet required standards.

In many of the Normal Training High Schools some valuable practice teaching is being done by the Normal Training students.

According to the provisions of the Normal Training Act, \$25,000, was available for the year 1911 and 1912, and \$50,000, for the year 1912 and 1913 and for each year thereafter. The \$50,000, available for the second year of the biennium, making it possible for the Department of Public Instruction to designate additional schools, the following were designated prior to September 1, 1912:

| County | Town | County | Town |
|-------------------|----------------|---------------------|-----------------|
| Adams ----- | Corning. | Monroe ----- | Albia. |
| Appanoose ----- | Moulton. | Muscatine ----- | West Liberty. |
| Benton ----- | Belle Plaine. | O'Brien ----- | Sheldon. |
| Buchanan ----- | Independence. | | Sutherland. |
| Cass ----- | Griswold. | Osceola ----- | Sibley. |
| Cerro Gordo ----- | Mason City. | Page ----- | Clarinda. |
| Crawford ----- | Denison. | Pocahontas ----- | Fonda. |
| Dallas ----- | Dallas Center. | | Rolfe. |
| Dickinson ----- | Millford. | Pottawattamie ----- | Avoca. |
| Emmet ----- | Estherville. | | Oakland. |
| Fayette ----- | Oelwein. | Poweshiek ----- | Montezuma. |
| Floyd ----- | Rockford. | Ringgold ----- | Mount Ayr. |
| Grundy ----- | Grundy Center. | Jac ----- | Odebolt. |
| Hamilton ----- | Webster City. | Shelby ----- | Harian. |
| Hancock ----- | Britt. | Story ----- | Ames. |
| | Garner. | Tama ----- | Traer. |
| Hardin ----- | Eldora. | Taylor ----- | Bedford. |
| Howard ----- | Cresco. | Van Buren ----- | Farmington. |
| Humboldt ----- | Humboldt. | Wapello ----- | Ottumwa. |
| Johnson ----- | Iowa City. | Warren ----- | Indianola. |
| Jones ----- | Monticello. | Washington ----- | Washington. |
| Lee ----- | Ft. Madison. | Winnebago ----- | Buffalo Center. |
| Lucas ----- | Chariton. | Wright ----- | Eagle Grove. |
| Mahaska ----- | Oskaloosa. | Central Univ. | Pella. |

The enrollment in the Normal Training High Schools for the year 1912-1913, as reported by the superintendent for the first semester of the school year shows a material increase over the enrollment of last year. The enrollment, as reported for the first semester of the school year 1912-1913, is as follows:

| County | Town | Enrollment 1st Se- mester |
|-------------------|---------------------|---------------------------------|
| Adair ----- | Greenfield ----- | 12 |
| Adams ----- | Corning ----- | 12 |
| Allamakee ----- | Waukon ----- | 24 |
| Appanoose ----- | Moulton ----- | 16 |
| Audubon ----- | Audubon ----- | 16 |
| Benton ----- | Belle Plaine ----- | 16 |
| Boone ----- | Boone ----- | 14 |
| Bremer ----- | Waverly ----- | 15 |
| Buchanan ----- | Independence ----- | 13 |
| Buena Vista ----- | Marathon ----- | 10 |
| Calhoun ----- | Lake City ----- | 17 |
| Carroll ----- | Carroll ----- | 12 |
| Cass ----- | Atlantic ----- | 20 |
| Cass ----- | Griswold ----- | 12 |
| Cerro Gordo ----- | Mason City ----- | 21 |
| Cherokee ----- | Cherokee ----- | 33 |
| Chickasaw ----- | New Hampton ----- | 16 |
| Clarke ----- | Osceola ----- | 27 |
| Clay ----- | Spencer ----- | 22 |
| Clayton ----- | Elkader ----- | 24 |
| Clinton ----- | Clinton ----- | 36 |
| Crawford ----- | Denison ----- | 22 |
| Dallas ----- | Dallas Center ----- | 14 |
| Decatur ----- | Garden Grove ----- | 16 |

FINANCIAL STATEMENT.

JULY 4, 1911, TO JUNE 30, 1912.

| | |
|--|--------------|
| Total amount of aid to schools..... | \$ 25,000.00 |
| Salary of Inspector..... | 2,000.00 |
| Traveling expenses of Inspector..... | 617.40 |
| Amount of appropriation unused and turned back to the General State Fund..... | 2,382.60 |

Total\$ 25,000.00

NOTE—The failure of a few high schools designated to meet the requirements accounts for the unused portion of the appropriation.

**ENDORSEMENTS OF THE NORMAL TRAINING COURSE BY CITY
SUPERINTENDENTS.**

The following statements from the Superintendents of city schools where the Normal Course was installed during the first year, serve to show the attitude of these school superintendents towards the High School Normal Training Course.

The Normal Training Course gives students broader view of their work. Observation work in both rural and graded schools, and practice teaching brings pupils into more sympathetic relation with work of teaching. Two years of work with a definite aim in view leads to more systematic work. I am heartily in sympathy with the normal training idea.

E. C. MEREDITH,
Superintendent of Schools, Boone, Iowa.

We hold the course to be a help to our entire high school work. Our pupils consider the normal course as difficult a course as we have. Their ideas of the responsibility of the teacher have been greatly increased; we have never had a senior class enter upon their last year's work with so much seriousness as the class of this year, ten of the nineteen being normal students.

FRANK E. GREEN,
Superintendent of Schools, Malvern, Iowa.

Although I have always been a believer in Normal Training High School, the work of the past year has more than met my highest expectations. It has been demonstrated that the student of high school age may be developed into a strong, purposeful, and well informed teacher.

CHAS. F. PYE,
Superintendent of Schools, Waukon, Iowa.

The more adequate training of teachers for the rural schools justifies the existence of the Normal Training Department. The presence in the high school of a considerable body of students, working with definite aim to prepare themselves for a life of public service, has a stimulating influence on the whole school.

M. A. REED,
Superintendent of Schools, Woodbine, Iowa.

The students taking the normal training course have a sympathy with the problems of discipline, and feel such a responsibility in the work for which they are preparing, that they materially improve the discipline of the high school by their example.

W. M. SNYDER,
Superintendent of Schools, What Cheer, Iowa.

The High School Normal, while not ideal, is the best solution yet offered for the rural school problem. It affords high school pupils enrolled in the normal course some conception of the work they will be engaged in while teaching, and stimulates them to a keener interest in the professional career which will soon be felt in every rural district.

ADAM PICKETT,
Superintendent of Schools, Creston, Iowa.

The Normal Training Course in the high school is bringing about definite preparation for teaching on the part of high school pupils during the last two years of the course. It develops professional spirit among those planning to be teachers, and the room visitation required of the students and their criticisms tend to make our city teachers stronger in their work. There are great possibilities for good in this course and the people are realizing these more fully this year than they did last.

H. P. SMITH,
Superintendent of Schools, Newton, Iowa.

The introduction of normal training into the Northwood High School has added to its prestige in the community and increased the interest of its patrons in its work. It has increased the attendance, especially from rural districts. It has awakened a desire for proficiency in the certificate branches, notably in home economics. It has induced better work among teachers and pupils of all departments. It is beginning to cause the people to realize that even rural teachers should have some preparation for their work.

H. A. DWELLE,
Superintendent of Schools, Northwood, Iowa.

Aside from the benefit to the individual student in preparing him to teach there comes a value to the individual as a student, and a reflex action on the school as a whole. In this course the student approaches the common branches from the philosophic side, and this attitude of mind will be with him in all his studies. The study of elementary psychology and pedagogy is very valuable in this connection, and the subject is a valuable one for any student in his senior year. This maturity of thought engendered in this course reflects the same in the other courses. This is not theoretical, but I have seen it work out in the high school. This indirect result is wholesome.

F. A. WELSH,
Superintendent of Schools, Hampton, Iowa.

We believe the twelve of fifteen girls who have gone out this year to teach in the country schools from our high school have done so with a great deal better preparation than former pupils. They have discovered something of what the work of a teacher is before taking up the work and learning everything by their own personal experience. These young ladies have now spent nearly a year in getting ready for the beginning of school and this preparation will certainly tell. It has been of very great value to both our grade and high school teachers. When teachers must present subjects to their pupils so that students may learn pedagogy from their presentation, they are inspired to put forth their very best efforts to see that there is real value in every recitation to the class.

J. R. INMAN,
Superintendent of Schools, Manchester, Iowa.

We have had the Normal Course in the Marshalltown high school one year and we find it a valuable acquisition to our high school work. I have

observed that the school itself has been benefited by giving more purpose and dignity to the general school efforts, and the pupils have found the training helpful for their work as teachers.

First. They were able to pass the state examinations better than students who did not take the Normal Course.

Second. They were well informed by study and practice how to proceed when they took up their work in the rural schools.

Third. They had more interest and definite purpose in their teaching.

The High School Normal Course in my opinion is the best move for giving better teachers to the rural schools that has been made by the state. Until state Normal schools are well established throughout the state so that they meet all the needs of the city schools and the rural schools, the high school Normal course is the best thing to maintain.

A. PALMER,

Superintendent of Schools, Marshalltown, Iowa.

The valuable elements in the normal course as observed in the Emmetsburg High School are as follows:

First. It effects the entire student body of the high school in that it causes the pupil to choose a fixed purpose early in his course and shape his work toward its accomplishment.

Second. The study of pedagogy reveals to these prospective teachers in a systematic way what he must otherwise learn through blind groping and serious blundering. Also by the development of the necessary elements in the study of psychology, a splendid opportunity is given the pupil to study and to know his real self.

Third. The greatest benefit, however, which I believe to be derived from this course is the breaking away from the time honored custom of so-called "Preparation for College," and the infusion into our courses of study, those subjects which are going to meet the greatest need of that large proportion of our young people who never go to college, yet who perform the great burden of the world's work.

Again, in the observation work, I note the following stimulating effects:

1st. Teachers are lead to make more careful daily preparation and to present the work more systematically in that they know they are being critically observed.

2d. Pupils catch the same spirit and strive to make the best possible showing.

3d. The student gains a definite idea of the method of the procedure by observing from a professional viewpoint, the actual work of a skillful and experienced teacher.

J. R. McCOMBS,

Superintendent of Schools, Emmetsburg, Iowa.

Too long has the notion prevailed that any one can be a teacher. The better teachers are prepared for their work the less will that idea be accepted. The Normal High Schools give some needed training to those desiring to teach, thereby establishing some professional spirit.

The review of common branches intensifies the interest of the pupil in them. Many subjects that were so difficult when taken in the eighth grade are so interesting when studied in the high school. Such common branches have taken on new life. These ideas will also be reflected in the selection of studies by other pupils.

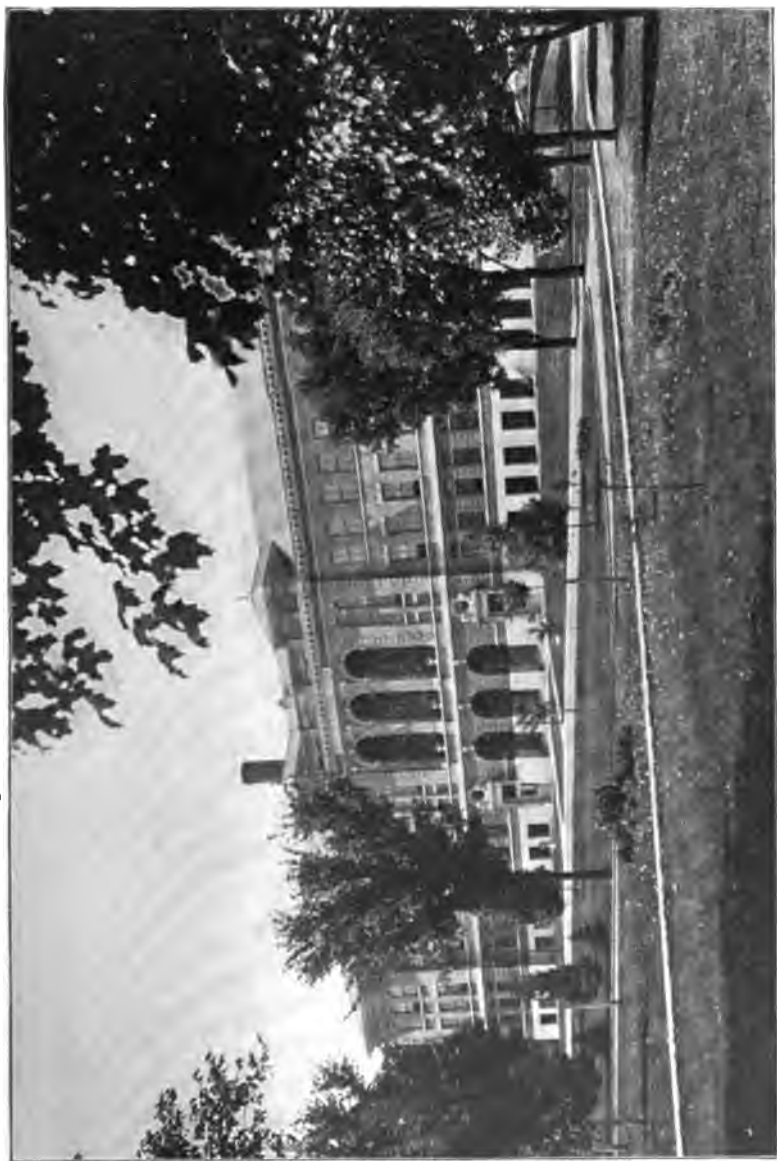

W. H. GEMMILL,

Superintendent of Schools, Carroll, Iowa.

Our teachers go out into the work with a firmer belief in themselves, a deeper sense of the responsibility of their position, a desire to do good to the children and the community, with higher ideals of great things to be accomplished in the rural school. When to this has been added a working knowledge of domestic science and agriculture, they are in touch with some of the real things of education in the rural school. They are getting a deeper insight into the needs of the school and community. They are reading literature along these lines, and when they get into a school they are better able to adjust themselves to their rural environment, and are doing so.

ROBERT RIENOW,

Superintendent of Schools, Elkader, Iowa.

AUDITORIUM BUILDING, IOWA STATE TEACHERS' COLLEGE, CEDAR FALLS, IOWA

AGRICULTURAL BUILDING, IOWA STATE COLLEGE, AMES, IOWA.

LIBRARY AND MUSEUM, IOWA STATE TEACHERS' COLLEGE, CEDAR FALLS IOWA

THE UNIVERSITY HOSPITAL, S. U. I., IOWA CITY, IOWA

The hospital with its extensive new wings has about 225 beds and last year accommodated 2,500 patients.

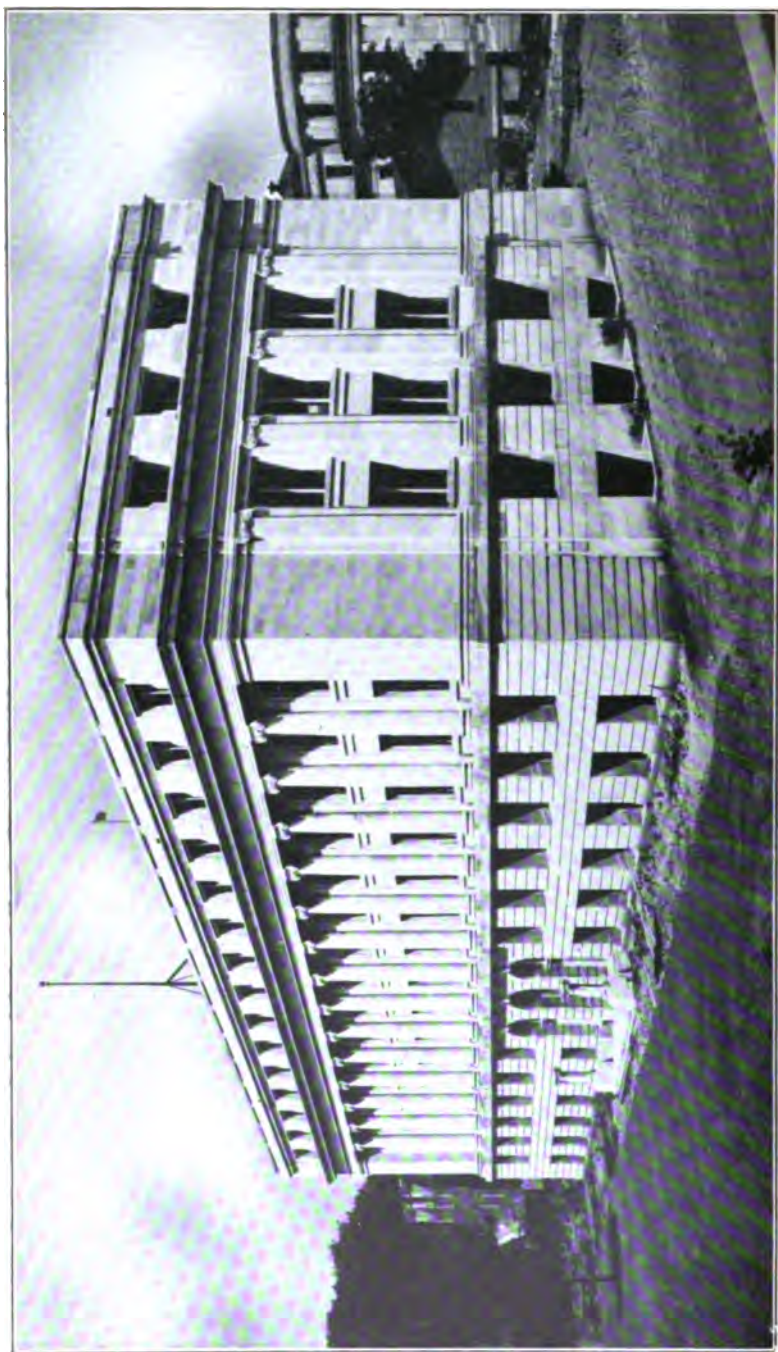

BUFFALO CENTER CONSOLIDATED SCHOOLS

The building is strictly modern, being equipped with a fan ventilating system, automatic sewerage disposal, sanitary drinking fountains, a lunch room for the accommodation of pupils from the country, and a steam heating plant.

The grade and class rooms are well lighted, heated, and ventilated. The assembly room has a seating capacity of 120 with five connecting class rooms on the second floor. In the basement is a place for manual training; also a dining room, a sewing room and a kitchen for girls.

The Buffalo Center High School has recently been designated as a Normal Training High School. In its curriculum is found two years of manual training, one year of cooking, one year of sewing, and one year of agriculture.

OFFICIAL CALL.

To the County Superintendents:

You are hereby called to a meeting of County Superintendents, April 25, 26, 1911. Your expenses will be paid under the provisions of Section 2742.

A. M. DEYOE,
Superintendent of Public Instruction.

Suggested List of Topics for Discussion

1. Recent School Legislation.
2. The future Normal Institute.
3. The paramount duty of the County Superintendent.
4. Transient Teachers.
5. Should the High School be a Finishing School?
6. Revision of the Hand-book.
7. Definite ways of conducting an Educational Campaign in the township, county, and state for better schools.
8. Elementary Agriculture and Home Economics.
9. Methods of conducting Eighth Year Rural School Examination and Graduation Exercises.
10. Enforcing the Compulsory Attendance Law.
11. What specific matters should form a basis for Advancement of our Public School System?
 - (a) Legislative.
 - (b) Administrative.
12. Organized effort among the County Superintendents.
13. Certificate Regulations.
14. Medical Inspection in the Public Schools.
15. Reading in the Rural Schools.
16. Sanitary conditions of School Buildings; Heat, Light, Ventilation, and Cleanliness.
17. Is it desirable to have a separate school for the older boys and girls who can attend school only three or four months during the year?
18. Professional Reading and Professional Spirit.
19. School Exhibits.
20. The Rural School Library.
21. Township High Schools.
22. Teachers' Salaries and Tenure of Contract.

OFFICIAL CALL.

To the County Superintendents:

You are hereby called to a meeting of the County Superintendents at Ames, June 8, 9, and 10, 1911. Your expenses will be paid under the provisions of Section 2742, School Laws of Iowa.

A. M. DEYOE,
Superintendent of Public Instruction.

Dear Superintendents:

As you doubtless are aware, the County Superintendents at their last session, April 26th, voted to hold the next convention at Ames, June 8, 9, 10. In harmony with the wish thus expressed and in accordance with the law, Section 2742, I hereby call the next convention of County Superintendents to meet at Ames, June 8, 9, 10, 1911, to consider questions of educational policy of great importance to the interest of the state.

The convention will meet at 2 o'clock, Thursday, June 8, in the assembly room of the Hall of Agriculture, where all the sessions of the convention will be held.

The principal theme of the convention will be the improvement of the rural schools with special emphasis upon the new movement for an education more fully adapted to the needs of the times.

The plan of the program will be to devote each session or half session to a definite topic, and to consider under those topics the things that can and should be done in Iowa now, and the best ways and means of doing them.

The rural teachers course in the accredited high school, the teaching of elementary agriculture and home economics in the rural schools, boys and girls clubs, manual training for the country, competitive exhibits and similar topics will be given consideration.

I am authorized to extend to you on behalf of the Iowa State College of Agriculture and Mechanic Arts, an invitation to be present at the formal commencement exercises which take place on the campus at 10:00 A. M., Thursday, June 8th. The address will be by Dr. Newell Dwight Hillis. You will receive invitations from the college giving more complete information.

I have asked Prof. A. V. Storm, Dean of the Summer School, to write you more fully about the arrangement while at Ames.

I sincerely hope you will be present at this convention.

A. M. DEYOE,
Superintendent Public Instruction.

May 23, 1911.

HALL OF AGRICULTURE.

THURSDAY, JUNE 8TH.

State Superintendent A. M. Deyoe, presiding.

Centralized Rural High Schools—Kate Logan, Carolyn Forgrave, J. A. Woodruff, Jennie S. Huegle.

General Discussion.

THURSDAY EVENING, EIGHT O'CLOCK.

1. Organizations—Clubs, Granges, Scouts, Associations, etc.

Among Boys and Girls—E. C. Bishop, Jessie Field, George E. Masters.

Among Adults—P. G. Holden, H. T. McVicker, H. E. LaRue, Mary E. Hostetler.

2. The County Superintendent's Opportunity for Leadership.

L. Antrim, Della Simons, Mary Casey, A. J. Oblinger, A. B. Alderman.

General Discussion.

FRIDAY, EIGHT-THIRTY A. M.

Frank D. Joseph presiding.

The Redirected Rural School.

The "What" and "How" of its Work in

(a) Household Economics, Neale S. Knowles.

(b) Manual Training, J. R. Bailey.

(c) Agriculture, A. V. Storm.

(d) Correlation of these with other work, M. L. Howell.

General Discussion.

FRIDAY, ONE-THIRTY P. M.

Fred Mahannah, presiding.

The Teachers' Course in the High School. What shall it offer in:

(a) Home Economics, Neale S. Knowles.

(b) Manual Training, J. R. Bailey.

(c) Agriculture, A. V. Storm.

(d) Methods, W. H. Bender.

(e) From the Standpoint of the City High School, E. C. Meredith, L. H. Maus.

General Discussion.

REPORT OF THE

SATURDAY, EIGHT A. M.

How the County Superintendent and the College can be Mutually helpful.
C. F. Curtis, Clara L. Cowgill, Ira J. Scott.

Some things worth doing in the interests of better rural schools.

George E. Farrell, O. E. Gunderson, F. E. Fuller, W. P. Jensen,
Mary E. Faint, Harry B. Smith, Lillie Patton, T. B. Morris, and
others. General discussion.

OFFICIAL CALL.

To the County Superintendents:

You are hereby called officially to a meeting of County Superintendents to be held at Des Moines, Thursday, Friday and Saturday, November 9, 10 and 11, 1911. Under provision of Section 2742, your expenses will be defrayed.

ALBERT M. DEYOE,

October 16, 1911.

Superintendent Public Instruction.

WEDNESDAY MORNING, APRIL 17.

1. Short Address, President Seerley.
2. The units of organization and school administration in Iowa. What changes should be made? Superintendents Farrell, Simons and Parrott.
3. How best secure a thorough revision of the School Laws? Superintendents Miller and Oblinger.
(Superintendents are requested to designate some defects and inconsistencies in the School Laws and suggest amendment or revision.)
4. How secure professional study and stimulate professional spirit among teachers? Superintendents Harlow, Rider and Young.
5. The annual Report. Superintendents Morris and La Rue.

WEDNESDAY AFTERNOON, APRIL 17.

"The County Life School"—what should it be?

1. The course of study. What? How much? Superintendents Logan and Woodruff.
2. The school—a community center.
 - a. Education for the general public.
 - b. Public social gatherings.
 - c. A medium for out-of-door recreation and sports. Superintendents Masters and Cowgill.
3. School building and equipment. Superintendents Brown and Alderman.
4. Grounds. How large? How utilized? Superintendents Forgrave and Antrim.
5. The financial problem.
 - a. Buildings and grounds. How obtained?
 - b. Current expenses. Superintendents Hunt and McGee.

General Discussion.

WEDNESDAY EVENING.

Six o'clock dinner given by the Faculty of the Iowa State Teachers College.

THURSDAY MORNING, APRIL 18.

1. The Tuition Law:

- a. Relation to the education of the country boy and girl.
- b. How and when should the average cost of tuition be determined?
- c. Should high schools be inspected and classified under the tuition law? How?
- d. Is legislation governing eighth year examinations essential? Superintendents Jensen and Iverson.

2. Factors in the training of teachers for the rural schools:

- a. The High Schools.
- b. Normal Schools and Colleges.
- c. The Normal Institute.
- d. Should the completion of a stipulated course be required of all applicants for uniform county certificates?

3. The provisional certificate, a menace to the teaching profession—under what circumstances should it be issued and how long valid?

THURSDAY AFTERNOON, APRIL 18.

1. Weak places in the grades. Prof. Bender. .
2. To what extent should contests be given a place in education?
3. The County Superintendency.
 - a. Professional.
 - b. Supervision.
 - c. Judicial.
 - d. Executive.
 - e. Business duties of the office.

Note—Leaders have been appointed to open the discussion on some topics, following which a lively general discussion is desirable.

**REPORT OF THE
OFFICIAL CALL.**

To the County Superintendents:

You are hereby called to a meeting of the County Superintendents at Des Moines, Iowa, November 6, 7, 8 and 9. Your reasonable expenses to and from this meeting and while in attendance thereon will be defrayed by your county, under Section 2742 of the Code.

The meeting will convene promptly, and your attention is directed to the special and general programs which have been prepared for this occasion.

A. M. DEYOE,
Superintendent of Public Instruction.

October 24, 1912.

CIRCULAR LETTERS.

CIRCULAR NO. 1—1911.

To the County Superintendents:

GREETING.

With the opening of the new year, you as county superintendents assume, many of you for the first time, duties second in importance to none in the gift of the people. To the energetic conscientious person, the office of county superintendent is no sinecure. On the contrary your energies will be severely taxed. I extend to you my most cordial greetings and I hope that I may be able to help to hold up your hands in your several fields of labor and to this end, I trust you will keep me fully advised of your plans and aspirations and that you will not hesitate to communicate with me freely concerning your work.

It shall be my purpose to aid you wherever I can and for that purpose I shall communicate with you frequently concerning the educational interests of our state. At the present time I wish to call your attention to the following topics:

SCHOOL VISITATION.

School supervision is your most important work. All else should be secondary to it. An encouraging word here, a suggestion there and the inspiration of your presence everywhere is your great opportunity. Section 2734-b makes it mandatory for you to visit the schools of your county. It also provides that you shall give personal instruction, but this is not construed to mean that you shall take the school out of the hands of the teacher unless you so desire, but you have full authority to do so.

ANNUAL ELECTIONS.

You should at this time provide yourself with a supply of blanks for the use of your school officers in calling and conducting the annual meeting of the subdistricts and the annual meetings of the corporations.

Subdistrict Meetings.—Each director of a subdistrict should be provided with three blanks similar to form number 11, page 158 of the School Laws. It is the duty of the director of each subdistrict to post three notices not less than five days prior to the meeting, which occurs on the *First Monday* in March. See sections 2751, 2752 and 2753 for the law governing the subdistrict meeting.

Corporation, Annual Meeting of.—The secretary of the school board in each school corporation gives the notices for the annual meeting of the electors. To enable the secretaries of school townships, rural independent districts and independent village and town districts and city districts that do not have registration (having a population of less than 5,000) to give proper notice, you should furnish each one with five blanks for "Notice of Annual Meeting," similar to form 8, page 157 of the School Laws. Since these notices must be posted ten days they should be in the hands of the secretaries at least two weeks before the *Second Monday* in March, the day for the annual meeting.

In school corporations having 5,000 or more inhabitants, the secretaries should be furnished with at least one blank notice for each voting precinct, which should be placed in his hands at least two weeks prior to the *Second Monday* in March. See section 2755.

Propositions.—If propositions are to be submitted to the electors at the annual meeting, they must appear in the notices for the annual meeting. In order that they may appear in the notices, it is necessary that the board, while in session, direct the secretary to give notice that they will be submitted. The board may do this of its own accord, but if petitioned as provided in the last paragraph of section 2749, it is mandatory on the board to give notice, but the petition provided therein must be filed in time to enable it to meet to direct the secretary to give the notice. The law governing the annual meeting of the corporation is found in sections 2746, 2747, 2748, 2749, 2754, 2755, 2756, 2812-d, 2831 and 2836.

JANUARY EXAMINATION.

On Wednesday, Thursday and Friday, January 25th, 26th and 27th, will occur the first regular examinations for county certificates this year. In this connection, I desire to direct your attention to the most important rules governing these examinations. The rules cited below are of particular importance and I believe will answer nearly all of the questions likely to arise.

RULES.

1. Age for admission to examination. Rule 6.
2. Program of examination. Rule 10.
3. Divided examination. Rule 18.
4. Subjects to be written in the first attempt to obtain a certificate. Rule 22.
5. Subjects required in a second examination within a year. Rule 23.
Note: This rule applies whether the first examination was written under rule 22, rule 43 or rule 44.
6. What to do in a third examination. Rule 24.
Note: Notice that this rule refers the applicant to rules 22 and 44 and should also refer to rule 43 to determine what subjects should be taken in the third examination.
7. Passing from a non-renewable second grade to a renewable certificate—first trial. Rule 43.
8. Passing from a second grade to a first grade certificate—first trial. Rule 44.
9. Standings required for any grade of certificates. Rule 27.

REGULATIONS DISTRIBUTED.

I am sending you under separate cover the remainder of the last edition of the Regulations Governing the Issuing of Uniform County Certificates. Please distribute them sparingly because it will be impossible to send you more and you should have a few on hand at the time of the examination.

Very truly yours,

A. M. DEYOE,

January 10, 1911.

Superintendent of Public Instruction.

To the County Superintendents:

On the 27th day of March, the legislature officially adopted the "Song of Iowa," by S. H. M. Byers, as the State Song. It has for years been in the hearts of Iowa people and has been sung by thousands in the schools adn wherever Iowa people come together. Because the sentiment of the song incites our youth to patriotism, it is asked that the superintendents and teachers of the state in every county shall encourage the boys and girls to commit the song to memory and to sing it on every appropriate occasion, and especially on the coming "Arbor Day."

To aid in this direction, a lover of the schools will at once furnish to superintendents free 25,000 to 50,000 copies of the words and music to be divided among the teachers. You will receive a package with this, and you are requested to send the same to the teachers of your county, together with the request that they be used in their schools as suggested here.

The music is simple, yet powerful. It was a German student song two hundred years ago; in the Civil war it was used to the Confederate song, "My Maryland."

Very truly yours,

A. M. DEYOE,

April 15, 1911.

Superintendent of Public Instruction.

CIRCULAR NO. 5—1911.

RECENT SCHOOL LEGISLATION.

EXTRACTS FROM THE SCHOOL LAWS AS AMENDED BY THE
THIRTY-FOURTH GENERAL ASSEMBLY.

*Published by the Superintendent of Public Instruction, under Authority
of the Executive Council.*

The Iowa Code provides that the Superintendent of Public Instruction shall, every four years, if deemed necessary, cause to be printed and distributed, to school officers of the state, copies of the Iowa school laws. This is the year for publishing these laws, but they will not reach the school officers for several months.

The Thirty-fourth General Assembly enacted some excellent school laws which are creating a great deal of interest. As a result, the Department of Education has exhausted its copies of these bills. In order to meet the demands, the Executive Council ordered printed copies of all laws affecting the public schools. There will no doubt be many calls for these pamphlets, and in order that the demand may be met, the Department asks all School Officers, County and City Superintendents, to help preserve the copies, that all who are interested may know the changes made.

A. M. DEYOE,

April 19, 1911.

Superintendent Public Instruction.

SENATE FILE NO. 101.

AN ACT to repeal sections twenty-six hundred and thirty-four-b (2634-b), twenty-six hundred and thirty-four-c (2634-c), and twenty-six hundred and thirty-four-d (2634-d), Supplement to the Code, 1907, and to enact substitutes therefor, relating to the training of teachers for rural schools and making appropriations therefor.

Be it Enacted by the General Assembly of the State of Iowa:

Section 1. Section twenty-six hundred and thirty-four-b (2634-b), twenty-six hundred and thirty-four-c (2634-c), and twenty-six hundred and thirty-four-d (2634-d), of the Supplement to the Code of 1907, are hereby repealed and the following enacted in lieu thereof:

Sec. 2. For the purpose of increasing the facilities for training teachers for the rural schools, by requiring a review of such common branches as may be deemed essential by the Superintendent of Public Instruction and for instruction in elementary pedagogy and the art of teaching elementary agriculture and home economics, provision is hereby made for normal courses of study and training in the eleventh and twelfth grades in such accredited four year high schools as the Superintendent of Public Instruction may designate, provided that such high schools shall be selected and distributed with regard to their usefulness in supplying trained teachers for the rural schools of all portions of the state and with regard to the number of teachers required for the rural schools in each portion of the state. It is further provided that where a county high school or a township high school can meet the requirements of the Superintendent of Public Instruction, it shall be given preference over a city high school.

Sec. 3. Private and denominational schools are eligible to the provisions of this act, except as to receive state aid.

Sec. 4. Each high school approved under the provisions of this act shall receive state aid to the amount of five hundred dollars (\$500.00) per annum, payable in two equal installments at the close of each semester as hereinafter provided. The superintendent of each approved training school shall at the close of each semester file such report with the Superintendent of Public Instruction as said officer may require. Upon receipt of a satisfactory report the Superintendent of Public Instruction shall issue a requisition upon the Auditor of State for the amount due the school corporation of said high school for said semester, whereupon the Auditor of State shall draw a warrant on the State Treasury payable to said school corporation for the amount of said requisition and forward the same to the secretary of said school corporation.

It is further provided that in case more than one high school in any county shall be approved under the provisions of this act, that the total state aid distributed in such county shall not exceed Eight Hundred Dollars (\$800.00) to be divided equally among said high schools.

No high school shall be approved as entitled to state aid unless a class of ten (10) or more shall have been organized, maintained and instructed during the preceding semester in accordance with the provisions of this act and the regulations of the Superintendent of Public Instruction.

Sec. 5. The appropriation provided by this act for instruction of pupils in high schools in the science and practice of rural school teaching and the teaching of elementary agriculture and home economics, may be expended in part for inspection and supervision of such instruction by the Superintendent of Public Instruction and by such person as he may designate, and the expense of such inspection and supervision shall be paid out of said appropriation on vouchers certified by the Superintendent of Public Instruction. In accordance with the foregoing provisions of this section, the Superintendent of Public Instruction is authorized to appoint an inspector of normal training in high schools and private and denominational schools at a salary of not to exceed Two Thousand Dollars (\$2,000.00) per year and necessary traveling expenses while in the discharge of his duties.

Sec. 6. The Superintendent of Public Instruction shall prescribe the conditions of admission to the normal training classes, the course of instruction, the rules and regulations under which such instruction shall be given and the requirements for graduation subject to the provisions of this act.

Sec. 7. On the first Friday in February and the Wednesday and Thursday immediately preceding and on the second Friday in May and the Wednesday and Thursday immediately preceding, each year, in each high school approved under this act, an examination for graduation from the normal training course shall be conducted under such rules as the State

Board of Examiners shall prescribe, but the county superintendent of the county in which an approved high school may be located shall be designated as the conductor of said examination.

Each applicant for a certificate of graduation shall pay a fee of one dollar (\$1.00), one-half of which shall be paid into the State Treasury on or before the first day of the succeeding month, and one-half of which shall be paid into the county institute of the county wherein the examination is held.

Sec. 8. A certificate of graduation from the normal training course provided for in this act shall be issued by the Superintendent of Public Instruction and shall be a valid license to teach in any public school in the state for a term of two years, subject to registration as provided for other teachers' certificates. After thirty-six weeks of successful teaching experience, which shall be certified by the county superintendent of the county under whose supervision the applicant may have taught, any person holding a normal training certificate issued under the provisions of this act shall receive a uniform county certificate of such grade as the requirements governing the issuance of uniform county certificates would entitle said person to receive.

Sec. 9. For the purpose of carrying out the provisions of this act, there is hereby appropriated out of any moneys in the State Treasury not otherwise appropriated the sum of Twenty-Five Thousand Dollars (\$25,000), available for the period ending July 1, 1912, and the sum of Fifty Thousand Dollars (\$50,000) annually thereafter.

Approved April 11, 1911.

TUITION.

SUBSTITUTE HOUSE FILE NO. 28.

AN ACT to provide for the payment of tuition of pupils residing in school corporations which do not offer instruction equivalent to four-year high schools of Iowa.

Be it Enacted by the General Assembly of the State of Iowa:

Section 1. Any person of school age, who is a resident of a school corporation not offering a four-year high school course and who has completed the course of study offered in such school corporation shall be permitted to attend any high school that will receive him, provided the average cost of tuition allowed shall not exceed the average cost of tuition in the nearest high school, under the conditions and provisions of Section two (2) of this Act.

Sec. 2. Any person applying for admission to any high school under the provisions of this act shall present to the officials of said high school a certificate from the president or secretary of the school corporation in which he resides stating that the said applicant is of school age and that he is a resident of said school corporation, which certificate shall be issued on application therefor. He shall also present a certificate signed by the County Superintendent showing proficiency in the com-

mon school branches, reading, orthography, arithmetic, physiology, grammar, civics, geography, United States history, penmanship and music; provided, however, that such person may be admitted to any grade in such high school upon his passing a satisfactory examination before the officers thereof, or under their direction.

Sec. 3. The school corporation in which such student resides shall pay to the treasurer of the school corporation in which such student shall be permitted to enter, a tuition fee equal to the average cost of tuition and the average proportion of contingent expenses in the high school department in the latter corporation during the time he so attend, not exceeding, however, a total period of four (4) school years. Such payment to be made out of the teachers fund and contingent fund of the debtor corporation.

Sec. 4. If payment is refused or neglected the board of the creditor corporation shall file with the auditor of the county of the pupil's residence a statement certified by its president specifying the amount due for tuition and for contingent expenses respectively, and the time for which the same is claimed; and the auditor shall transmit to the county treasurer an order directing such treasurer to transfer the amount of such account from the debtor corporation to the creditor corporation, and the treasurer shall pay the same out in accordance therewith.

Approved March 10, A. D. 1911.

BOUNDARY LINES OF SCHOOL CORPORATIONS.

Sec. 2713. *Boundary lines changed.* The boundary lines of contiguous school corporations may be changed by the concurrent action of the respective boards of directors at their regular meetings in July, or at special meetings thereafter called for that purpose. The corporation from which territory is detached shall after the change contain not less than four government sections of land, and its boundary lines must conform to the lines of congressional divisions of land. In the same manner the boundary lines of contiguous school corporations may be so changed that one corporation shall be included in and consolidated with the other as a single corporation. [34 G. A. Senate File No. 25; 31 G. A., ch. 136, § 10; 22 G. A., ch. 62, § 1.]

TEACHERS' CERTIFICATES.

Sec. 2630-c. *Validation authorized.* The state educational board of examiners is hereby empowered to validate certificates issued by state departments of education in other states, where such certificates were issued upon evidence of scholarship and experience equivalent to that required by like certificates under the laws of this state. Such validated certificate shall authorize the holder to teach in any public school in the state for five years after date of such validation. [34 G. A., Sub. S. F. 77, § 1; 32 G. A., ch. 149.]

Two-Year State Certificate Renewal. That Section Twenty-six Hundred Thirty-four-d (2634-d) of the Supplement to the Code, 1907, be and the same is hereby amended by striking out of line four (4) thereof the words "under such words as the board may prescribe," and by substituting therefor the words, "provided the applicant shall show by testimonials from superintendents or principals who had immediate supervision of their professional study that at least one line of professional inquiry has been successfully conducted during the life of the certificate, it being the duty of the board to forward with each certificate subject to renewal, outlines setting forth various lines of professional study. The application shall also be accompanied by proof of successful teaching for at least thirty-six weeks during the term of the certificate.

NOTE—The above is Section 2 of Senate File No. 77. This bill was approved by the Governor April 10, 1911. On the following day, April 11, 1911, the Governor approved Senate File No. 101 which repeals Section 2634-d which this section seeks to amend. The act repealing, following the one amending, render this section null and void.

Sec. 2634-h. Renewal. All certificates referred to in Section Twenty-six Hundred Twenty-nine (2629), Twenty-six Hundred Thirty-b (2630-b), Twenty-six Hundred Thirty-c (2630-c), Twenty-six Hundred Thirty-four-d (2634-d), Twenty-six Hundred Thirty-four-f (2634-f), and Twenty-six Hundred Thirty-four-g (2634-g), of the Supplement to the Code, 1907, shall be renewed for life by the State Board of Educational Examiners upon the payment of a fee of Five Dollars (\$5.00) and proof of at least five years successful teaching, three of which shall have been during the time the said certificate (with renewals) has been in force. [34 G. A., Sub. S. F. 77, § 3; 32 G. A., ch. 148, § 3.]

Sec. 2734-e. Special certificates. A special certificate may be issued for any subject or any group of subjects taught in the public schools of Iowa upon examination in such special subject or group of subjects and per cents therein such as are required for the issue of a first grade county certificate. A special certificate shall be issued for a term of three years and shall be renewable under the same conditions as apply to the renewal of first grade certificates. It shall state the names of the subjects for which it is issued, and shall not be valid for the teaching of any other subjects. [34 G. A., Sub. S. F. 77, § 4; 31 G. A., ch. 122, § 5.]

Sec. 2734-g. First grade certificates—renewal. Applicants who have taught successfully for at least thirty-six weeks, and whose examination entitles them to the first grade certificate, shall receive the same for a term of three years from the date thereof, and such certificate shall be renewable without examination, provided the applicants shall show by testimonials from superintendents or principals who have had immediate supervision of their professional study that at least one line of professional inquiry has been successfully conducted during the life of the certificate, it being made the duty of the board to forward with each certificate subject to renewal, outlines setting forth various lines of professional study. It is

provided further that each application for renewal shall be accompanied by such proof of successful experience and professional spirit as the educational board of examiners may require. [34 G. A., Sub. S. F. No. 77, § 5; 33 G. A., ch. 181, § 1; 31 G. A., ch. 122, § 7.]

Sec. 2734-h. Second grade certificates—renewal. Applicants whose examination entitles them to second grade certificates only, shall receive the same for not to exceed two years with the privilege of renewal of the same without further examination under the same conditions as govern the renewal of first grade certificates. The holder of a second grade certificate may at any of the examinations provided for in Section Twenty-seven Hundred Thirty-four-c (2734-c) of the Supplement to the Code, 1907, take an examination in any one or more of the additional branches, required for the issue of a first grade certificate, or he may at any such time be re-examined in any branch or branches in which he desires to raise his grade, and in each case the new per cent shall be placed on his certificate, and when he has thus successfully passed in all the branches required for the issue of a first grade certificate, such certificate shall then be issued to him, provided he has had at least thirty-six weeks' successful experience in teaching, if not, then at the conclusion of such experience. In like manner third grade certificates may be changed into those of the second or first grade, and in all cases whether the certificate be of the first, second or third grade, credit shall be given for all examinations taken under the auspices of the board, it being the intention of the law that an examination once taken shall be final unless the certificate holder desires to be re-examined in any one or more branches with a view of raising his per cent in such branches or his general average. [34 G. A., Sub. S. F. No. 77, § 6; 33 G. A., ch. 181, § 2; 31 G. A., ch. 122, § 8.]

County certificates validated for life. All certificates referred to in Sections Twenty-seven Hundred Thirty-four-d (2734-d) and Twenty-seven Hundred Thirty-four-e (2734-e) of the Supplement to the Code, 1907, in Section Twenty-seven Hundred Thirty-four-g (2734-g) of the Supplement to the Code, 1907, as amended by Chapter One Hundred Eighty-one (181) of the Acts of the Thirty-third General Assembly and by Section Five (5) of this Act, and in Section Six (6) of this Act, shall be renewed for life by the state board of educational examiners upon compliance by the holder with the following conditions:

1. The applicant shall show by testimonials from county or city superintendents or from the principals having immediate supervision of his school work and from a member of the local school board that he has had at least five years continuous successful teaching experience (which may have been before or after the passage of this act) at least three of which shall have been immediately prior to the time validation is sought and under the grade of certificate for which such validation is desired.

2. The standing of such applicant in the several branches shown upon his certificate shall average not less than eighty-five per cent. and in no branch shall the per cent. be less than eighty per cent., provided that in case the standing is less than the per cent. required, either average or

special, the holder of the certificate may, at any of the times provided in Section Twenty-seven Hundred Thirty-four-c (2734-c) of the Supplement to the Code, 1907, take an examination in any branch or branches he may desire and the per cent. then received shall be entered upon his certificate.

3. The applicant shall furnish proof of professional study during the entire five year period such as is made necessary in the case of term renewals of certificates.

Upon the issue of a life certificate as herein contemplated, the applicant shall pay a fee of Five Dollars (\$5.00) to be turned into the state treasury. [34 G. A., Sub. S. F. No. 77, § 7.]

Sec. 2734-i. *Third grade certificates.* Applicants whose examination entitles them to a third grade certificate only, shall receive the same for one year, at the end of which time upon proof of successful teaching and the payment of a fee of One Dollar (\$1.00), one renewal shall be granted. [34 G. A., Sub. S. F. 77, § 8; 31 G. A., ch. 122, § 9.]

Sec. 2734-k. *County certificates—renewal—conditions.* That Section Twenty-seven Hundred Thirty-four-k (2734-k) of the Supplement to the Code, 1907, is hereby repealed. [34 G. A., Sub. S. F. 77, § 9; 31 G. A., ch. 122, § 11.]

Life certificates lapse. All life certificates provided for in this act shall lapse provided the holder shall not teach during a period of five successive years. [34 G. A., Sub. S. F. 77, § 10.]

ABOLISHMENT OF ENROLLMENT FEE IN COUNTY NORMAL INSTITUTES AND THE SUBSTITUTION OF A FEE IN LIEU THEREOF.

Sec. 2738. *Normal Institute.* The county superintendent shall hold, annually, a normal institute for the instruction of teachers and those who may desire to teach, and, with the concurrence of the superintendent of public instruction, procure such assistance as may be necessary to conduct the same, at such time as the schools in the county are generally closed. To defray the expenses of said institute, he shall require the payment of a registration fee of one dollar from each person desiring to secure a certificate, or teach in his county for the ensuing year, and the payment in all cases of one dollar from every applicant for a certificate: provided that, if the applicant is granted a two years' certificate, he shall pay one dollar additional. He shall monthly, and at the close of each institute, transmit to the county treasurer all moneys so received, including the state appropriation for institutes, to be designated the "institute fund," together with a report of the name of each person so contributing, and the amount. The board of supervisors may appropriate out of the general fund such additional sum as it may find necessary for the further support of such institute. All disbursements of the institute fund shall be by warrants drawn by the county auditor, who shall draw said warrants upon the written order of the county superintendent, and said written order must be accompanied by an itemized bill for services rendered or

to exceed two miles, to connect with any vehicle of transportation to and from school; or may, in the discretion of the board, contract with an adjoining school corporation for the instruction of any child living an unreasonable distance from school, and they shall allow a reasonable amount of compensation for the transportation of children to and from the point where they are taken over, or discharged from the vehicle used to convey them to and from school, or for transporting to an adjoining district. In determining what an unreasonable distance would be, consideration shall be given to the number and age of the children, the condition of the roads, and the number of miles to be traveled in going to and from school. The board shall have the right on account of inclemency of the weather to suspend transportation on any route upon any day, or days, when in the judgment of the said board it would be a hardship on the children, or when the roads to be traveled are unfit or impassable.

(d) The school board of any consolidated independent school corporation shall contract with as many suitable persons as they deem necessary for the transportation of children of school age to and from school, such contract to be in writing and shall state the number of the route, the length of time contracted for, the compensation to be allowed per week of five school days, or per month of four school weeks, and may provide that two weeks' salary shall be retained by the board pending full compliance therewith by the party contracted with, and shall always provide that any party or parties to said contract and every person in charge of vehicles conveying children to and from school, shall be at all times subject to any rules or regulation said board shall adopt for the protection of the children, or to govern the conduct of the person in charge of said conveyance.

(e) It shall be the duty of the school board of any consolidated independent district to provide a suitable school building within such district, and shall at any regular meeting or at a special meeting called for that purpose submit the question of levying a tax for the building of any school building suitable for the needs of the district, or for the repairing of any school building where the cost of such repairs exceeds the sum of two thousand (\$2,000) dollars to the qualified voters of said district, and all moneys received from such source to be placed in the school house fund of said corporation and to be used for such purposes only. In locating said building they shall take into consideration the geographical position, number and convenience of the scholars, and may submit the question of location to the voters of the district at any regular meeting or special meeting called for that purpose; providing, that whenever a city, town or village containing a school population of twenty-five (25), or more, is included within any consolidated independent district, then said building shall be located within the incorporated limits of said city, town or village, on such a site as the school board may determine.

(f) Whenever a petition signed by one-third (1-3) of the electors in a consolidated independent school corporation asking that said district be dissolved, and describing the boundaries of the district, or districts,

proposed to be organized out of the territory then included in such consolidated independent school corporation and having the approval of the county superintendent, if one county, and the superintendent of each, if more than one county, and by the State Superintendent of Public Instruction, if the county superintendents do not agree, and filed with the board of said consolidated independent district, it shall be the duty of said board within ten (10) days to call an election for which they shall give the same notices as are required in Section Two Thousand Seven Hundred Fortx-six (2746) of the Code and Two Thousand Seven Hundred Fifty (2750) of the Supplement to the Code, 1907, at which election all voters residing within the district shall be allowed to vote by ballot for or against such dissolution. If a majority of all votes cast at said election be in favor of dissolving the consolidated district, same shall be dissolved and the organization of a new district or districts be forthwith completed by the election of a board of directors as provided by statute; provided, however, that such dissolution shall become effective only when the re-organization of the territory included in the original consolidated district is completed. The assets and liabilities of any such school corporation thus dissolved shall be equitably divided as provided in Section Two Thousand Eight Hundred Two (2802) of the Supplement to the Code, 1907.

(g) Any person driving, managing or in charge of any vehicle used in transporting children to and from school, in any consolidated independent school corporation, who shall be found guilty of violating any of the rules and regulations adopted by the board of said school, for the guidance of any person in charge of such conveyance, shall be guilty of a misdemeanor, and for the first offense shall be fined not less than five dollars (\$5.00) or more than ten dollars (\$10.00), and for a subsequent offense shall be fined not less than twenty-five dollars (\$25.00) or more than fifty dollars (\$50.00), and shall be dismissed from the service.

(h) This act, being deemed of immediate importance, shall take effect and be in force from and after the date of its publication in the Register and Leader and Des Moines Capital, newspapers published in the city of Des Moines, Iowa.

Approved March 25, 1911.

In effect by publication March 28, 1911.

LIMIT OF INDEBTEDNESS OF INDEPENDENT SCHOOL DISTRICTS.

Substitute for House File No. 11.

AN ACT to amend Sections One (1), and Two (2), of Chapter One Hundred and Eighty-four (184), Acts of the Thirty-third General Assembly, relative to the limit of indebtedness of independent school districts.

Be it Enacted by the General Assembly of the State of Iowa:

Section 1. Section One (1), Chapter One Hundred and Eighty-four (184) of the Acts of the Thirty-third General Assembly is hereby so amended as to read as follows, to-wit:

"Any independent district containing, or contained in, any city, town or village, or any consolidated independent district shall be allowed to become indebted, for the purpose of building and furnishing a school house or houses and procuring a site therefor, to an amount not to exceed in the aggregate, including all other indebtedness, four per centum of the actual value of the taxable property within such independent school district, such value to be ascertained by the last county tax list previous to the incurring of such indebtedness, anything contained in Section One Thousand Three Hundred and Six-b (1306-b) of the Supplement to the Code, 1907, to the contrary notwithstanding."

Sec. 2. Section Two (2) of Chapter One Hundred and Eighty-four (184) of the Acts of the Thirty-third General Assembly is hereby so amended as to read as follows, to-wit:

"Provided, that before such indebtedness can be contracted in excess of one and one-quarter per centum of the actual value of the taxable property ascertained as provided in this act, a petition signed by a number equal to twenty-five (25 per cent) per cent of those voting at the last school election, shall be filed with the president of the board of directors, asking that an election shall be called, stating the purpose for which the money is to be used, and that the necessary school house or houses cannot be built and furnished within the limits of one and one-quarter per centum of the valuation."

Sec. 3. This act being deemed of immediate importance shall be in full force and effect on and after its publication in the Des Moines Capital and the Register and Leader, newspapers published at Des Moines, Iowa.

Approved March 21, 1911.

In effect by publication March 22, 1911.

REAL ESTATE ACQUIRED BY A SCHOOL CORPORATION.

AN ACT to amend Section Twenty-eight Hundred and Sixteen (2816) of the Code, relative to the title and disposition of real estate acquired by a school corporation.

Be it Enacted by the General Assembly of the State of Iowa:

Section 1. Section Twenty-eight Hundred and Sixteen (2816) of the Code is hereby repealed and the following enacted in lieu thereof:

In any school district wholly outside any city or incorporated town. In the case of non-user for school purposes for two years continuously of any real estate acquired for a school house site it shall revert, with improvements thereon, to the owner of the tract from which it was taken, upon repayment of the purchase price without interest, together with the value of the improvements, to be determined by arbitration, and upon such payment the school corporation shall make formal conveyance to such owner. During its use the owner of the right of reversion shall have no interest in or control over the premises. [34 G. A., H. F. 177; C., '73. § 1828.]

Approved April 17, 1911.

ANNUAL MEETING OF SCHOOL BOARDS.

CIRCULAR NO. 6—1911.

To the School Officers of Iowa:

The people have chosen you to represent them in one of the most important departments of Iowa's affairs—the Department of Public Schools. Its importance can not be estimated because no one can place a value on the lives of boys and girls. We trust you fully realize how important the office is to your community, also how necessary it is to keep your school apace with the times. It is said, "No community will rise higher than the sentiment of that locality," but this sentiment may be changed easily by some one vigorous person who has the courage of his convictions and who has seen a new light. Directors are busy men, but as such, will readily see the necessity of business acumen in handling school affairs promptly and in a business-like manner. Directors should take the lead in directing educational affairs in a higher channel.

If there is a place where you can serve your district best, it is in applying business sagacity to the plan of operating the schools. In my judgment, the supreme question is not "What will the people say?" it is "What is best to be done?" It is not "How many mills must be levied?" but "How can our schools get the greatest value for the money we expend?" If these questions are properly answered, it will not be a question of what we pay our teachers, but what they are worth to our boys and girls. How much working material shall we have in our schools for the use of teachers and pupils? Shall we have neat, clean, well heated and ventilated school houses, with suitable seats for little boys and girls, six hours per day during eight months each year? To my mind, these are important items and are worthy of your most conscientious consideration.

ESSENTIAL APPARATUS.

I desire to call your attention to the matter of school supplies. One of the weak points in our rural school is the *lack* of suitable apparatus. Should not each school be equipped with working material? Your farms and shops are. It hardly pays now days to cut grass with a scythe, grain with a cradle or thresh with a flail. Nor does the farmer expect his hired man to furnish tools with which to work. If he did, the cheapest and poorest would often be used. Can we then expect to operate our schools successfully without suitable apparatus?

WORKING MATERIAL.

Each school should be equipped with a new International Dictionary, also several small school dictionaries, a suitable set of maps, a globe, erasers, chalk, covered water jar, broom and dust pan, slate blackboard, and supplementary reader for the first three grades at least and *all* if possible.

SEATING.

The seating of schools is important. Too many are improperly equipped. The seats are too large or placed wrong. The old double seats of years

ago are still in use. Single seats are better and should be placed so that a light will come over the left shoulder. It is extremely dangerous to health to permit little children to use seats so large that their feet can not touch the floor.

HEATING AND VENTILATING.

I am especially interested in the heating and ventilating of school rooms, and urge you to purchase some successful plant for heating and ventilating your school buildings. There are several which can be approved. It is not too much to say that more evil results come from improper heating and unsanitary ventilation than from any one cause. To prove the inefficiency of the common stove method one should visit his school on a cold day. The evidence will be conclusive. Children can not do efficient work in foul air, nor should they sit in drafts. To have the heat equally distributed by ordinary stoves is impossible. By small additional expense, up-to-date heating plants can be put in which will remove all the objections named above. Any system similar to the following named heating plants will do successful work: the Moore Heating System, Bonaparte, Iowa; the Smith Heating System, Minneapolis, Minnesota, and the Waterman-Waterbury System, Minneapolis, Minnesota.

CARE OF GROUNDS.

School grounds, as a rule, receive too little attention. True, the teacher and pupils do much toward beautifying the premises. But the school officers' assistance is sadly needed in many places. The school house needs to be kept up; a little paint used occasionally, suitable trees and shrubbery set out by some grown-up person; also cement steps and walks made to the gate in front of the building. All these by design, not hit or miss, as the case may be. Am I asking too much that you, as directors, give these things some attention? Remember our boys and girls spend nearly a hundred and fifty days each year in these places, and should have the best we can procure for them.

NEW LEGISLATION.

The Thirty-fourth General Assembly passed some splendid school laws last winter. One of these gives all children in rural districts the privilege of attending any high school that will receive them, and their home district will pay the tuition, provided the child has completed the course of study in the rural schools. This will enable all pupils to attain at least a four years' high school education. Pupils completing the course, will present a certificate from the county superintendent of his home county, which the president or secretary shall sign. This certificate will admit the holder to the high school receiving him.

NEW EDITION OF SCHOOL LAWS.

New school laws will be published this year, and will reach the officers some time this fall.

HIGHER SCHOOL IN TOWNSHIPS.

Many townships are now adding a one-room addition to the center school in the township where higher branches are taught the boys and girls. The young people drive, hence sheds are erected on the grounds for their use. The plan is popular, and marked with unusual success. It solves the problem of educating large boys and girls who have outgrown the rural school, and who can not afford to attend, or are too far away from advanced schools; yet it offers some higher training in townships where consolidated schools have not been established. The plan is inexpensive, and will keep your boys and girls at home two years longer, as well as giving them two years of practical education.

The Department of Education recommends that this or a similar course be followed wherever public sentiment will permit, and sincerely hopes that rural school directors will give careful consideration to the movement, and aid in developing a sentiment in favor of such schools.

REPORTS AND OTHER BUSINESS.

Census. Each year the school census is taken. In sub-districts, the director takes it between June 1st and 15th. Sub-directors should not wait until July 1st to hand the report to the secretary, but should send it as soon as completed. Failure to report means a lowering of your state apportionment. In rural and city independent districts, the secretary takes the enumeration, unless the board makes other provisions.

SETTLEMENT WITH TREASURER.

POINTS TO BE OBSERVED. In making the settlement with the treasurer the following points should be observed:

1. *Balances.* You should observe that the balances at the beginning of the year just closed are the same as those on hand when you settled with the treasurer last year.

2. *Orders on County Treasurer.* Observe that the school treasurer has charged himself with all orders on the county treasurer turned over to him.

3. *Miscellaneous Receipts—Tuition.* Observe that he has charged himself with all other receipts paid to the corporation, including tuition.

4. *Paid Teachers.* Note that the amount paid teachers, male and female, is correctly reported.

5. *Miscellaneous Disbursements.* See that the other expenditures, including the amount paid for library books, are correctly reported. Make the item "Paid for other purposes" in each fund as small as possible by specifying all of the other disbursements under the proper title.

6. *School Building Bond Fund.* All money collected to pay on school building bonds should be charged to the school building bond fund and not to the school house fund. Also all amounts paid on school building bonds should be credited to the school building bond fund and not to the school house fund.

7. *Indebtedness.* Please observe that the total indebtedness on June 30, 1911, is correctly reported to the county superintendent on the blank furnished the treasurer through that officer.

8. *Inventory.* Make an inventory of the school houses and apparatus and see that the same is correctly reported to the county superintendent by the secretary.

9. *Agreement of Reports.* The records of the secretary and those of the treasurer should agree as to each fund, the amounts received from each source and the amounts expended for each purpose. We desire also that you note particularly that the reports of these officers agree with respect to library books and tuition.

10. *Adjournment.* In school townships and rural independent districts the retiring boards should meet and transact the business before them sufficiently early to enable them to adjourn in time for the new board to organize and transact the business that may come before it. *The new board must organize on July 1st.*

NEW BOARD.

Organization of New Boards. The retiring board of each rural independent district and school township having completed its labors and adjourned, the directors-elect for these corporations will organize for the year just beginning. The organization is affected by the election of a president from among the members, and a secretary and treasurer from outside of the board. (Section 2757.) The boards of independent city, town and village corporations having organized in March, will not elect a president at this time, but will elect a secretary for each of such corporations. In independent village corporations, the board will elect a treasurer also. (Section 2757.) Treasurers for cities and towns are chosen by the electors in March. (Section 2754.)

The most important duty. The most important duty devolving upon the new boards after their organization is to plan for the schools of their respective corporations for the ensuing year. This involves the determining of the number of schools that shall be maintained, the length of the school year, and the election of teachers.

It is my earnest desire to improve the public schools of Iowa, and that all may lend their energies to this end. If Iowa is to reach and maintain the standard which our sturdy forefathers intended we should attain in the education of our youth, all the school forces must be alert and willing workers for the accomplishment of this end.

Sincerely,

A. M. DEYOE,

Superintendent Public Instruction.

June 1, 1911.

FRANK D. JOSEPH, Deputy.

To the County Superintendents:

Several inquiries have been received concerning Section 2, House File 28, which provides how a pupil residing in a district not offering a four-

year high school course may be admitted to any high school outside the district of his residence and his home district, be compelled to pay his tuition; such tuition being paid by the district not to exceed the cost in the nearest high school.

After consulting with the department of the Attorney General, the following opinion is rendered in answer to such inquiries:

First—The pupil must have a certificate of age and residence signed by the president or the secretary of his home corporation.

Second—The pupil must present a certificate of proficiency signed by the county superintendent, covering the following branches—reading, orthography, arithmetic, physiology, grammar, civics, geography, United States history, penmanship and music; provided, however, he may be admitted to any grade in such high school, including the ninth, by passing a satisfactory examination before the school authorities of the high school where he may desire to attend. The pupil must present a certificate signed by the county superintendent, or pass a satisfactory examination before the school authorities where he may desire to attend high school. A statement or certificate of proficiency in the branches enumerated above is implied as necessary in order to be entitled to enter the ninth grade in either case. Pupils having completed a part of the high school course prior to the taking effect of this act may have met the conditions required for admission to grades above the ninth grade.

Of course it is understood that any district offering a two-year high school course, or a three-year high school course, would be compelled to pay the tuition for the remaining number of years only in order to make a total of four years. We are inclined to the opinion that a pretense, in fact, of maintaining a four-year high school in order to avoid the payment of tuition of pupils in another district would not be upheld by the court as constituting a four-year high school. Nevertheless, in the absence of any law fixing any definite standards of what shall constitute a high school of any class, considerable latitude would be recognized in making courses of study.

It would be very unwise for any pupil to seek to gain admittance to any high school before fully prepared to do so. City or town superintendents may do children a grave injustice in an effort to secure tuition pupils by making the examination any less rigid than the eighth grade examination given by the county superintendent. It would also appear to the disadvantage of any pupil to attend a high school that offers only, in fact, a so-called "high school course." Some districts may be well prepared to carry on a two-year high school course, or even a three-year high school course, but not a four-year high school course. The attempt to do more years of work than the equipment or teaching force would warrant would undoubtedly mean inferior work done by the school. A pupil may, under such circumstances, attend a high school offering a so-called "four-year high school course" when, in fact, the work done is equivalent to only two or three years in a good high school. It would be to the advantage of any high school to attempt only as many years of high school work as it can

creditably do. The quality of the work done so far as conducted should correspond, or be equivalent, to the standard for the same number of years in a good high school.

It should be remembered that the home district may pay for no more than four years of tuition for any one person.

The tuition law is one of the real meritorious acts of school legislation in Iowa. The law may be popularized by fair and favorable administrations by all concerned.

Yours very truly,

A. M. DEYOE,
Superintendent Public Instruction.

June 20, 1911.

EIGHTH GRADE EXAMINATIONS.

CIRCULAR NO. 1—1912.

January 13, 1912.

To the County Superintendents:

REGULATIONS GOVERNING EIGHTH GRADE EXAMINATIONS.

I. *Time and Number of Examinations.*—Two final examinations for rural school graduation will be held during the year 1911-12. The first will be held Tuesday and Wednesday, February 20th and 21st, respectively. The second will be held Thursday and Friday, May 9th and 10th. It is recommended that pupils, even though they have been successful in the February examination, remain in school till the close of the year.

II. *Subjects Required.*—(a) Major subjects: Arithmetic, Grammar, History, Geography, Physiology.

(b) Minor subjects: Reading, Spelling, Writing, Music, Civics.

Note 1—Minor subjects are so specified because of difficulty in testing a pupil's ability satisfactorily by examination in these branches.

Note 2—County Superintendent may add to above list such subjects as may be especially desired in each county.

III. *Eligibility.—February Examination.*—To be eligible to enter these examinations a pupil must (a) have been enrolled in school for at least six weeks preceding the date of the examination; (b) must have been during that time regularly classified in the Eighth Grade; (c) and the teacher must, twenty days prior to the examination, report the names of all applicants to the County Superintendent, certifying to their eligibility and recommending them for admission to the examination.

Note—Pupils of Eighth Grades in city or parochial schools may be admitted to these examinations by arrangement between the County Superintendent and the superintendent or principal in charge.

IV. *Eligibility.—May Examination.*—New applicants, entering the May examination, will be governed by the same rules of eligibility as for February tests. Pupils failing in not more than three (3) *major subjects* in the February test, may receive credit in the May test for all grades of 75 per cent or above. Grades below 75 per cent shall not be credited in the second trial.

Pupils failing in more than three (3) major subjects must write in all subjects in the second trial.

V. *Preparation of Questions.*—The State Superintendent shall appoint a committee of three (3) County Superintendents at the annual Spring Conference to prepare lists of questions for the following school year, these lists to be printed under the direction of the State Superintendent and distributed as required to the counties of the state as requested by the County Superintendents.

VI. *Plan of Conducting Examinations.*—We recommend that wherever feasible, the examinations be held at central points, in charge of special conductors appointed by the County Superintendent. If such plan is not feasible, the County superintendent shall use his best judgment in adopting a plan such as will insure fairness and justice to all applicants.

VII. *Graded Papers.*—All papers must be graded under the immediate supervision of the County Superintendent, and all final markings must be passed upon by the County Superintendent. It is recommended that so far as possible, one person shall grade all papers, thus giving uniformity in markings. County Superintendents should inspect grades very closely.

VIII. *Supplying Questions to Conductors.*—Enough lists to supply each applicant with one set of questions shall be sent by the County Superintendent to the conductors in charge in time for the examinations. The questions required for each half day shall be inclosed in separate sealed envelopes which may not be opened until the beginning of the half-day session specified.

IX. *Program.*—The following program shall be followed:

A. M. Thursday: Reading, Grammar.

P. M. Thursday: History, Spelling, Physiology.

A. M. Friday: Arithmetic, Special Subjects.

P. M. Friday: Geography, Music.

Note 1—Afternoon subjects may not be taken up in forenoon. Each half day's work must be kept a unit.

Note 2—Answer papers shall be collected by the conductors in charge immediately upon conclusion of the work and shall in no case be returned to pupils for correction.

X. *Penmanship and Reading Grades.*—Conductors shall grade applicants in Oral Reading on scale of 100 per cent, this grade to be averaged with grade in Written Reading marked on same basis.

Grade in penmanship shall be judged from general appearance of all papers written by candidate, all such papers to be written with pen and ink.

XI. *Supplementary Rules.*—Whenever these rules may seem insufficient to meet special conditions, the County Superintendent may supplement them with such additional regulations, not inconsistent with the foregoing, as seem desirable.

XII. Any applicant securing an average of 75 per cent with no grade below 70 per cent shall be entitled to receive a diploma or certificate of graduation from the county superintendent of the county in which such applicant took the examination.

Since rural school graduates are now admitted to high schools on the basis of diplomas received as a result of these examinations, it is very necessary that no injustice be done applicants. It is also important that no candidate be passed who has not completed his texts in subjects required by law. It would be better if each pupil were required to review these subjects thoroughly after completing the adopted text.

XIII. The Free Tuition Law has attached a new and greater importance to the examination for rural school graduation. County Superintendents should impress upon teachers and pupils the importance of careful, complete and painstaking preparation before entering upon this test. We believe the teacher should be called upon to certify that each pupil has completed the course of study, and, in her opinion, is ready for high school work. The County Superintendent should also keep a permanent record of all candidates, similar to a certificate record. The records should be carefully kept in such manner as may be suitable for ready reference.

The certificates of graduation should be made to mean something, and students should be taught to recognize their value and importance. They should also be recognized as evidence of efficiency in the common branches, by those schools admitting holders of said certificates to high schools.

March 14, 1912.

To the County Superintendents:

The Department of Public Instruction had planned to publish a Special Day Book for the interests of Arbor and Bird Day, also for general improvement of school buildings and grounds. Owing to our inability to secure such materials as we deem necessary, and the limited amount of funds, the plan has been abandoned for this year, and no special book will be sent out. While the inspiration of such booklets will be absent, we trust the County Superintendents will call special attention to Arbor Day and make it a time for cleaning up and beautifying the school premises.

We wish also to call the attention of the County Superintendents and the teaching force of Iowa to the reports regarding seed corn. Thousands of dollars may be lost unless some one tests each ear of corn that is to be planted. The department recommends that the schools of Iowa take an active interest in seed corn testing, and, if possible, avert much heavy loss. We believe County Superintendents may very properly enlist the interest of the schools in this matter.

Respectfully yours,

A. M. DEYOE,

Superintendent Public Instruction.

April 1, 1912.

To Iowa County Superintendents:

So many incomplete and inaccurate statements are made in applications for the life validation of certificates that much time is lost and much needless correspondence is required before a final decision can be reached.

If county superintendents will see to it that no application is forwarded to this office until all papers required are on file, and that all blanks are properly filled with every item and date called for, but little time will be required of us to complete the case and issue the validated certificate. To facilitate this work, please note the following points with especial care:

Form I. The application should show that continuous teaching has been done for at least six months in each of the five school years *next preceding the date of application*. It is no longer sufficient to close the five year period with June 30, 1911, nor can you yet report to June 30, 1912.

So, also, of books studied, each year should be designated, and the names of books be given for each year to date of application.

Form II. See that the applicant's report of books studied conforms to your report, as placed upon this sheet.

Form III. See, also, that your statement of months taught during each year is in agreement with that of the applicant, and reconcile all differences.

Form IV. The director's statements are most likely to contain omissions and general, rather than specific, statements, without proper dates for each year or period of service. Please insist upon accurate reports.

All statements should be made out on the proper forms.

No certificate can be validated for life which *lacks a grade in any subject* required for that grade of certificate, nor upon which appears any grade lower than eighty per cent or an average grade lower than eighty-five per cent.

A careful observance of these details will be mutually advantageous, and your efforts to facilitate the work of life validation will be greatly appreciated.

Very sincerely yours,

A. M. DEYOE,

President Educational Board of Examiners.

ANNUAL MEETING OF SCHOOL BOARD, JULY 1, 1912.

CIRCULAR NO. 5—1912.

June 1, 1912.

To the School Officers of Iowa:

In last year's Annual Circular to school officers, the Department of Public Instruction directed attention to plans and methods tending to promote the best school conditions and arouse general school interest, such as suitable apparatus, proper seating, approved heating and ventilation systems, care of grounds, etc. Many of the school boards have an abiding interest in these things, but the schools need the co-operation of every one. While we have reports of aroused sentiment in favor of better school conditions, as yet this sentiment has not crystallized sufficiently in many localities. We wish to again urge the importance of proper working conditions for our boys and girls, and especially those in rural communities.

REPORT OF THE

A BUSINESS BASIS.

If our schools are to assume their full responsibility they must be run on a business basis. This does not mean that we should expend less, but that in many cases we should get more for what we expend. We should be sure that each dollar spent brings a dollar's worth of good in return. It is always wise to give the schools the same chance for growth that a business man would give his personal affairs.

THE TEACHER PROBLEM.

The teacher problem is one that directors must help to solve. The law confers upon them the right to select teachers. It is not enough that a teacher should be equipped with a certificate. This indicates that she is equipped mentally to teach certain subjects, but does not indicate her fitness to teach a certain school. Different schools require differently constituted teachers. In selecting a teacher, a school officer should choose the one best fitted for the position that he can secure. This might preclude the hiring of a first applicant or some one that lived in the community. There is not necessarily any virtue in selecting a teacher because she applied for a position first, because she resides in the district, or has special friends and relatives near. The only right a teacher may have to your school is her ability to teach it as well or better than any one else. The sooner we recognize this fact the sooner will our rural schools come into their own. In selecting teachers we believe it wisdom to investigate most thoroughly the record of applicants.

NEW SCHOOL BUILDINGS.

Each year many new buildings are erected and old ones repaired. School boards when contemplating such procedure should build the best. We believe the latest up-to-date plans should be secured. These plans will provide windows on one side and end of building only, with proper distribution of light. Such a plan will cost but little, if any, more and will be of inestimable value to pupils.

FREE TUITION.

Perhaps one of the most fruitful school laws of recent enactment is that providing free high school facilities to all pupils residing in districts not offering a four-year course of study. It was the intention of our law-makers that country boys and girls should be given an equal chance with those living in cities or towns. This law is producing excellent results throughout the state.

In making an estimate of expenses for the coming year, school boards should estimate the number who will attend high school at public expense and the expense required.

This law makes it imperative for the president or secretary to sign a certificate of residence. Such officers may be of great service to their boys and girls if they will grant without delay certificates to such as are eligible. We sincerely trust the school officers will lend their every effort that this law may be administered justly.

ENUMERATION.

We wish to call particular attention to the enumeration of pupils. The law provides that this shall be taken between June first and fifteenth in sub-districts, and during the month of June in independent districts. A little more care on the part of census takers would add many names to the list of pupils of school age. Particularly is this true in the rural communities. The sub-director should visit personally each home and find out the exact number of school age.

COMPULSORY ATTENDANCE.

The Department again wishes to direct attention to the Compulsory Education Law. The power to enforce this law is clearly in the hands of the school officers.

It has been clearly demonstrated that the best results are secured in those districts where a truant officer has been appointed, and we respectfully recommend that more boards will avail themselves of this means of enforcing the law.

FIRE DRILL.

The Thirty-fourth General Assembly of Iowa created the office of Fire Marshal, likewise prescribed certain duties for the office. One of these provisions is that the Fire Marshal shall require teachers of public and private schools in all buildings of more than one story to have at least one fire drill each month, and that all teachers of such schools, whether occupying buildings of one or more stories, shall keep all doors and exits of the respective rooms and buildings unlocked during school hours. Any teacher failing to comply with these provisions shall be guilty of a misdemeanor and shall be punished by a fine not to exceed ten dollars for each offense. It is also obligatory that all teachers shall be required to instruct their pupils one lesson each quarter of the school year with reference to the causes and danger of fires.

THE OLD YEAR.

AN IMPORTANT DUTY. Accordingly the first great duty that will confront the boards of independent city, town and village corporations and the retiring boards of school townships and rural independent districts on July 1, will be the settling with the secretary and treasurer of their respective corporations to determine the financial condition of the corporation and to see that the records of these officers correctly report the business of the corporation during the year. It is of the utmost importance that this duty should be performed with extreme care that the district may not suffer loss thereby. In order to facilitate the business of making the financial settlement it is recommended that you, at least of the larger corporations, appoint a committee to examine the books of these officers and to compare one with the other prior to the annual meeting and to make a report to you concerning the same on July 1st.

POINTS TO BE OBSERVED. In making the settlement with the treasurer the following points should be observed.

1. *Balances.* You should observe that the balances at the beginning of the year just closed are the same as those on hand when you settled with the treasurer last year.

2. *Orders on County Treasurer.* Observe that the school treasurer has charged himself with all orders on the county treasurer turned over to him.

3. *Miscellaneous Receipts—Tuition.* Observe that he has charged himself with all other receipts paid to the corporation, including tuition.

4. *Paid Teachers.* Note that the amount paid teachers, male and female, is correctly reported.

5. *Miscellaneous Disbursements.* See that the other expenditures, including the amount paid for library books, are correctly reported. Make the item "Paid for other purposes" in each fund as small as possible by specifying all of the other disbursements under the proper title.

6. *School Building Bond Fund.* All money collected to pay on school building bonds should be charged to the school building bond fund and not to the school house fund. Also, all amounts paid on school building bonds should be credited to the school building bond fund and not to the school house fund.

7. *Indebtedness.* Please observe that the total indebtedness on June 30, 1912, is correctly reported to the county superintendent on the blank furnished the treasurer through that officer.

8. *Inventory.* Make an inventory of the school houses and apparatus and see that the same is correctly reported to the county superintendent by the secretary.

9. *Agreement of Reports.* The records of the secretary and those of the treasurer should agree as to each fund, the amounts received from each source and the amounts expended for each purpose. We desire also that you note particularly that the reports of these officers agree with respect to library books and tuition.

10. *Adjournment.* In school townships and rural independent districts the retiring boards should meet and transact the business before them sufficiently early to enable them to adjourn in time for the new board to organize and transact the business that may come before it. **THE NEW BOARD MUST ORGANIZE ON JULY 1st.**

THE NEW YEAR.

ORGANIZATION OF NEW BOARDS. The retiring board of each rural independent district and school township having completed its labors and adjourned, the directors-elect for these corporations will organize for the year just beginning. The organization is effected by the election of a president from among the members, and a secretary and treasurer from outside of the board. (Section 2757.) The boards of independent city, town and village corporations having organized in March, will not elect a president at this time, but will elect a secretary for each of such cor-

porations. In independent village corporations, the board will elect a treasurer also. Section 2757. Treasurers for cities and towns are chosen by the electors in March. Section 2754.

THE MOST IMPORTANT DUTY. The most important duty devolving upon the new boards after their organization is to plan for the schools of their respective corporations for the ensuing year. This involves the determining of the number of schools that shall be maintained, the length of the school year, and the election of teachers.

SMALL SCHOOLS. In every county there are many small schools—schools of five or less. Many of these could be closed temporarily without hardship to any one, often with advantage to the pupils and always with economy to the school corporation. You are urged to take these matters into consideration when determining the number of schools that shall be maintained to see if there may not be one or more schools in your corporation that can be closed both to the advantage of the pupils and the corporation. What can be saved in this way might be used to extend the school year or to induce more competent teachers to take charge of your schools.

NON-USER. When a school is closed with the consent of the county superintendent, or when the school premises are kept in repair, and the school house is kept insured, or when the board by resolution declares a school closed temporarily, the district does not become a non-user under the provisions of section 2816, and therefore does not lose title to the site. You can therefore temporarily close your small schools without forfeiting the title to the school sites by observing any one of the above conditions.

THE FOLLOWING ORDER OF BUSINESS IS RECOMMENDED.

1. Call to Order by President.
2. Roll Call.
3. Reading Minutes of Previous Meeting.
4. Unpaid Bills.
5. Examination of Books and Settlement with Secretary and Treasurer for the Past Year.
6. Unfinished Business.
7. Administration of Oath of Office to Directors Elect. Section 2758. (Form of Oath). Do you solemnly swear (or affirm) that you will support the Constitution of the United States and of the State of Iowa, and that you will faithfully perform the duties of (President or Director, as the case may be) as now or hereafter required by law?
8. Delivery of Copies of School Laws and Supplies to Successors.

NEW BOARD.

1. Call to Order.
2. Election of President. (Except in city and town independent districts.)
3. Election of Secretary.
4. Election of Treasurer.

5. Approval of Bonds of Secretary and Treasurer.
6. Fixing Period Each School Shall be in Session.
7. Fixing Date for Opening Schools.
8. Determining Rules and Regulations for School Government.
9. Repairs.
10. Supplies.
11. Arrange to Enforce the Compulsory School Law.
12. Determine Wages to be Paid.
13. Determine Number of Schools to be in Session.
14. Employment of Teachers.
15. Fix Amount to be Expended for Library Purposes.
16. Provide for Tuition of Pupils in High School.
17. Estimate the Amount of Taxes Necessary for the Coming Year.
 - (1) Teachers' Fund.
 - (2) Contingent Fund.
 - (3) School House Fund (voted by people).
18. New and Unfinished Business.
19. New Buildings—Heating and Ventilation of Buildings.
20. Adjournment.

HEATING AND VENTILATING.

The proper heating and ventilating of school rooms is a matter of supreme importance, and should receive the most serious consideration by every school board in the state. It is poor economy to go to the expense of maintaining a school and then fail to provide a healthful and comfortable school room, which is the one thing that is, above everything else, necessary to make the school successful. No improvement is more necessary nor more urgent, and no investment will yield larger and more certain returns to the taxpayers of the district than the money expended in providing adequate facilities for heating and ventilating the school rooms.

This Department has no authority to specify what particular kind of a heating and ventilation system shall be installed in the schools of Iowa. That is a matter for each board to determine. However, it might be well to profit by the experience of other states which have been pioneers in this movement for better heating and ventilation of school rooms. Hence, the following suggestions which, if observed by school boards, will enable them to avoid expensive mistakes and insure the installation of efficient apparatus.

SUGGESTIONS FOR HEATING AND VENTILATING.

Room heating and ventilation systems, when properly constructed and installed, have been found to be practical, efficient and economical for school buildings having from one to four rooms. Such a system may consist of (1) a home made apparatus constructed by a local mechanic, or, (2) a patented system installed by a responsible concern which makes a specialty of heating and ventilation.

ESSENTIALS IN CONSTRUCTION OF HOME MADE PLANT.

The following requirements are substantially those in force in Minnesota, North Dakota and other states:

1. *Chimney.* This is of fundamental importance. It should be not less than 20 by 20 inches clear on the inside throughout its entire length. It should be set into the inside of the building and should extend at least four feet above the highest part of the roof.

Inside the chimney should be a stack, eight inches in diameter, made of No. 16 gauge steel. This stack should rest on the floor of the chimney and be held in place by side braces, and extend two feet above the chimney top. The smoke pipe should enter the stack at the usual smoke pipe height.

2. *Ventilation.* The space in the chimney outside of the stack is used for ventilation. Registers should be placed in the base of the chimney with the lower edge as near the floor as possible. Two registers are better than one. The total area of the registers should be one-fourth more than that of the chimney flue. The top of the register should not be more than twelve or fourteen inches from the floor and eight or ten inches is better still.

3. *Heater.* This should be substantial and of adequate capacity. The base should be small, and there should be no projecting rims or flanges, otherwise the free circulation of the air will be impeded. The heater should be surrounded by a shield or casing, standing at least six inches away from it, and not less than twelve inches from the floor.

4. *Shield.* This should be made of polished or plated steel so as to present a handsome appearance and resist rusting. It should be lined with asbestos and an inside lining of deeply corrugated tin so as to make it as nearly radiation proof as possible.

5. *Fresh Air Intake.* The cross section area of the fresh air intake should be as great at least as that of the chimney exclusive of the smoke stack. It should enter the space between the shield and heater so as to insure the proper heating of the fresh air before it is discharged into the room.

A fresh air register under the heater has been found to be unsatisfactory and should under no circumstances be used. It is impossible to keep the floors warm with such an arrangement.

6. *Humidifier.* A suitable vessel or evaporating pan should be provided and placed inside of the shield so that the proper amount of moisture may be imparted to the air before it is distributed throughout the room. A vessel on the stove filled with water might answer.

Caution. Unless the system is constructed in all essential details strictly in accordance with the above requirements, the results will be inadequate and unsatisfactory.

ESSENTIAL FEATURES OF PATENTED SYSTEMS.

Chimney. A good chimney is of the utmost importance with any efficient gravity system of heating and ventilation. In a patented system

where the smoke and foul air are mixed the chimney should be 12 by 12 inches clear on the inside throughout its entire length. Such a chimney may be built on posts or a shelf, but it should extend about four feet below the ceiling.

Systems that have foul air ventilators unheated are, of course, inadequate, and the installation of such a device is simply a waste of money.

When a district installs a plant it should provide a good brick chimney and make a permanent job of it. Make-shifts are unsatisfactory and expensive.

With any room heating and ventilating system it is important that the mouth of the foul air ventilator should be at least four feet away from the shield of the heater, otherwise there will be interference between the action of the ventilator and the heater.

In every case the heater and foul air ventilator should be in the same end of the room so as to insure proper circulation of the air in the room.

As to construction of heater, shield, fresh air intake, etc., the suggestions and requirements made for home made plants should apply to patented systems.

Sincerely,

A. M. DEYOE,
Superintendent of Public Instruction.

To County Superintendents:

I have received information from the office of the attorney general that his interpretation of the registration fee for the support of the normal institutes as found in Section 278 of the School Laws will be in substance as follows:

The time for the collection of the fee may not be limited to the dates of the institutes but may be extended throughout the year. It will be perfectly proper to ascertain at the time of the institute from those in attendance whether they desire to secure a certificate or teach for the ensuing year and collect a fee of \$1.00 from each person answering in the affirmative.

The registration fee of \$1.00 shall be collected annually from each person desiring to secure a certificate in addition to the regular examination fee, and from each person who may teach in his county during the year, but not more than \$1.00 shall be so collected annually from any one person.

This method of collecting the \$1.00 registration fee does not apply prior to July 4, 1911.

Yours truly,

A. M. DEYOE,
Superintendent Public Instruction.

June 12, 1911.

To the Teachers and Superintendents of the Public Schools of Iowa:

My attention has recently been called to a book on Domestic Science by Ida Hood Clark, published by Little, Brown and Company of Boston, in which a certain paragraph relating to "Purchasing Flour," on page 82, recommends that certain brands of flour, viz., Pillsbury's and Washburn's are the best.

We do not believe it falls within the province of any text book to recommend or advertise certain brands of flour for use, and that such discrimination is unjust to the products of our Iowa mills.

This Department recommends that this book be not used in any of the public schools of Iowa until the objectionable paragraph referred to be removed from the text.

Yours respectfully,

A. M. DEYOE,
Superintendent of Public Instruction.

June 15, 1912.

ARBOR DAY

I O W A

APRIL 28, 1911

STATE OF IOWA—EXECUTIVE DEPARTMENT.

By the Governor:

A PROCLAMATION.

Realizing how vital and inseparable are tree culture and forestry to the development and conservation of the resources of our State, I desire to call the attention of the people of Iowa to Arbor Day, which has by custom grown nation-wide in observance.

Therefore, I, in conformity with established custom do hereby designate

APRIL 28, 1911, AS ARBOR DAY,

and recommend that it be observed by our schools, with appropriate exercises and ceremonies, the planting of trees and shrubbery; and that our cities and towns, in accordance with the spirit of the day, take occasion to beautify their streets and parks with natural foliage.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Iowa.

Done at Des Moines, the Capital of the State, this 5th day of April, A. D. 1911.

B. F. CARROLL,
Governor.

ATTEST:

W. C. HAYWARD,
Secretary of State.

DEPARTMENT OF PUBLIC INSTRUCTION,
DES MOINES, IOWA.

To the School Children of Iowa, Our Boys and Girls:

The influence of Spring-tide is upon us. Nature in all her beauty is spreading a mantle upon all things round about. The green grass, the flowers, the leafing trees and flowering shrubs, the songs of the birds in our tree-tops indicate that Nature is active in preparing a pleasant place for you and me. May this Spring-time bring to you new hopes, new ambitions and new desires for knowledge that will be potent influences for higher ideals and better lives. It is our earnest desire that this year the influence of Nature may culminate in the observation of a day of joyous tree planting and general cleaning up of schools and grounds in which all may lend a helping hand.

The governor of our state has appointed Friday, April 28th, as Arbor Day. I trust his proclamation may be read on this day in every school in session.

Arbor and Bird Day should be one of universal interest to pupils, teachers and patrons. Many, many school yards should, on this occasion, be improved and made more home-like by the planting of trees, vines and shrubs. Plan an arrangement for the planting that will beautify the school premises and yet not encroach upon the play-grounds. Trees invite the song birds to establish their homes among us; establish a place where we can meet new friends as well as old.

A wise choice of companions and friends will do much to promote the happiness and purity of our lives. Trees represent constancy and loyalty, while cheer and good-will are proclaimed by the birds of song. May you, boys and girls, become fast friends with the trees and birds, and thus bring them under your care and protection. In study and play, let that which may be enduring and loyal mingle with cheer and good-will to all; and by so doing, typify in your lives, lessons gained from Nature.

Sincerely yours,

A. M. DEYOE,
Superintendent Public Instruction.

April 6, 1911.

AS MANY ARE

AS ALL COULD BE

ARBOR DAY

IOWA

Friday, April 26, 1912

A vision of what the future has in store for each rural community in Iowa that acts today.

This modern one room rural school building is found in Linn County, Iowa.

Cut loaned by Supt. A. B. Alderman.

STATE OF IOWA—EXECUTIVE DEPARTMENT.

A Proclamation

By the Governor:

By custom the last Friday in April has been established as a day for the planting of trees upon and otherwise beautifying the school grounds of the state. There is nothing which adds more to the beauty and attractiveness of the home or the school than to surround it with trees and shrubbery. To interest the children in planting and caring for trees is to inspire them to higher and nobler ideals.

We have experienced two unusually dry seasons during which shade and ornamental trees have greatly suffered. It is therefore desired that more than the usual amount of interest be taken in tree planting this season.

Therefore, I, B. F. Carroll, governor of the state of Iowa, do hereby proclaim

FRIDAY, APRIL 26TH, AS ARBOR DAY,

and I recommend that all teachers and school officers see to it that a sufficient number of trees of select varieties and sufficient shrubbery of suitable kind be furnished to enable the children with the aid of and under the direction of the teachers to properly beautify and ornament the school grounds throughout the state.

I further recommend that the people generally observe this as a day for the planting of shrubbery, shade, fruit and ornamental trees to the end that the homes may be beautified and ornamented and the farms of the state made more attractive.

IN WITNESS WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Iowa, this 29th day of March, A. D. 1912.

B. F. CARROLL,
Governor.

(Seal)

Attest: **W. C. HAYWARD,**
Secretary of State.

By **J. M. JAMIESON,**
Deputy.

REPORT OF THE

STATE OF IOWA, DEPARTMENT OF PUBLIC INSTRUCTION. DES MOINES.

Teachers, Pupils and Patrons of the Schools of Iowa:

I see a tree of unusual size and beauty on a fine stretch of location. What a joy that tree would be to the children! What a joy that tree would be to their young minds! How those who enjoy its shadow hallow the memory of the person who planted it and bless who spared and cared for it. There is no more beautiful service to than the planting of a tree.

This day of aesthetic awakening, much is being done to bring about "City Beautiful." Blocks of valuable buildings in the heart of cities have been condemned and planted to grass and trees that the children may feel the uplifting influence of a beautiful outside world. With the same and little expense, your school ground may be made the pride of the community.

A good beginning would be to plant this year an oak, an elm, or a Norway spruce or a Virginia creeper. A row of spruce or of Norway spruce on two sides makes a good background. Groups of trees or shrubs artistically arranged in front of the schoolhouse and near the corners of the yard produce a pretty effect.

An organization of the patrons would perhaps be the most effective way of giving wise direction to the effort to beautify school grounds. Through such an organization, investigation could be made as to what has been done and is being done in other places. Advice from a landscape gardener could be secured as to how to make the most of the opportunity offered by the size and location of your school ground and in other ways the work could be made interesting and effective.

I earnestly hope that the teachers and pupils of many schools will be able to interest the patrons in making such combined and continuous effort for the beautifying of the school grounds on Arbor Day, April 26, 1912.

April 9, 1912.

Very truly yours,
A. M. DEYOE,
Superintendent of Public Instruction.

HOW TO PLANT A TREE

Have all necessary tools—also water—ready for use. Dig the hole a little deeper and wider than the tree requires. Leave some pulverized dirt in the bottom of the hole.

Plant the tree a little deeper than it was originally. Sift the rich, mellow soil, first removed, carefully about the roots. Be sure the roots are spread out. Hold the tree erect and firm.

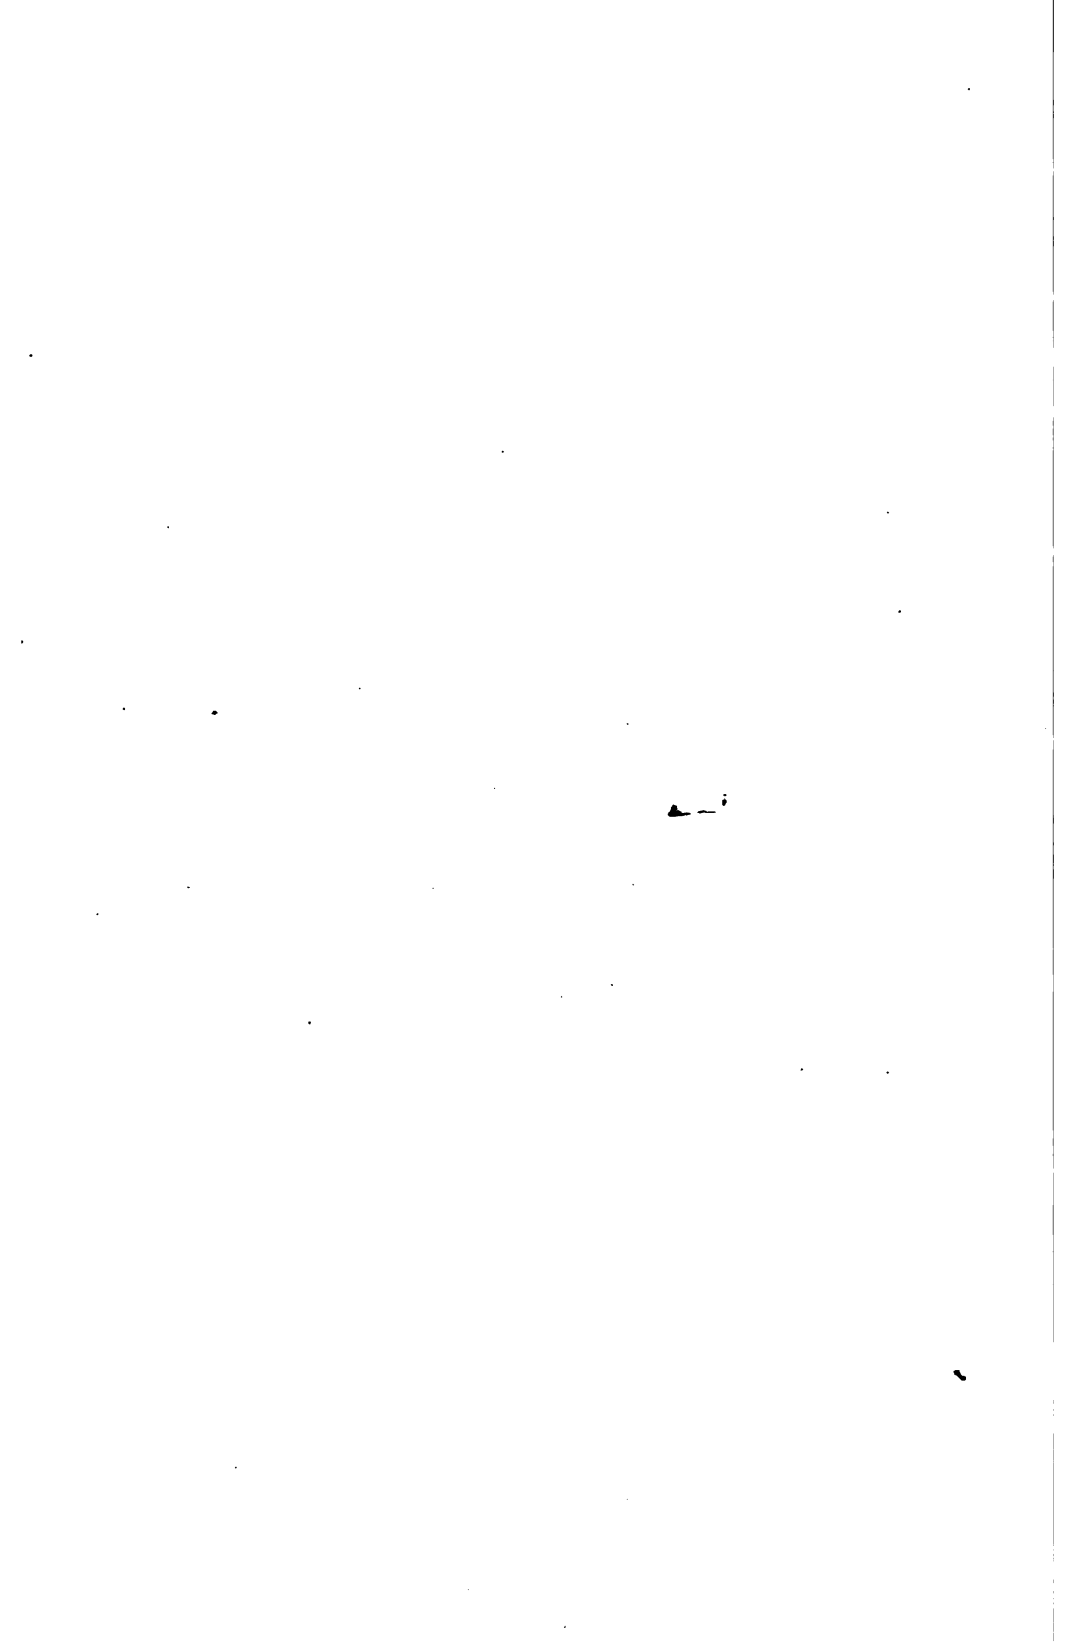

After the roots are covered, lift the tree slightly, allowing it to settle back, to insure the filling of all spaces underneath. Tramp the earth down solid as the hole is filled. This will prevent disturbance of roots and keep out air.

Leave a little loose earth on top. Children may plant flowers about the trees. The soil should be cultivated every few days to conserve the moisture. Keep free from weeds and grass.

FERNALD CONSOLIDATED SCHOOL

The Fernald Consolidated School building is 46x49. Two stories with four rooms. Made of plain red brick. The cost of house complete with heating plant, \$6,338.00. There is about three acres of play ground.

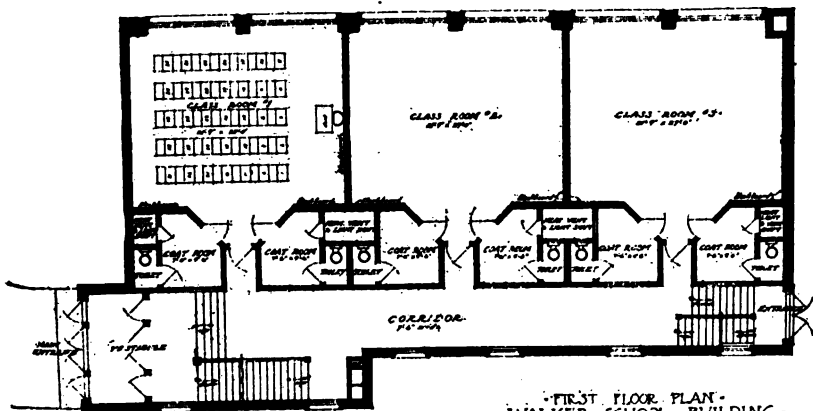

THE WALKER PUBLIC SCHOOL BUILDING

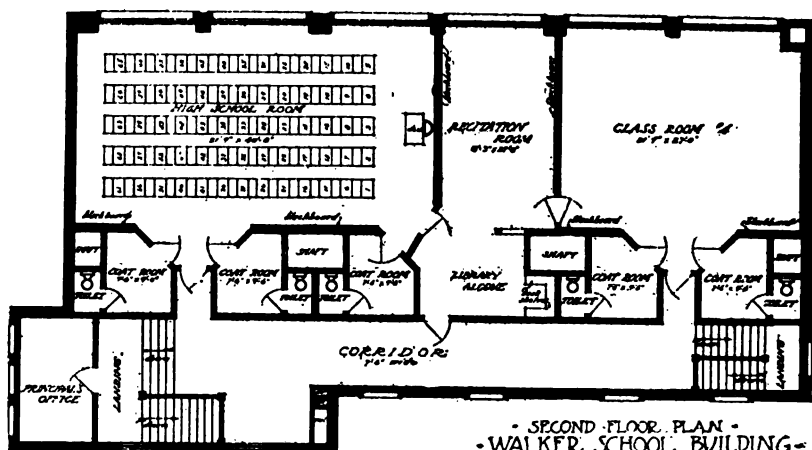

This building is of brick construction, 49x90 feet in size, with two stories and basement, and cost \$18,500.00. The basement has a 14-foot ceiling, stands high out of the ground, and is fitted for use as an auditorium and gymnasium. The school rooms occupy the first and second floors, each being supplied with two cloak rooms with toilet rooms in connection. The high school has a seating capacity of 65, and is equipped with the latest improved adjustable desks. The class rooms are all lighted exclusively by north light. The heating plant is of the vacuum steam system, and the most approved ideas in ventilation have been adopted. An individual gas plant will be a part of the equipment and will supply gas for lighting purposes and also for the domestic science department, which it is expected will be installed later.

**REGULATIONS GOVERNING THE ISSUANCE OF UNIFORM COUNTY
CERTIFICATES BY EXAMINATION AND RENEWAL.****PART ONE.****REGULAR EXAMINATIONS.****1. DATES OF REGULAR EXAMINATIONS.**

Regular examinations for uniform county certificates are held on the last Friday and the Wednesday and Thursday preceding in the months of January, June, July and October. (Section 2734-c, School Laws.)

2. ADMISSION AND QUALIFICATIONS OF APPLICANTS.

Before admitting an applicant to any examination, the County Superintendent must be satisfied that the person seeking a certificate is of good moral character, of which fact he may require proof, and that he is in all respects other than in scholarship possessed of the necessary qualifications as an instructor. (Section 2734-l, School Laws.)

3. MINIMUM AGE FOR ADMISSION TO A REGULAR EXAMINATION.

(a) If writing in the January examination, the eighteenth birthday must be reached by the first day of the next April.

If writing in the June or July examinations, the eighteenth birthday must be reached by the first day of the next September.

If writing in the October examination, the eighteenth birthday must be reached by the first day of the next December.

(b) An applicant under eighteen years of age must write on the preliminary blank the day, month and year he will be eighteen. An applicant under age, as specified in (a) of this section, admitted through error, will receive no report of the examination, nor will his answer papers be returned.

4. THE PRELIMINARY BLANK.

Before beginning to write at any examination, the applicant shall fill out a preliminary blank and file it with the County Superintendent or conductor in charge of the examination, together with the examination fee of one dollar.

5. ANSWER PAPERS MUST BEAR NUMBER, BUT NOT NAME OF APPLICANT.

At the beginning of the examination, the County Superintendent, or the conductor, shall give to each applicant a number, which number, together with the name of the applicant, must appear on the preliminary blank. The applicant's number, BUT NOT HIS NAME, must appear on EACH sheet of the answer papers. Each sheet shall bear the name of the county to which the examination is to be credited.

6. SEATING OF APPLICANTS.

Each applicant should be as far removed as practicable from other applicant; should not have in his possession any books, notes or papers, except the paper distributed by order of the conductor, and SHOULD NOT LEAVE HIS SEAT until the examination on a subject is completed and the answer papers are passed to the conductor.

7. APPLICATION FEE—EXAMINATION OR RENEWAL.

Each applicant for a uniform county certificate, whether writing the examination in whole or in part, and each applicant for the renewal of a uniform county certificate, shall pay a fee of one dollar, one-half of which shall be deposited by the County Superintendent with the treasurer of state on the first day of the succeeding month and one-half shall be paid into the county institute fund on the same date. (Section 2734-p).

8. NO COMMUNICATION.

An applicant who seeks either to receive or to give aid by any form of communication, shall be dismissed by the conductor, and his papers shall not be forwarded to the Department of Public Instruction. The County Superintendent shall, in his returns to the State Superintendent, report all such cases and the action taken by him in each case.

9. NO EXPLANATION.

The conductor shall make no explanation of or comment upon the questions or their meaning.

10. WORK MUST BE IN FULL.

In mathematics no credit will be given for mere results. All operations must be fully indicated by signs or by written analysis.

11. DEFINITE ANSWERS.

Answers should be definite and concise. The applicant should write no statement of fact not called for by the questions. ALL ANSWER PAPERS SHALL BE WRITTEN IN INK.

12. PROGRAM OF EXAMINATION.

EACH HALF DAY SHALL BE A UNIT. THE EXAMINATION IN ANY SUBJECT MAY NOT BE WRITTEN AT ANY OTHER TIME THAN THE HALF DAY IN WHICH IT APPEARS ON THE PROGRAM.

With the consent of the county superintendent, an applicant may apportion the time among the subjects scheduled for that half-day session.

Applicants who write but a part of the subjects scheduled for a half day, must present themselves at the hour such subject or subjects are appointed in the program.

SCHEDULE OF EXAMINATION.**WEDNESDAY.**

| A. M. | P. M. |
|------------------------------|------------------------------------|
| 8:00 to 8:30, Preliminary. | 1:15 to 3:00, Geography. |
| 8:30 to 10:15, Didactics. | 3:00 to 5:00, History. |
| 10:15 to 11:10, Orthography. | 5:00 to 6:00, or at convenience of |
| 11:10 to 12:00, Reading. | conductor, Oral Reading. |

THURSDAY.

| A. M. | P. M. |
|-----------------------------|---------------------------------|
| 8:00 to 8:10, Preliminary. | 1:00 to 2:00, Elements of Vocal |
| 8:10 to 10:10, Arithmetic. | Music. |
| 10:10 to 12:00, Physiology. | 2:00 to 4:00, English Grammar. |
| | 4:00 to 5:00, Penmanship. |

FRIDAY.

| A. M. | P. M. |
|---------------------------------------|------------------------------------|
| 8:00 to 8:10, Preliminary. | 1:00 to 2:45, Elementary Civics. |
| 8:10 to 10:15, Elementary Algebra. | 2:45 to 5:00, Elements of Physics. |
| 10:15 to 12:00, Elementary Economics. | |

13. GRADES OF CERTIFICATES—SUBJECTS REQUIRED.

Applicants for second and third grade uniform county certificates shall pass an examination in didactics, reading, orthography, writing, arithmetic, geography, grammar, history of the United States, elements of vocal music, and physiology and hygiene, including effects of the use of stimulants, narcotics, and poisonous substances. Applicants for first grade certificates, in addition to the above named subjects, must pass an examination in elementary civics, elementary economics, elementary physics, and elementary algebra.

14. PASSING GRADES.

The average and minimum standings for each grade of uniform county certificate shall be as follows:

First grade, average 85 per cent, no grade below 75 per cent.

Second grade, average 75 per cent, no grade below 70 per cent.

Third grade, average 65 per cent, no grade below 60 per cent.

Note 2. Applicants will be allowed to hold passing grades obtained in the four advanced subjects in the June, 1910, examination and all subsequent examinations.

15. GENERAL FITNESS—DIDACTICS—ORAL READING.

The County Superintendent shall grade the papers in didactics and give grades in the general fitness of applicants. The County Superintendent, or the conductor of the examination, shall also examine applicants in oral reading. All grades thus assigned shall be on the basis of 100.

Note. GENERAL FITNESS—BASIS FOR. In giving the grade in general fitness, scholarship should not be considered. This grade is based upon the other qualities that go to make a successful teacher. A certificate will not be issued if the grade in general fitness is lower than the minimum grade allowed for that particular grade of certificate.

16. LENGTH OF TIME FOR WHICH CERTIFICATES ARE ISSUED.

First grade and special certificates are issued for a term of three years, second grade certificates for two years, and third grade certificates for one year. (Sections 2734-e, 2734-g, 2734-h and 2734-i).

17. DATE OF CERTIFICATES.

All certificates and reports issued upon any regular examination, will bear date of the first of the month following the examination, unless that date falls on Sunday, in which case, of the day following.

18. DISTRIBUTING CERTIFICATES AND STATEMENTS.

As soon as the certificates and reports for a county are ready they will be shipped to the County Superintendent of said county for distribution.

19. REGISTRATION OF CERTIFICATES.

A certificate is not a valid license to teach until registered by the County Superintendent of the county in which the school is located. (Section 2734-q).

Note 1. In case a sufficient number of life diplomas, state certificates, first grade uniform county certificates, special uniform county certificates, and second grade uniform county certificates are held in any county to supply the school thereof, the County Superintendent shall not be required to register third grade uniform county certificates. (Section 2734-r.)

20. EXPERIENCE.

Applicants for first grade certificates shall have had 36 weeks of successful experience. For other grades of county certificates, no experience is required.

21. APPLICANTS ENTITLED TO BEST GRADES.

The applicant is entitled to the best grades in all subjects which have been recorded either on the face or on the back of his certificate. Grades obtained at regular examinations subsequent to the date of issue of the certificate held by any applicant, will be placed on the back of a certificate of even date with the original certificate until said applicant succeeds in earning grades that entitle him to a certificate of higher grade or a certificate eligible to life validation. In either case, a new certificate will be issued showing only the best grades to which the applicant is entitled.

22. HOW A PERSON WHO DOES NOT HOLD A REGULAR CERTIFICATE MAY SECURE A UNIFORM COUNTY CERTIFICATE.

Applicants who write the examination for a uniform county certificate for the first time, and applicants whose certificates have lapsed, must write in all subjects required for the grade of certificate desired. Should they fail to secure a certificate at this examination, they will be allowed to combine it with a second trial, provided the second examination is taken within one year. Two trials are thus offered an applicant to secure a certificate. The first and second trials may be combined, the third and fourth, the fifth and sixth, etc. The third, fifth, etc., shall be considered a "first trial" of a new attempt to secure a certificate and the fourth, sixth, etc., shall be considered a "second trial" to secure a certificate. Except for the purpose of combining the results of two examinations in order to secure a certificate, applicants cannot hold any of the grades so earned, unless a certificate is thereby secured.

Note 1. At a "second trial" to secure a certificate, the applicant will be required to write in such subjects only as are necessary to enable him to meet the requirements for the grade of certificate he desires.

Note 2. "WITHIN A YEAR." The expression "within a year" is construed to include the four successive regular examinations following the one in which the "first trial" is made.

Note 3. AVERAGE AND MINIMUM GRADES. The applicant must bear in mind that there is a minimum grade and an average grade requirement. At a "second trial" it is the safer plan to write in all subjects in which the grade is below the required average.

23. NEW CERTIFICATES.

Whenever an applicant meets the requirements for a higher grade of certificate than the one he holds, such higher grade of certificate will be issued to him. Likewise when an applicant, holding a certificate of either the first or second grade, secures grades that meet the requirements for life validation, a new certificate will be issued. However, a certificate that will soon expire, cannot be extended by an examination unless such examination results in a certificate of higher grade or a certificate eligible to life validation; the extension of a certificate, under such circumstances, can be secured only by the process of renewal.

Applicants for life validation must hold a certificate eligible to validation before making such application. They can not write any of the subjects on the fee for life validation.

24. PASSING TO A HIGHER GRADE OF CERTIFICATE.

Section 2734-b, School Laws of Iowa: "The holder of a second grade certificate may, at any of the examinations provided for in Section 2734-c, take an examination in any one or more of the additional branches required for the issue of a first grade certificate, or he may at any such time be re-examined in any branch or branches in which he desires to raise his grades, and in each case the new grade shall be placed on his certificate, and when he has thus successfully passed in all the branches required for the issue of a first grade certificate, such certificate shall then be issued to him provided he has had thirty-six weeks' successful teaching experience, if not, then at the conclusion of such experience. In like manner third grade certificates may be changed into those of the second or first grade."

25. SCOPE OF EXAMINATIONS.

The examination for a second grade certificate will cover the required subjects, as treated in standard text-books.

The examinations in the four advanced subjects will cover the following:

Physics. Will include the entire subject as usually treated in high school texts. Emphasis will be placed upon natural phenomena.

Algebra. As far as quadratic equations.

Civics. The constitution and government of the United States, and the local and general government of the State of Iowa.

Economics. Fundamental definitions with special attention to discrimination between utility and value, goods and wealth; the departments of economics, the agents of production, including business management and government protection; the Malthusian doctrine; the law of diminishing returns; co-operation; socialism; trades-unions; arbitration.

26. APPEAL.

In case an applicant believes the examining board has made a mistake in marking his papers, or in transcribing the grades, he may appeal his case to the Superintendent of Public Instruction for final hearing, provided his appeal is accompanied by a fee of one dollar to cover the expenses of reviewing the papers and tracing the error. No appeal will be considered unless filed within 60 days after the time the applicant is notified of the results of the examination.

27. PAPERS KEPT NINETY DAYS.

The answer papers of all applicants will be kept on file in the office of the State Superintendent ninety days, after which time they will be destroyed. The answer papers in didactics will be kept on file in the office of the County Superintendent for a like period of time.

PART TWO.**SPECIAL UNIFORM COUNTY CERTIFICATES.****28. (a) KINDS.**

Special certificates are issued for the following subjects or groups of subjects:

1, Music; 2, Penmanship; 3, Drawing; 4, Kindergarten; 5, Domestic Science or Home Economics; 6, Manual Training; 7, Latin; 8, German; 9, Greek; 10, French; 11, Physical Culture; 12, English, including Grammar, Rhetoric, English Composition, and English and American Literature; 13, History and Political Science, including Greek, Roman, English and American History, Civil Government of Iowa and the United States, and Economics; 14, Mathematics, including higher Arithmetic, Algebra, Geometry and Trigonometry; 15, Natural Science, including Physiology, Physical Geography, Geology, Botany, and Zoology; 16, Physical Science, including Physics, Chemistry and Astronomy; 17, Commercial, including Arithmetic, Penmanship, Bookkeeping, and Commercial Law; 18, Stenography; 19, Agriculture.

(b) Number of Subjects.

The special certificate is not issued for more than two subjects or groups of subjects. It may include one entire group and part of a second group.

(c) *Application Fee.*

Each applicant for a special certificate must file with the County Superintendent a preliminary blank properly filled out, and pay a fee of one dollar.

(d) *Requirements—Examination.*

Applicants for special certificates shall take an examination in the subject or group of subjects for which they desire a certificate.

Note. CREDITS ACCEPTED. Graduates of educational institutions of high grade may file record of credits in major subjects in lieu of examination for special uniform county certificates.

(e) *Examination Date.*

The examination for special certificate may be written in any county on the last Friday of January, June, July or October, if the County Superintendent is requested to call for questions on or before the first day of the month in which the examination is to be written.

(f) *Program of Examination.*

The County Superintendent will fix the time for beginning the examination and the order of subjects.

(g) *Forwarding Returns.*

The answer papers for special county certificates, together with the preliminary papers, shall be put in a package by themselves, sealed and labeled with the names of the subjects and number of papers, and forwarded to the Superintendent of Public Instruction by prepaid express.

PART THREE.

RENEWAL OF REGULAR UNIFORM COUNTY CERTIFICATES.

29. APPLICATION FOR RENEWAL.

An applicant for renewal of a uniform county certificate shall file with the County Superintendent the application for renewal and pay the examination fee of one dollar. The application should be made at least 60 days before the new certificate is to be issued.

ALL RIGHTS UNDER A CERTIFICATE TERMINATE ON THE DATE OF ITS EXPIRATION. HOWEVER, 60 DAYS ARE ALLOWED FOR FILING APPLICATION FOR RENEWAL. No uniform county certificate will be renewed unless application is filed within 60 days after its expiration.

30. RENEWAL RIGHTS AND REQUIREMENTS.

All first and second grade and special certificates, which have not lapsed, are indefinitely renewable under certain conditions, as hereinafter provided. Likewise, third grade certificates are renewed for one year. (Sections 2734-e, 2734-g, 2734-h, and 2734-i).

31. EXPERIENCE.

The applicant for renewal of a uniform county certificate shall also file with the County Superintendent proof of successful teaching experience during the life of the certificate to be renewed, holders of second grade certificate to show at least six months' successful experience and holders of first grade and special certificates, nine months. Provided that one full year's attendance at college or a normal school during the life of the certificate may be accepted in lieu of teaching experience. The proof of suc-

cessful teaching experience and professional spirit should be signed by the County Superintendent of the county in which the teaching was done.

32. COUNTY SUPERINTENDENTS' RECOMMENDATION—WHAT TO CONSIDER.

In deciding whether a renewal will be recommended, the County Superintendent should consider the teacher's success in the school room, and his professional spirit as evidenced by the reading of professional books and papers, and where practicable, attendance upon educational meetings and institutes.

Note 1. CITY SUPERINTENDENT'S RECOMMENDATION. When the applicant has taught in a graded school, the County Superintendent may base this recommendation upon the statement of the superintendent under whom the teacher has taught.

Note 2. PROFESSIONAL SPIRIT. The applicant for renewal should file with the County Superintendent a statement showing a complete record for institute, summer school or college attendance during the life of the certificate offered for renewal, together with a statement of attendance at educational meetings.

33. PROFESSIONAL STUDY—AMOUNT REQUIRED—STATEMENT.

It is expected that every teacher holding a renewable certificate will pursue the work as outlined by the Educational Board of Examiners, or that such teacher will read carefully at least one professional book each year. If this professional study was done under the supervision of a city superintendent, or principal, such city superintendent, or principal, should certify to the same; otherwise it shall be certified to by a County Superintendent having knowledge of the work done.

34. FORWARDING CREDENTIALS.

When ALL of the papers necessary for the renewal of a uniform county certificate have been filed with the County Superintendent, he shall forward them to the President of the Board of Examiners.

Note 1. PAPERS NECESSARY TO FILE. Three papers are necessary to file for the renewal of the uniform county certificate, as follows:

(a) Application for renewal (Form 1), signed by the applicant.

(b) Superintendent's or Principal's, statement of professional study (Form 2), signed by the superintendent (city or county), or principal, under whom the applicant has done the professional work required for the renewal of the certificate.

(c) County Superintendent's statement as to success in the school-room and professional spirit of the applicant (Form 3), which statement shall be signed by the County Superintendent of the county in which the applicant has taught during the life of the certificate to be renewed.

Note 2. No application should be forwarded to the President of the Board of Examiners until all papers necessary to be filed are complete in every respect.

Note 3. BLANKS FURNISHED BY COUNTY SUPERINTENDENT. All blanks relating to the renewal of certificates must be procured from the County Superintendent. A copy of the professional study blank should be furnished to each County Superintendent and City Superintendent, or Principal, under whose direction the reading was done. When filled out, the professional study record should be sent to the County Superintendent under whom the application was made, who will forward the papers when completed to the President of the Educational Board of Examiners.

PART FOUR.

PASSING TO A STATE CERTIFICATE.

35. GRADES ACCEPTED.

Grades of 85 in orthography, writing, reading, arithmetic, geography, grammar, United States history, music, and physiology on a first or a second grade uniform county certificate, in force, are accepted in examination for a first or a second grade state certificate.

PART FIVE.

SUGGESTIONS CONCERNING FEES.

36. FEES.

EXAMINATION FEES for uniform county certificates shall be paid to the County Superintendent and those for state certificates, to the State Superintendent. The fee for a county certificate is one dollar; that for a state certificate, two dollars.

37. DEPOSITING EXAMINATION FEES.

The County Superintendent should deposit examination fees (one-half with the state treasurer and one-half with the county treasurer) on the first day of the month following the examination at which such fees were received.

38. INSTITUTE—REGISTRATION FEE.

To defray the expenses of the Normal Institute, the County Superintendent shall require the payment of an institute-registration fee of one dollar from each person desiring to secure a certificate, or teach in his county for the ensuing year. (Section 2738).

The institute enrollment fee of \$1.00 and the fee of \$1.00 formerly required for the registration of a certificate have been abolished, and the institute-registration fee of \$1.00 has been created in lieu thereof and must be collected by the County Superintendent from each person desiring to secure a certificate or teach in his county for the ensuing year.

The "ensuing year" is defined as beginning July 1, and closing June 30 following.

No fee should be collected from those enrolled at any institute except from such attendants as may desire to secure a certificate or teach in the county.

Every applicant for a certificate, whether by examination or renewal, who has not already paid the institute-registration fee of one dollar during the year, as specified, should pay this fee in addition to the examination fee.

Every person who may teach in any county, but who has not paid the one dollar institute-registration fee in that county, should forward this fee to the County Superintendent before beginning to teach in the county.

Note. A person must pay the institute-registration fee of one dollar in EVERY county in which he may apply for a certificate or in which he may teach during the year beginning July 1 and ending June 30; but only one such fee may be collected from a person in a given county during a given school year. Illustration: A person may attend institute in one county, apply for a certificate in another, and teach in one or more other counties. The institute-registration fee should be paid in the county where the person applied for the certificate, and in each of the other counties where he teaches.

PART ONE.

UNIFORM COUNTY CERTIFICATES.

1. CERTIFICATES VALIDATED FOR LIFE.

First and second grade and special uniform county certificates are validated for life by the State Educational Board of Examiners upon compliance by the holders with the requirements of the law.

2. SUCCESSFUL EXPERIENCE REQUIRED.

The applicant for life validation of a uniform county certificate shall show by testimonials from county or city superintendents, or from principals having IMMEDIATE supervision of his school work, and from a member of each school board, under whom he has taught, that he has had at least five years' continuous successful teaching experience immediately prior to the time validation is sought. Three years of this teaching must have been under the grade of certificate for which validation is desired. College or normal school attendance can not be accepted in lieu of any part of the five years' continuous teaching experience required by the statute for life validation of uniform county certificates.

3. REQUIRED STANDINGS.

An average of 85 per cent is required, and in no subject shall the standing be less than 80 per cent. The holder of a uniform county certificate may at any regular examination write in any subject or subjects for the purpose of securing grades for a certificate eligible to life validation.

4. PROFESSIONAL STUDY.

The applicant shall furnish proof of professional study during the entire five-year period. The law is specific in this particular and no exception can be made. It is useless to apply for life validation of a uniform county certificate until the applicant holds a certificate that meets the requirements as to grades, and can furnish the evidence with respect to successful teaching experience and professional study during the entire five-year period.

5. TIME TO MAKE APPLICATION.

The application for life validation of a uniform county certificate should be filed in the office of the County Superintendent in time to give that officer an opportunity to secure all necessary testimonial papers, and file the application COMPLETE with the Department of Public Instruction at least 60 days before the certificate is desired. Failure to complete evidence will cause delay.

AN APPLICATION FOR LIFE VALIDATION MAY NOT BE FILED LATER THAN 60 DAYS AFTER THE EXPIRATION OF THE CERTIFICATE.

6. THE APPLICATION—FORM.

The application for life validation of a uniform county certificate shall consist of

1. Application blank—filled out by the applicant.
2. Statement or statements concerning professional study by superintendents or principals.
3. Statement or statements concerning successful experience by superintendents.
4. Statement or statements by members of school boards.
5. The certificate for which life validation is sought.

Note 1. County Superintendents will be supplied with all blanks necessary for life validation of uniform county certificates. Applicants should secure blanks from that officer and furnish these blanks to all superintendents or principals and directors from whom evidence is required, and such blanks should be filled out by said officers and mailed by them direct to the County Superintendent.

7. DEFINITION OF THE TERM "YEAR."

The term year shall be construed to mean the minimum school year as fixed by law.

"Each school established shall continue in session for at least twenty-four weeks in each school year commencing the first of July." Section 2773, School Laws of Iowa.

Applicants must therefore submit evidence of six months' teaching experience each year. Additional experience during one year may not be counted toward that of another.

8. FEE.

The fee for life validation of a uniform county certificate is five dollars (\$5.00). THIS FEE SHOULD NOT BE REMITTED UNTIL THE APPLICATION FOR LIFE VALIDATION HAS BEEN APPROVED. Upon receipt of notice of approval, the applicant should remit this fee direct to the President of the Educational Board of Examiners, Des Moines, Iowa, but such remittance should not, under any circumstances, be made by cash or personal check.

PART TWO.

STATE CERTIFICATES.

9. CERTIFICATES VALIDATED FOR LIFE—EXPERIENCE REQUIRED—FEE.

Regular five-year state certificates of the first and second grade and all special state certificates are validated for life by the State Educational Board of Examiners upon proofs from city superintendents, county superintendents and school boards showing at least five years' successful teaching experience, three of which have been during the time said certificates have been in force. The fee for life validation of a state certificate is five dollars (\$5.00).

10. APPLICATION—FORM.

The application for life validation of a state certificate shall consist of

1. Application blank filled out by the applicant.
2. Statement or statements concerning teaching experience by County Superintendents.
3. Statement or statements by city superintendents or principals.
4. Statement or statements by school boards.

Note 1. Applicants for life validation of state certificates must secure all necessary blanks from the Department of Public Instruction, Des Moines, Iowa. These blanks should be furnished to all superintendents and school boards from whom evidence is required, and said blanks should be filled out by said officers and mailed direct to the Department of Public Instruction.

11. PAYMENT OF FEE.

THE FEE OF FIVE DOLLARS SHOULD NOT BE REMITTED UNTIL THE APPLICATION FOR LIFE VALIDATION HAS BEEN APPROVED. Upon receipt of notice of approval, the applicant should remit this fee direct to the President of the Educational Board of Examiners, Des Moines, Iowa, but such remittance should not, under any circumstances, be made by cash or personal check.

PART ONE.

GENERAL DIRECTIONS AND SUGGESTIONS.

1. CONDUCTOR.

The County Superintendent shall have charge of the examination and shall determine who may be admitted under the law and the regulations of the Educational Board of Examiners. In case a supplemental examination is authorized he shall appoint a suitable person to take charge of such examination.

2. ASSIGNING NUMBERS.

(a) *Regular and Special Examinations and College or Normal School Supplemental Examinations.*

In assigning numbers to applicants, the County Superintendent should begin a new series in June of each year. The first application filed in June, whether for renewal or examination, will be numbered ONE and the others will be numbered consecutively in the order of filing.

Note. The numbering should begin with a new series in June because the certificates of the June examination are dated July 1, and all fees received in June should be deposited July 1 following.

(b) *Renewals.*

Renewals should be numbered but not entered on the grade sheets.

(c) *County Supplemental Examination.*

A county supplemental examination should begin with the same number as the one held at the county seat, but the numbers assigned in such supplemental examination should be distinguished from those assigned in the examination at the county seat by adding "-B" to each number in the supplemental examination. Thus, if the first applicant in an October examination, for example, is given the number "56," the first applicant in a supplemental examination held in this county would be given the number "56-B."

Note. USE CARE. Care should be exercised both by the applicant and by the conductor to see that "-B" is added to each number used in a county supplemental examination.

3. DISTRIBUTING QUESTIONS.

Promptly at the time set in the program for the beginning of the examination, the conductor should announce the subjects of the examination for the half day and thereupon open the proper package of questions.

4. THE GRADE SHEET.

The County Superintendent shall fill out the grade sheet in duplicate, showing on each copy (1) name, (2) address, (3) age, (4) examination number, (5) record of teaching experience of each applicant, together with the grades in (1) general fitness, (2) didactics, (3) oral reading, and (4) the highest grade in each subject to which the applicant is entitled from previous examinations. ALL grades that are brought forward from previous examinations must be entered in the lower or starred line of the grade sheets. In bringing forward a grade in reading, earned at a previous examination, only the average should be brought forward, and it should be entered in the lower space of the column headed "Reading average." The County Superintendent cannot be too careful in making these entries.

Note 1. **DIDACTICS.** The County Superintendent will enter the new grade in didactics in the upper space.

Note 2. **ORAL READING.** The County Superintendent will enter the new grade in oral reading in the upper space.

Note 3. **INSPECT ANSWER PAPERS.** The conductor of any examination should inspect the answer papers to see that no sheet has been omitted and that each sheet bears (1) the applicant's number, and (2) the name of the county.

Note 4. Before sealing the answer papers and sending the grade sheets to the Department of Public Instruction, it is recommended that the County Superintendent indicate the branches in which each applicant wrote, by placing in pencil, a small check mark in the proper lower or starred space on one of the grade sheets.

5. GENERAL FITNESS.

The mark in general fitness is important. This grade when once entered by the County Superintendent, and filed in the office of the Superintendent of Public Instruction, should not be changed, except in cases of additional evidence.

A certificate will not be issued if the grade in general fitness is lower than the minimum grade allowed for that particular grade of certificate. Provisional certificates will not be issued to applicants having a grade in general fitness below 60 per cent.

6. CHANGING GRADES.

The Educational Board of Examiners makes the following recommendation in the matter of grades in oral reading and didactics. These grades should not be entered on the grade sheet until the County Superintendent, or Conductor, is satisfied no injustice has been done. No little inconvenience has been caused by the changing of grades in these subjects after the grade sheets have been filed. Such a course will assist in preventing errors and in simplifying the work of certificating teachers.

7. FORWARDING ANSWER PAPERS, PRELIMINARIES, AND GRADE SHEETS.

(a) *Answer Papers and Preliminaries.*

Immediately after the close of the examination, the preliminary blanks and the answer papers in each subject, except didactics, should be arranged in consecutive order and sealed separately in heavy envelopes prepared for that purpose. Each envelope should bear the name of the county, the subject, and the number of answer papers or preliminaries it contains, and should then be forwarded to the Superintendent of Public Instruction by prepaid express.

(b) *Grade Sheets.*

After grade sheets have been filled out as required elsewhere in this circular, the County Superintendent shall forward both copies to the Superintendent of Public Instruction by mail at the earliest possible opportunity after the close of the examination. Promptness and accuracy in filling out the grade sheets will greatly facilitate an early report on the examination.

Too much stress cannot be placed upon the importance of making up a complete grade sheet as this will hasten returns and prevent many errors. No grade should be omitted where it is possible to secure the same before the grade sheets are filed.

The law specifically provides that the County Superintendent should have sufficient assistance at the time of an examination to enable him to conduct the examination properly and prepare all papers to be sent to Des Moines promptly.

8. GRADING ANSWER PAPERS.

The readers, previously appointed by the Educational Board of Examiners, will assemble at the office of the Superintendent of Public Instruction following any regular examination and proceed to grade the answer papers under the supervision of the President of the Educational Board of Examiners.

9. DEPOSITING EXAMINATION FEES.

The County Superintendent should deposit examination fees (one-half with the state treasurer and one-half with the county treasurer) on the first day of the month following the examination at which such fees were received.

Note. The County Superintendent should hold fees for county certificates by complete renewal and on credentials from other states until the cases are decided.

10. RECORD OF PROFESSIONAL STUDY.

The County Superintendents in several counties have adopted some method of keeping a permanent record of the professional reading of the teachers in their counties. This plan should be carried out in every county in justice to the teachers who will need to furnish this information when seeking renewal and life validation of certificates.

11. BLANK FORMS.

County Superintendents will supply themselves with all blanks that have to do with provisionals or the renewal of uniform county certificates; but the blanks required for life validation will be supplied by the Department of Public Instruction.

For convenience in filing and to insure accuracy in checking over credential papers, it is very essential that all renewal blanks be uniform. In order to secure this uniformity, County Superintendents will be supplied with samples of all blanks required for provisionals and renewals, and they are asked to use no blanks that do not conform in size and subject matter to these samples. The size of all blanks should be 8½x11 inches.

PART TWO.**SUPPLEMENTAL EXAMINATIONS.****12. APPOINTMENT.****(a) *County Supplemental Examination.***

When the request of a County Superintendent for a supplemental examination within his county is filed with the President of the Board of Examiners, at least 20 days prior to the first day of any regular examination, such supplemental examination may be appointed at such place as may be designated in the request.

Note 1. WHEN AUTHORIZED. It is only in exceptional cases and where a large number of applicants will be accommodated that a supplemental examination will be authorized. The request for such examination shall state the probable number of applicants that will be accommodated thereby.

Note 2. See (c) regulation 2.

(b) *College or Normal School Supplemental Examination.*

When the president of a normal school or a college certifies that 20 or more students in his school will write for a certificate at the time of any regular examination, and requests a supplemental examination for

them, the President of the Educational Board of Examiners may appoint an examination and a conductor therefor. Such examination shall be conducted under the rules for regular examinations.

13. FORWARDING PAPERS.

(a) *County Supplemental Examination.*

At the close of the county supplemental examination, the conductor should forward to the County Superintendent all answer papers, preliminary papers, and the grade sheets on which he has entered the name, address, age, examination number, and the oral reading grade given by him to those who wrote the examination in reading. (See note 2, regulation 4.)

The papers should be forwarded and the grade sheets completed by the County Superintendent as provided in regulations 7 and 4.

(b) *College or Normal School Supplemental Examination.*

At the close of the examination in didactics, the conductor of the supplemental examination held in an educational institution, shall forward the answer papers in this subject to the County Superintendent of the county of the applicant's residence. As soon as the entire examination is completed, he shall collect the answer papers for each county, arrange the papers in each subject consecutively according to numbers, and seal them separately in heavy envelopes prepared for that purpose. Each envelope should bear the name of the county of the applicant's residence, the subject and the number of answer papers it contains. All envelopes should then be bound in a package and forwarded to the Superintendent of Public Instruction by prepaid express.

The conductor shall also prepare one copy of a grade sheet on which the counties shall be arranged in alphabetical order and under each county shall be placed the name and examination number of each applicant from that county, the names of the applicants being arranged in the order of numbering. It is important that this grade sheet be mailed promptly to the Department of Public Instruction.

14. ADMISSION OF APPLICANTS TO COLLEGE OR NORMAL SUPPLEMENTAL EXAMINATION.

An applicant attending an educational institution, who may desire to write at the supplemental examination held in that institution, should fill out a preliminary blank and send it, together with the examination fee of one dollar and a request for admission to such examination, to the County Superintendent of the county of his residence. The County Superintendent may then assign the applicant a number and give him a certificate of admission to said examination.

If the County Superintendent is of the opinion that an applicant should not be admitted to such examination, he should so notify the applicant and return the fee.

PART THREE.

PROVISIONAL CERTIFICATES.

15. WHEN ISSUED.

When additional teachers are necessary to supply the schools of any county, the County Superintendent may, on request, obtain provisional certificates from the Educational Board of Examiners under the conditions herein enumerated.

(a) *On Special Examinations.*

The Educational Board of Examiners will, upon the request of a County Superintendent, appoint a special examination which shall be conducted in all respects as is a regular examination, but not more than one special examination should be requested in any one month, and none during the month of a regular examination.

Grades earned in a special examination can be placed on a provisional certificate only, and under no circumstances whatever can they be entered upon a regular uniform county certificate.

(b) *On Regular Examinations.*

A provisional certificate based upon a preceding regular examination taken in any county of the state may, on request of the County Superintendent, be issued to an applicant whose grades are below the requirements for a third grade uniform county certificate, provided such grades are sufficient to meet the average and minimum requirements for a provisional certificate.

A provisional certificate will not be issued on an examination taken prior to the last preceding regular June examination.

(c) *On Expired Certificates.*

Teachers whose uniform county certificates of the first or second grade have been allowed to lapse beyond the time limit of renewal, may be granted provisional certificates bearing the grades of their expired certificates when such provisional certificates are requested by the County Superintendent.

If the holder of an expired first or second grade certificate shall within one year of its expiration secure a provisional certificate and shall teach at least six months during the life of such provisional certificate, his renewal rights will be restored upon application, provided such application is accompanied with statements from the County Superintendent certifying to his success, professional spirit, and professional study during the life of both the regular and the provisional certificate.

(d) *On Certificates from Other States.*

When a teacher of well established experience and efficiency from another state is chosen to a public school position in this state and must enter upon the duties of such position before the date of the next regular county examination, a provisional certificate will, upon the recommendation of the County Superintendent, be issued without examination, provided the person so recommended has within three years taught on a certificate of at least a second grade, or has such a certificate in force in another state. A certified statement of the date and grade of the certificate held, with the grades thereon and the time for which the certificate was issued, shall be filed with the application.

This provision shall also apply to graduates of standard colleges of other states, if such graduates cannot be granted an Iowa state certificate.

Application for a provisional certificate shall in such case be accompanied by a copy of the applicant's college record.

(e) *Scholastic Attainment.*

A provisional certificate may be issued upon the request of a County Superintendent to one who has completed at least one full year of scholastic training above that of an accredited four year high school course.

16. STANDINGS REQUIRED.

To be entitled to a provisional certificate, the applicant must have an average of 65 per cent, with no grade below 55 per cent, but, should the average grade be 70 per cent or more, the County Superintendent may request a provisional certificate even though the minimum grade is less than 55 per cent.

17. REQUESTS, PRELIMINARIES, STATEMENTS AND FEES.

(a) When a County Superintendent desires a provisional certificate based upon a previous regular examination in his own county, he should file a request in proper form with the Educational Board of Examiners, but no preliminary statement nor fee will be required.

(b) When a provisional certificate is requested upon the basis of an examination in another county, a fee of one dollar should be paid by the applicant, and a preliminary statement should be sent with the request for the provisional certificate.

(c) Requests for provisional certificates for applicants from other states should be accompanied by preliminary statements, and certified statements concerning certificate held as already stated. A fee of one dollar is also required.

(d) When the basis for a request for a provisional certificate is that of higher scholastic training, the applicant should pay a fee of one dollar and file with the County Superintendent a preliminary statement and a copy of his record in the higher school which he has attended.

18. LIFE OF PROVISIONAL CERTIFICATES.

Under the uniform county certificate law, provisional certificates were granted for the same time and were subject to the same extension as third grade certificates, each being issued for six months, and subject to extension at the discretion of the County Superintendent to July 1 following date of issue.

Under the law, as amended and in force July 4, 1911, the life of a third grade certificate has been extended to one year with the privilege of one renewal for one year; but County Superintendents no longer have power to extend it. By this amendment a provisional certificate becomes valid for one year, but such certificate cannot be extended by the County Superintendent, nor renewed by the Educational Board of Examiners.

19. SUGGESTIONS TO COUNTY SUPERINTENDENTS.

The responsibility for holding special examinations and for granting provisional certificates rests largely with the County Superintendent; and, since provisional certificates may now be issued for one year, even greater care than heretofore should be exercised in granting license to teach by such methods.

No certificate except a provisional can be issued upon a special county examination. For this reason applicants for certificates should be fully informed as to the importance of taking the regular examination, and clearly shown that no first, second, third, or special certificate can be issued on such special examination.

Uniform county certificates only are to be understood when expired Iowa certificates are offered as a basis for provisionals under these rules.

| Polk..... | Jennie Steele Huegle..... | Instructors: Dean W. F. Barr, Mrs. Carrie L. Barr, Lenora Nickle, Mable Nicklin, Mrs. Ella Ford Miller, Dean Alice E. Hopper, Wm. Ritchie. Lecturers: Dr. Rachelle S. Yarrows, Mrs. Frances Squires Patter, Judge F. F. Faville, Prof. A. E. Winship, Ella Flagg Young, Neale S. Knowles. |
| Pottawattamie..... | F. J. Fureyear..... | Instructors: Edward E. Coe, W. A. Brindley, J. W. W. Laird, J. O. Grason, Grace Barr, B. S. Asquith, J. H. Beveridge. Lecturers: A. D. Cromwell, B. G. Lyman, J. H. Beveridge, A. M. Deyoe, W. H. Justin. |
| Poweshiek..... | Sarah A. Carpenter..... | Instructors: Eugene Henely, J. E. Miller, Ernest Her, Leona McClain, Stella Henderson, O. L. Warren. Lecturers: A. M. Deyoe, Prof. O. L. Warren. |
| Ringgold..... | W. H. Fasold..... | Instructors: Fred Vorhies, E. B. Dehsell, Floy Reed, Mabel Reed, Eva M. Falgatter. Lecturer: Nat M. Brigham. |
| Sas..... | Jno. R. Slacks..... | Instructors: H. L. Eells, G. W. Lee, O. F. Garrett, A. B. Alderman, H. P. Trumbo, Lok Watson. Lecturer: Geo. W. Samson. |
| Scott..... | Henry E. Ronge..... | Instructors: Louis Eigel, A. I. Naumann, F. J. Cowan, Ernst Otto, Geo. H. Betts, (Supplementary, Chas. A. Payne). Lecturers: George H. Betts, Chas. A. Payne. |
| Shelby..... | Rose M. Parker..... | Instructors: Emily Wood, A. N. Farmer, Roland Myers, H. P. Nielson, Bessie B. Buchanan, Geo. W. Galloway. Lecturers: Ida B. Wise, D. E. Cloyd. |
| Sioux..... | F. E. Fuller..... | Instructors: John E. Stout, L. E. Rusmisl, Mary Diemer, J. J. Rae, Jno. Ludwickson, S. H. Buntley. Lecturer: F. E. Palmer. |
| Story..... | I. J. Scott..... | Instructors: I. F. Meyer, H. F. Harris, F. A. Nims, H. W. Dana, J. J. Ferol, Neh M. Nichols, F. W. Hicks, Chas. H. Payne, Grace Shellenberger. Lecturers: I. F. Meyer, H. F. Harris, F. W. Hicks, Chas. A. Payne, Grace Shellenberger, Geo. Farrell. |
| Tama..... | Mary A. Richards..... | Instructors (1911): Mrs. B. O. Roper, Blanche Goudy, W. A. Pyc, C. P. Colgrove, F. W. Johansen, J. F. Jothers, Walter, S. Mitchell, Ross Masters, H. W. Ward. |

ABSTRACT [E] REPORTS OF COUNTY SUPERINTENDENTS—CON.

INSTITUTE FACULTIES, JULY 1, 1911, TO JUNE 30, 1912

| Counties | Conductors | Instructors and Lecturers |
|------------|--------------------|---|
| | Mary A. Richards | Instructors (1912): O. P. Colgrove, Louise Campbell, M. R. Fayram, Blanche Goudy, Prof. Ward, Prof. Masters, J. F. Nothers, Edith Williamson. Lecturers: Prof. O. W. Colgrove, Prof. H. W. Ward, Louise Campbell. |
| Taylor | Della Griffin | Instructors: Allan Peterson, E. R. Sanford, Alice Gordon, Ellen J. Wing, O. F. Belzer, E. W. Goetsch, Walter Mitchell, Mrs. H. S. Ash. Lecturers: O. F. Belzer, O. F. Wassam. |
| Union | Sylvia Cook | Instructors: Elizabeth Pattee, Margaret Sullivan, J. W. Radebaugh, Jennie M. Golden, W. O. Kennedy. Lecturers: Chas. Fordyce, Hattie M. Mitchell, W. A. Price, H. H. Scerley, A. M. Deyoe. |
| Van Buren | Lizzie V. Meredith | Instructors: David Williams, A. L. Heminger, A. T. L. Owen, F. L. Hammitt, Katherine Cressap. Lecturer: Dr. Pearson. |
| Wapello | Elizabeth Burgess | Instructors: O. H. Cessana, Charlotte Sweeney, Anna E. McDougall, L. A. Wilson, A. L. Heminger, F. M. Hammitt, Mrs. Theodosia Harrison. Lecturers: D. E. Cloyd, A. J. Pearson, F. M. Hammitt, O. H. Cessana. |
| Warren | O. E. Smith | Instructors: J. E. Prather, Florence Armstrong, Carrie Van Gilder, Effie Silliman, W. A. Larimer, Bess Smith, E. W. Beard. Lecturer: John Tilton. |
| Washington | Minnie B. Connor | Instructors: Ella Ford Miller, W. L. Athearn, E. L. Stewart, A. O. Fuller, H. E. Case, Mrs. Carl Roberts, Margaret Doolittle. Lecturers: F. L. Mahannah, Geo. H. Betts, W. L. Athearn. |
| Wayne | Anna King Pittard | Instructors: B. Roland Lewis, Herbert M. Thompson, Harry D. Kies, Minnie W. Dungan, Bertha Day, W. M. Frame. Lecturers: B. Roland Lewis, Herbert M. Thompson. |
| Webster | Mary A. Carey | Instructors: Alice Meade, Elizabeth Carmichael, J. E. Townsend, Ursula Ryan, Oedil Pakmar. Lecturers: Arthur MacMurray, D. H. Kelley. |
| Winnebago | L. O. Brown | Instructors: A. F. Benson, W. S. Still, Thorwold Thorson, H. O. Swingen, O. F. Pye, Katherine Reynolds, W. A. O. Benson. |
| Winneshiek | Sigurd Reque | Instructors: H. H. Hegeman, W. L. Peck, Ella Treat, Nell Newton, Elsie Wygant, Eva Fleming. Lecturer: H. H. Hegeman. |
| Woodbury | T. B. Morris | Instructors: Fannie Foster, Sid J. Backus, E. J. Feuling, O. W. Wassam, M. L. Gates, M. L. Howell, O. F. Clark, M. D. Smith. Lecturers: T. B. Morris, O. W. Wassam, Sid J. Backus, E. J. Feuling, M. L. Howell, M. D. Smith, O. F. Clark, M. G. Clark. |
| Worth | O. E. Gunderson | Instructors: W. H. Bender, W. H. Hagemann, Mrs. D. Stoeve. Lecturers: W. H. Bender, W. H. Hagemann, A. E. Kepford. |
| Wright | M. L. Howell | Instructors: M. L. Howell, Dr. Bennett, Prof. Cromwell, Prof. Samson, Supt. Blakely, Supt. Pocht, Supt. Myers, Miss F. Ward. Lecturers: Dr. Samson, Dr. Bennett. |

PART II.

| | |
|---|---------|
| Abstract [A] reports of county superintendents—pupils, enumeration, enrollment—corporations, directors, teachers, etc.— | |
| 1910-1911, Part II..... | 26-33 |
| 1911-1912, Part II..... | 158-165 |
| Abstract [B], reports of county superintendents—school of finances— | |
| 1910-1911, Part II..... | 34-51 |
| 1911-1912, Part II..... | 166-183 |
| Abstract [C], reports of county superintendents—certificates issued by educational board of examiners—register of certificates— | |
| July 1, 1910, to June 30, 1911, Part II..... | 52-59 |
| July 1, 1911, to June 30, 1912, Part II..... | 184-187 |
| Abstract [D], reports of county superintendents—buildings and grounds—meetings, school visitation, appeals, compensation, etc.— | |
| July 1, 1910, to June 30, 1911, Part II..... | 60-63 |
| July 1, 1911, to June 30, 1912, Part II..... | 188-191 |

| | |
|--|--------------------|
| Abstract [E], reports of county superintendents—teachers normal institutes, institute faculties— | |
| July 1, 1910, to June 30, 1911, Part II..... | 64-74 |
| July 1, 1911, to June 30, 1912, Part II..... | 192-201 |
| Abstract [F], reports of county superintendents—corporations, directors, teachers— | |
| June 30, 1911, Part II..... | 75-76 |
| June 30, 1912, Part II..... | 202-203 |
| Abstract [G], reports of county superintendents—special library report— | |
| July 1, 1910, to June 30, 1911, Part II..... | 78-81 |
| July 1, 1911, to June 30, 1912, Part II..... | 204-207 |
| Abstract [H], reports of county superintendents—private, denominational and higher educational institutions by counties— | |
| July 1, 1910, to June 30, 1911, Part II..... | 82-97 |
| July 1, 1911, to June 30, 1912, Part II..... | 208, 221 |
| Amount expended for libraries— | |
| 1910-1911, Part II..... | 79, 81 |
| 1911-1912, Part II..... | 205, 207 |
| Amount of tuition received— | |
| 1910-1911, Part II..... | 27, 29, 34, 36 |
| 1911-1912, Part II..... | 159, 161, 166, 168 |
| Apparatus, value of— | |
| 1910-1911, Part II..... | 27, 29 |
| 1911-1912, Part II..... | 159, 161 |
| Appeals to county superintendents—number of cases— | |
| 1910-1911, Part II..... | 62-63 |
| 1911-1912, Part II..... | 190-191 |
| Attendance and enrollment— | |
| 1910-1911, Part II..... | 26, 28 |
| 1911-1912, Part II..... | 158, 160 |
| Attendance—average in graded schools — | |
| 1910-1911, Part II..... | 99-103 |
| 1911-1912, Part II..... | 222-231 |
| Upon enrollment— | |
| 1910-1911, Part II..... | 99, 101 |
| 1911-1912, Part II..... | 223-229 |
| Upon enumeration, ibid. | |
| Average compensation of teachers per month— | |
| 1910-1911, Part II..... | 31, 33, 99-130 |
| 1911-1912, Part II..... | 163, 165, 223-265 |
| Average number of months employed— | |
| 1910-1911, Part II..... | 33 |
| 1911-1912, Part II..... | 165 |
| Average number of months taught in each school— | |
| 1910-1911, Part II..... | 30, 32 |
| 1911-1912, Part II..... | 162, 164 |
| Average number of months taught on each certificate— | |
| 1910-1911, Part II..... | 33 |
| Bond fund—school building—receipts and expenditures— | |
| 1910-1911, Part II..... | 46-49 |
| 1911-1912, Part II..... | 178-181 |
| Bonds—school—outstanding— | |
| June 30, 1911, Part II..... | 50-51 |
